

## MATERIAL SAFETY DATA SHEET

According to Dir. 2001/58/EEC

### 1. PRODUCT: BLEACH PASTE DECO 514

A bleaching paste

Distributed by: HUWELL CHEMICALS S.p.a.  
Via C.R. Darwin 73/79  
20019 Settimo Milanese (MI)  
Tel.: 02/33501936  
Fax: 02/33576965  
lab1@huwell.it

### 2. HAZARD IDENTIFICATION

Symbol

**O** Oxidizing

X<sub>n</sub>

**X<sub>n</sub>** Harmful

R phrases

R8	Contact with combustible material may cause fire
R22	Harmful if swallowed
R36/38	Irritating to eyes and skin.
R43	May cause sensitization by skin contact.

### 3. COMPOSITION / INFORMATION ON INGREDIENTS

Dangerous substances for health and as per 67/548/CEE regulation and subsequent revisions or limited exposition substances:

- Potassium Persulfate	CAS 7727-21- 1
- Ammonium persulphates	CAS 7727-54-0
- Sodium Metasilicate	CAS 6834-92-0

### 4. FIRST AID MEASURES

Eye contact: flush with plenty of water immediately. Remove contact lenses if used. Immediately get medical attention.

Skin contact: rinse immediately with water. Wash the contaminated clothes before using them again. Should allergic reaction develop, consult a dermatologist.

Inhalation: //

Ingestion: rinse the mouth without swallowing. Immediately get medical attention.

## 5. FIRE FIGHTING MEASURES

Suitable extinguishing media: water, water spray, CO<sub>2</sub>, foam. Water or water spray has to be used until complete extinguishing.

In case of big fires, wear breathing apparatus and complete protective clothing.

## 6. ACCIDENTAL RELEASE MEASURES

Personal protection: wear protective clothing.

Environmental precautions: local exhausting is needed to avoid production of irritating dust. Avoid penetration of the product into the soil/earth. If the product reaches watercourses and/or the drainage system, advise the proper authorities.

Measures for cleaning up spillage: maintain good manufacturer hygiene. Avoid contact with skin, eyes and clothes. In case of contact, wash immediately with water. Clean any spillage and pick up mechanically; dispose of in accordance with local and national regulations.

## 7. HANDLING AND STORAGE

7.1 Handling: avoid the formation of irritating dust. Provide accurate dust captation and adequate ventilation/aspiration in working areas. Avoid the formation of electro-static charges.

7.2 Storage: store in cool (below 30 °C) and dry areas. Avoid contamination and avoid the presence of reducing agents like lotions and permanent waves. Discard any unused mixture with developer or bleaching lotions, since the container may break. AVOID humid organic material as paper towel, wood, clothes, etc. which could induce spontaneous combustion. Protect from heat and sunlight; store in places far from rain and humidity; never store outdoors.

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Precautionary measures: exhaust ventilation is required where the products are stored and/or handled. Keep far from food, drink and animal feeding stuff.

Respiratory protection: not requested for normal use; you may wear a paper mask for powders. Avoid inhalation. When containers are open, protect the face. For prolonged exposures, wear a mask for harmful powders.

Skin/hands protection: wear protective gloves.

Eye protection: not requested. Avoid contact.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Creamy paste
Odour	Characteristic
Bulk density	1,415 ± 0,05 g/ml
Solubility in water	Partially soluble
Melting point	Not known
Boiling point	Not known
Decomposition temperature	> 65°C
pH (aqueous dispersion 1g/100ml)	8,8 - 9,8
% equivalent active oxygen	2,50 -3,10
Allergens	None

## 10. STABILITY AND REACTIVITY

The product does not undergo decomposition if handled in accordance with regulations. The product is stable in security conditions, up to 65 °C; above this temperature it slowly starts to decompose, giving rise to small quantities of oxygen and ammonia. At approximately 180 °C decomposition becomes fast and auto-accelerating, and generates oxygen which can give rise to relevant fires.

**Humidity** is a very important factor, because the product moisture - when not kept under control and not stable- can considerably lower the decomposition temperature.

Conditions to avoid: **heat, moisture**, reducing agents such as waving lotions. Avoid impact. Do not subject to friction. May build static electric charge.

Incompatibilities: acids, alkali, halides, metals, burning and combustible materials. Do not use metallic bowls or stirrers.

Hazardous decomposition products: corrosive gases/vapours; toxic gases/vapours of sulfur (SO<sub>x</sub>), ammonia, nitrogen oxides (NO<sub>x</sub>) and ozone.

## 11. TOXICOLOGICAL INFORMATION

This product contains ingredients that may present health hazards. These ingredients are irritating to skin and mucous membranes of the eyes and respiratory system. They may trigger asthmatic attacks in sensitive individuals. They may induce skin sensitization and respiratory hypersensitivity.

Effects of chronic exposure: for purpose of chronic exposure under the OSHA Hazard Communication Standard, this is an untested mixture.

Target organs: skin, respiratory system.

Route of entry: inhalation, ingestion and skin.

General medical conditions, aggravated by exposure, will be related to the primary toxic (pharmacological) effect of this material; pre-existing dermatitis would be likely to get worse by a skin irritant; bronchitis is aggravated by irritant gases of particulates in the air.

## 12. ECOLOGICAL INFORMATION

Always follow good hygienic work practices. Avoid product dispersion in the environment.

German classification of risk for waters: WGK 1 - slightly dangerous.

## 13. DISPOSAL CONSIDERATIONS

Do not dispose of the product together with domestic waste. Do not let it enter the drainage system. Disposal should be in accordance with all applicable local and state regulations.

## 14. TRANSPORT INFORMATION

### UN 1479

#### Road/railway transport (ADR/RID)

Class 5.1

Packaging group III

Proper shipping name: Oxidizing solid, N.O.S. (Potassium persulphates, Ammonium persulphates )

#### Marine transport (IMO/IMDG)

Class 5.1

Packaging group III

Proper shipping name: Oxidizing solid, N.O.S. (Potassium persulphates, Ammonium persulphates )

No marine pollutant

#### Air transport (ICAO/IATA)

Class 5.1

Packaging group III

Proper shipping name: Oxidizing solid, N.O.S. (Potassium persulphates, Ammonium persulphates )

## 15. REGULATORY INFORMATION

Classification according to CEE directions:

Symbol

**O** Oxidizing

X<sub>n</sub>

**X<sub>n</sub>** Harmful

R phrases	R8 R22 R36/38 R43	Contact with combustible material may cause fire Harmful if swallowed Irritating to eyes and skin. May cause sensitization by skin contact.
S phrases	S2 <b>S8</b> S24 S26  S28 S46	Keep out of reach of children <b>Keep container dry</b> Avoid contact with the skin In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. After contact with skin, wash immediately with plenty of water. If swallowed seek medical advice immediately and show this container or label.

## 16. FURTHER INFORMATION

This information is based on our present state of knowledge and is intended solely to describe our productions in terms of safety requirements. It should not be construed in any way, as guaranteeing specific properties.

This safety data sheet cancels and replaces any previous edition.

Rev. 03

Date: 29.04.2010

## SAFETY DATA SHEET

### YELLOW BLEACHING POWDER 7 LEVELS

Date: 12/01/2018

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF018320 CI017545 YELLOW BLEACHING POWDER 7 LEVELS

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C  
Serious eye Damage Cat. 1  
Skin Sensitization Cat. 1  
Respiratory sensitisation Cat. 1  
Acute toxicity (oral) Cat. 4

##### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H302 Harmful if swallowed

# BEAUTY & BUSINESS S.p.A.

H314 Causes severe skin burns and eye damage

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P270 Do not eat, drink or smoke when using this product.

P272 Contaminated work clothing should not be allowed out of the workplace.

P280 Wear protective gloves/protective clothing/eye protection/face protection

P285 In case of inadequate ventilation wear respiratory protection (see Section 8 on this label)

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P330 Rinse mouth.

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Light blue fine powder
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.5 - 11.5 %
Density:	0,750 - 0.950 g/cc

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS S.p.A.

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

LD 50 Oral rat: 2000 mg/Kg

PARAFFINUM LIQUIDUM / MINERAL OIL

LD 50 Oral rat: 5000 mg/Kg

POTASSIUM PERSULFATE

LD 50 Oral rat: 700 mg/Kg

SODIUM METASILICATE

LD 50 Oral rat: 1349 mg/Kg

SODIUM SILICATE

LD 50 Oral rat: 3400 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

EDTA

LC 50: 100 mg/l/96h

POTASSIUM PERSULFATE

LC 50: 76,3 mg/l/96h

SODIUM METASILICATE

LC 50: 1108 mg/l/96h

SODIUM SILICATE

LC 50: 3185 mg/l/96h

# BEAUTY & BUSINESS S.p.A.

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3215
Proper shipping name:	PERSULPHATES, INORGANIC, N.O.S. (Potassium Persulfate; Sodium Silicate)
Class:	5.1
Packaging group:	III

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

# BEAUTY & BUSINESS S.p.A.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White/ ivory fine powder
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.5 - 11.5
Density:	0.750 - 0.950 g/cc

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS S.p.A.

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

LD 50 Oral rat: 2000 mg/Kg

PARAFFINUM LIQUIDUM / MINERAL OIL

LD 50 Oral rat: 5000 mg/Kg

POTASSIUM PERSULFATE

LD 50 Oral rat: 700 mg/Kg

SODIUM METASILICATE

## SAFETY DATA SHEET

### YELLOW BLEACHING POWDER 7 LEVELS

Date: 22/03/2018

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF018322 CI017545 YELLOW BLEACHING POWDER 7 LEVELS

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C  
Serious eye Damage Cat. 1  
Skin Sensitization Cat. 1  
Respiratory sensitisation Cat. 1  
Acute toxicity (oral) Cat. 4

##### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H302 Harmful if swallowed

# BEAUTY & BUSINESS S.p.A.

H314 Causes severe skin burns and eye damage

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P270 Do not eat, drink or smoke when using this product.

P272 Contaminated work clothing should not be allowed out of the workplace.

P280 Wear protective gloves/protective clothing/eye protection/face protection

P285 In case of inadequate ventilation wear respiratory protection (see Section 8 on this label)

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P330 Rinse mouth.

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Light Blue - Fine Powder
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.5 - 11.5 %
Density:	0.750 - 0.950 g/cc

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS S.p.A.

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

LD 50 Oral rat: 2000 mg/Kg

PARAFFINUM LIQUIDUM / MINERAL OIL

LD 50 Oral rat: 5000 mg/Kg

POTASSIUM PERSULFATE

LD 50 Oral rat: 700 mg/Kg

SODIUM METASILICATE

LD 50 Oral rat: 1349 mg/Kg

SODIUM SILICATE

LD 50 Oral rat: 3400 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

EDTA

LC 50: 100 mg/l/96h

POTASSIUM PERSULFATE

LC 50: 76,3 mg/l/96h

SODIUM METASILICATE

LC 50: 1108 mg/l/96h

SODIUM SILICATE

LC 50: 3185 mg/l/96h

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P270 Do not eat, drink or smoke when using this product.

P272 Contaminated work clothing should not be allowed out of the workplace.

P280 Wear protective gloves/protective clothing/eye protection/face protection

P285 In case of inadequate ventilation wear respiratory protection (see Section 8 on this label)

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P330 Rinse mouth.

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Light blue - Fine Powder
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.8 - 11.3
Density:	0.750 - 0.900 g/cc

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS S.p.A.

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

LD 50 Oral rat: 2000 mg/Kg

PARAFFINUM LIQUIDUM / MINERAL OIL

LD 50 Oral rat: 5000 mg/Kg

POTASSIUM PERSULFATE

LD 50 Oral rat: 700 mg/Kg

SODIUM METASILICATE

LD 50 Oral rat: 1349 mg/Kg

SODIUM SILICATE

LD 50 Oral rat: 3400 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

EDTA

LC 50: 100 mg/l/96h

POTASSIUM PERSULFATE

LC 50: 76,3 mg/l/96h

SODIUM METASILICATE

LC 50: 1108 mg/l/96h

SODIUM SILICATE

LC 50: 3185 mg/l/96h

# BEAUTY & BUSINESS S.p.A.

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3215
Proper shipping name:	PERSULPHATES, INORGANIC, N.O.S. (Potassium Persulfate; Sodium Silicate)
Class:	5.1
Packaging group:	III

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White-Ivory - Fine Powder
Odour:	Characteristic
Flash point:	Not flammable
pH:	12.0 12.5
Density:	0.600 - 0.750 g/cc

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS S.p.A.

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

LD 50 Oral rat: 2000 mg/Kg

PARAFFINUM LIQUIDUM / MINERAL OIL

LD 50 Oral rat: 5000 mg/Kg

POTASSIUM PERSULFATE

LD 50 Oral rat: 700 mg/Kg

SODIUM METASILICATE

LD 50 Oral rat: 1349 mg/Kg

SODIUM SILICATE

LD 50 Oral rat: 3400 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

EDTA

LC 50: 100 mg/l/96h

POTASSIUM PERSULFATE

LC 50: 76,3 mg/l/96h

SODIUM METASILICATE

LC 50: 1108 mg/l/96h

SODIUM SILICATE

LC 50: 3185 mg/l/96h

# BEAUTY & BUSINESS S.p.A.

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3215
Proper shipping name:	PERSULPHATES, INORGANIC, N.O.S. (Potassium Persulfate; Sodium Silicate)
Class:	5.1
Packaging group:	III

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

BB BLEACH EASY LIFT

Date: 03/04/2018

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF018521 CI017614 BB BLEACH EASY LIFT

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C  
Serious eye Damage Cat. 1  
Skin Sensitization Cat. 1  
Respiratory sensitisation Cat. 1  
Acute toxicity (oral) Cat. 4

#### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H302 Harmful if swallowed

# BEAUTY & BUSINESS S.p.A.

H314 Causes severe skin burns and eye damage

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P270 Do not eat, drink or smoke when using this product.

P272 Contaminated work clothing should not be allowed out of the workplace.

P280 Wear protective gloves/protective clothing/eye protection/face protection

P285 In case of inadequate ventilation wear respiratory protection (see Section 8 on this label)

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P330 Rinse mouth.

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2,4-DIAMINOPHENOXYETHANOL HCl

LD 50 Oral rat: 1113 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

## 12.2 Persistence

No data available.

## 12.3 Bioaccumulative potential

No data available.

## 12.4 Motility in soil

No data available.

## 12.5 Results of PBT e vPvB assessment

No data available.

## 12.6 Other adverse effects

No data available.

## Section 13: Disposal considerations

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## Section 14: Transport information

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## Section 15: Regulatory information

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### Evaluation of chemical security

No data available

## Section 16: Other informations

# BEAUTY & BUSINESS

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.  
The user must verify the suitability and completeness of such information, in relation to the particular use intended.  
This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

### COLOR WEAR EVOLUTION TONE ON TONE COLOR 3

Date: 07/08/2017

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF013725 CI003605 COLOR WEAR EVOLUTION TONE ON TONE COLOR 3

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 3

Skin Sensitization Cat. 1

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

EUH208 Contains 2,4-DIAMINOPHENOXYETHANOL HCl, may produce an allergic reaction

H315 Causes skin irritation

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

###### Precautionary statement (Disposal)

# BEAUTY & BUSINESS

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige/Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable

## SAFETY DATA SHEET

### COLOR WEAR EVOLUTION TONE ON TONE COLOR 5

Date: 07/08/2017

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF013727 CI003603 COLOR WEAR EVOLUTION TONE ON TONE COLOR 5

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 3

Skin Sensitization Cat. 1

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

EUH208 Contains RESORCINOL , may produce an allergic reaction

H315 Causes skin irritation

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

###### Precautionary statement (Disposal)

# BEAUTY & BUSINESS

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.7 - 10.7
Viscosity:	50000 - 100000 cPs

# BEAUTY & BUSINESS

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

## SAFETY DATA SHEET

### COLOR WEAR EVOLUTION TONE ON TONE COLOR 7

Date: 07/08/2017

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF013729 CI003601 COLOR WEAR EVOLUTION TONE ON TONE COLOR 7

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Skin Sensitization Cat. 1

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

EUH208 Contains RESORCINOL , may produce an allergic reaction

H315 Causes skin irritation

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

###### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

###### Precautionary statement (Prevention)

# BEAUTY & BUSINESS

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % EDTA

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### **Inhalation**

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### **Skin contact**

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### **Eye contact**

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### **Ingestion**

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

# BEAUTY & BUSINESS

Handle in accordance with good industrial hygiene and safety practice.  
Avoid contact and inhalation of vapours. See also paragraph 8.  
When using do not eat or drink.

## **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.7 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

# BEAUTY & BUSINESS

## **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## **10.5 Incompatible materials**

Strong acids, strong oxidants.

## **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

# BEAUTY & BUSINESS

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

# BEAUTY & BUSINESS

## Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.7 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

# BEAUTY & BUSINESS S.p.A.

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS S.p.A.

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige emulsion
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Density:	0.935 - 0.980 g/cc
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS S.p.A.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

# BEAUTY & BUSINESS S.p.A.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.7 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

LC 50: 349 mg/l/96h

#### LAURETH-3

LC 50: 10 mg/l/96h

#### SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

#### SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

# BEAUTY & BUSINESS

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

COLOR WEAR EVOLUTION TONE ON TONE COLOR 9.21

Date: 07/08/2017

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF013734 CI003628 COLOR WEAR EVOLUTION TONE ON TONE COLOR 9.21

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

#### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

H318 Causes serious eye damage

Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

# BEAUTY & BUSINESS

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## 2.3 Additional hazards

None

## **Section 3: Composition/ information on ingredients**

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

# BEAUTY & BUSINESS

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3267
Proper shipping name:	CORROSIVE LIQUID, BASIC, ORGANIC, N.O.S. (Ethanolamine)
Class:	8
Packaging group:	II

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

### COLOR WEAR EVOLUTION TONE ON TONE COLOR 5.5

Date: 07/08/2017

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF013736 CI003626 COLOR WEAR EVOLUTION TONE ON TONE COLOR 5.5

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfapargroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

Skin Sensitization Cat. 1

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H314 Causes severe skin burns and eye damage

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

###### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

###### Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

# BEAUTY & BUSINESS

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Violet - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

2-AMINO-3-HYDROXYPYRIDINE

LD 50 Oral rat: 500 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

COLOR WEAR EVOLUTION TONE ON TONE COLOR 7.32

Date: 07/08/2017

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF013738 CI003620 COLOR WEAR EVOLUTION TONE ON TONE COLOR 7.32

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfapargroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 3

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

##### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS

## Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % 2-METHYLRESORCINOL

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### **Inhalation**

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### **Skin contact**

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### **Eye contact**

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### **Ingestion**

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

# BEAUTY & BUSINESS

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Density:	0.930 - 0.980 g/cc
Viscosity:	50000 - 100000 cPs

# BEAUTY & BUSINESS

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **SODIUM LAURETH SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURYL SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### **EDTA**

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

###### Precautionary statement (Disposal)

# BEAUTY & BUSINESS

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Yellow - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Yellow - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

#### p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

#### SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

LC 50: 349 mg/l/96h

#### LAURETH-3

LC 50: 10 mg/l/96h

#### p-AMINOPHENOL

# BEAUTY & BUSINESS

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

## 12.2 Persistence

No data available.

## 12.3 Bioaccumulative potential

No data available.

## 12.4 Motility in soil

No data available.

## 12.5 Results of PBT e vPvB assessment

No data available.

## 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige/Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.7 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

LC 50: 349 mg/l/96h

#### LAURETH-3

LC 50: 10 mg/l/96h

#### SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

#### SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

# BEAUTY & BUSINESS

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

# BEAUTY & BUSINESS

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

LD 50 Oral rat: 2000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

### COLOR WEAR EVOLUTION TONE ON TONE COLOR RED

Date: 08/08/2017

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF013748 CI003632 COLOR WEAR EVOLUTION TONE ON TONE COLOR RED

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 3

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

###### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

###### Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

# BEAUTY & BUSINESS

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

# BEAUTY & BUSINESS

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## Section 9: Physical and chemical properties

Colour and aspect:	Red - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Viscosity:	50000 - 100000 cPs

## Section 10. Stability and reactivity

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

# BEAUTY & BUSINESS

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

BASIC RED 51

LD 50 Oral rat: 1000 mg/Kg

BASIC YELLOW 87

LD 50 Oral rat: 1000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

PENTASODIUM PENTETATE

LD 50 Oral rat: 4550 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

BASIC YELLOW 87

LC 50: 34 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

PENTASODIUM PENTETATE

LC 50: 854 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

# BEAUTY & BUSINESS

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

# BEAUTY & BUSINESS

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

# BEAUTY & BUSINESS

## Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

## Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.7 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

# BEAUTY & BUSINESS

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.7 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **m-AMINOPHENOL**

LD 50 Oral rat: 924 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **SODIUM LAURETH SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURYL SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

# BEAUTY & BUSINESS

## Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

## Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige/Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

# BEAUTY & BUSINESS

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF013755 CI007719 COLOR WEAR EVOLUTION TONE ON TONE COLOR 9.13

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfapargroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

#### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

H318 Causes serious eye damage

Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

# BEAUTY & BUSINESS

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## 2.3 Additional hazards

None

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

# BEAUTY & BUSINESS

## Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige/Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

There are no data available on the product itself.

# BEAUTY & BUSINESS

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

LC 50: 349 mg/l/96h

#### LAURETH-3

LC 50: 10 mg/l/96h

#### SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

#### SODIUM LAURYL SULFATE

# BEAUTY & BUSINESS

LC 50: 100 mg/l/96h

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3267
Proper shipping name:	CORROSIVE LIQUID, BASIC, ORGANIC, N.O.S. (Ethanolamine)
Class:	8
Packaging group:	II

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

COLOR WEAR EVOLUTION TONE ON TONE COLOR 8.12

Date: 08/08/2017

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF013757 CI006662 COLOR WEAR EVOLUTION TONE ON TONE COLOR 8.12

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfapargroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

#### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

H318 Causes serious eye damage

Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

# BEAUTY & BUSINESS

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## 2.3 Additional hazards

None

## **Section 3: Composition/ information on ingredients**

### 3.1 Substances:

Not applicable

### 3.2 Mixture:

< 1 % 2-METHYLRESORCINOL

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

# BEAUTY & BUSINESS

## Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige/Ivory - Cream
Odour:	Caratteristico
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## SAFETY DATA SHEET

COLOR WEAR EVOLUTION TONE ON TONE COLOR 5.32

Date: 08/08/2017

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF013759 CI010089 COLOR WEAR EVOLUTION TONE ON TONE COLOR 5.32

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 3

Skin Sensitization Cat. 1

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

EUH208 Contains 4-AMINO-2-HYDROXYTOLUENE , RESORCINOL , may produce an allergic reaction

H315 Causes skin irritation

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

##### Precautionary statement (Disposal)

# BEAUTY & BUSINESS

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % 2-METHYLRESORCINOL

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.7 - 10.7
Viscosity:	50000 - 100000 cPs

# BEAUTY & BUSINESS

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

#### p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

#### SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

## 12.2 Persistence

No data available.

## 12.3 Bioaccumulative potential

No data available.

## 12.4 Motility in soil

No data available.

## 12.5 Results of PBT e vPvB assessment

No data available.

## 12.6 Other adverse effects

No data available.

## Section 13: Disposal considerations

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## Section 14: Transport information

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## Section 15: Regulatory information

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### Evaluation of chemical security

No data available

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

##### Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

##### Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

# BEAUTY & BUSINESS

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## 2.3 Additional hazards

None

## **Section 3: Composition/ information on ingredients**

### 3.1 Substances:

Not applicable

### 3.2 Mixture:

< 1 % EDTA

CAS#: 60-00-4 EINECS#: 200-449-4

Eye Irrit. 2 H319 – Acute Tox. 4 H332 – STOT RE 2 H373

< 1 % ERYTHORBIC ACID

CAS#: 89-65-6 EINECS#: 201-928-0

Eye Irrit. 2 H319 – STOT SE 3 H335 – Skin Irrit. 2 H315

< 1 % SODIUM LAURYL SULFATE

CAS#: 151-21-3 ; 73296-89-6 EINECS#: 277-362-3

Eye Dam. 1 H318 – Skin Irrit. 2 H315 – Aquatic Chronic 3 H412

1-3 % LAURETH-3

CAS#: 3055-94-5 EINECS#: 221-280-2

Eye Irrit. 1 H318 – Aquatic Chronic 3 H412 – Aquatic Tox. 1 H400 – Fattore M: 1

1-3 % OLETH-5 PHOSPHATE

CAS#: 39464-69-2 EINECS#:

Skin Irrit. 2 H315 – Eye Irrit. 1 H318

1-3 % SODIUM LAURETH SULFATE

CAS#: 9004-82-4 ; 1335-72-4 ; 68891-38-3 ; 68585-34-2 EINECS#:

Eye Dam. 1 H318 – Skin Corr. 2 H315 – Aquatic Chronic 3 H412

3-5 % ETHANOLAMINE

CAS#: 141-43-5 EINECS#: 205-483-3

Acute Tox. 4 H312 – Acute Tox. 4 H332 – STOT SE 3 H335 – Skin Corr. 1A H314 – Aquatic Acute 3 H412

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

# BEAUTY & BUSINESS

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

# BEAUTY & BUSINESS

## Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

## Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.7 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

# BEAUTY & BUSINESS

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

# BEAUTY & BUSINESS

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Homogeneous Cream

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

LC 50: 100 mg/l/96h

## 12.2 Persistence

No data available.

## 12.3 Bioaccumulative potential

No data available.

## 12.4 Motility in soil

No data available.

## 12.5 Results of PBT e vPvB assessment

No data available.

## 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2-AMINO-3-HYDROXYPYRIDINE

LD 50 Oral rat: 500 mg/Kg

2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

LD 50 Oral rat: 2000 mg/Kg

#### 2,4-DIAMINOPHENOXYETHANOL HCl

LD 50 Oral rat: 1113 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

#### m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

#### SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

# BEAUTY & BUSINESS

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

LD 50 Oral rat: 2000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF013770 CI012660 COLOR WEAR EVOLUTION TONE ON TONE COLOR 5.62

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

Hazardous to the aquatic environment - chronic toxicity Cat. 3

Skin Sensitization Cat. 1

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

EUH208 Contains TOLUENE-2,5-DIAMINE SULFATE , may produce an allergic reaction

H314 Causes severe skin burns and eye damage

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

##### Precautionary statement (Disposal)

# BEAUTY & BUSINESS

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Homogeneous Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

# BEAUTY & BUSINESS

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-AMINO-3-HYDROXYPYRIDINE

LD 50 Oral rat: 500 mg/Kg

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

#### p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

#### SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

LC 50: 349 mg/l/96h

#### LAURETH-3

LC 50: 10 mg/l/96h

#### p-AMINOPHENOL

LC 50: 10 mg/l/96h

#### SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

#### SODIUM LAURYL SULFATE

# BEAUTY & BUSINESS

LC 50: 100 mg/l/96h

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

Acute Tox. 4 H312 – Acute Tox. 4 H332 – STOT SE 3 H335 – Skin Corr. 1A H314 – Aquatic Acute 3 H412

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

# BEAUTY & BUSINESS

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

Danger

###### Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

###### Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

###### Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

# BEAUTY & BUSINESS

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## 2.3 Additional hazards

None

## **Section 3: Composition/ information on ingredients**

### 3.1 Substances:

Not applicable

### 3.2 Mixture:

< 1 % CETEARETH-20

CAS#: 68439-49-6 EINECS#:

Acute Tox. 3 H302 – Eye Dam. 1 H318

< 1 % CETRIMONIUM CHLORIDE

CAS#: 112-02-7 EINECS#: 203-928-6

Acute Tox. 3 H311 – Acute Tox. 3 H302 – Skin Corr. 1A H314 – Aquatic Tox. 1 H400 – Aquatic Chronic 1 H410 – Fattore M: 1

3-5 % HYDROGEN PEROXIDE

CAS#: 7722-84-1 EINECS#: 231-765-0

Acute Tox. 4 H332 – Acute Tox. 4 H302 – Skin Corr. 1A H314 – Aquatic Chronic 3 H412

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

# BEAUTY & BUSINESS

## 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

## 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## Section 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

# BEAUTY & BUSINESS

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory - Fluid Cream
Odour:	Odourless
Flash point:	Not flammable
pH:	2.2 - 3.2
Density:	1.005 - 1.025 g/cc
Viscosity:	3000 - 4000 cPs
Dry 110°:	2.0 - 3.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### CETEARETH-20

LD 50 Oral rat: 5000 mg/Kg

#### CETRIMONIUM CHLORIDE

LD 50 Oral rat: 2000 mg/Kg

#### HYDROGEN PEROXIDE

LD 50 Oral rat: 1193 mg/Kg

# BEAUTY & BUSINESS

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

CETEARETH-20

LC 50: 100 mg/l/96h

CETRIMONIUM CHLORIDE

LC 50: 1 mg/l/96h

HYDROGEN PEROXIDE

LC 50: 16,4 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#: Not Dangerous

Proper shipping name: Not Dangerous

Class: Not Dangerous

Packaging group: Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

# BEAUTY & BUSINESS

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.  
The user must verify the suitability and completeness of such information, in relation to the particular use intended.  
This safety data sheet cancels and replaces any previous releases of the same.

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

# BEAUTY & BUSINESS S.p.A.

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory / beige homogeneous cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7
Density:	0.940 g/cc
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

# BEAUTY & BUSINESS S.p.A.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

# BEAUTY & BUSINESS S.p.A.

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory / beige homogeneous cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 10.7

# BEAUTY & BUSINESS S.p.A.

Density: 0.940 g/cc  
Viscosity: 50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2-AMINO-3-HYDROXYPYRIDINE

LD 50 Oral rat: 500 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

# BEAUTY & BUSINESS S.p.A.

LC 50: 100 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3267
Proper shipping name:	Corrosive liquid, basic, organic, N.O.S. (Ethanolamine)
Class:	8
Packaging group:	II

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### Evaluation of chemical security

No data available

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

Skin Sensitization Cat. 1

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

EUH208 Contains 2-AMINO-3-HYDROXYPYRIDINE , may produce an allergic reaction

H314 Causes severe skin burns and eye damage

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

###### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Prevention)

- P260 Do not breathe dust/fume/gas/mist/vapours/spray.
- P261 Avoid breathing dust/fume/gas/mist/vapours/spray.
- P264 Wash hands and other skin areas exposed to material thoroughly after handling.
- P272 Contaminated work clothing should not be allowed out of the workplace.
- P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

- P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting
- P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower
- P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
- P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- P310 Immediately call a POISON CENTER or doctor/physician.
- P321 Specific treatment (see Section 4 on this label).
- P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

- P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

Viscosity:	50000 - 100000

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

LD 50 Oral rat: 2000 mg/Kg

2-AMINO-3-HYDROXYPYRIDINE

LD 50 Oral rat: 500 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

m-AMINOPHENOL

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 924 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

LC 50: 130 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

m-AMINOPHENOL

LC 50: 1,1 mg/l/96h

p-AMINOPHENOL

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

# BEAUTY & BUSINESS S.p.A.

## Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3267
Proper shipping name:	Corrosive liquid, basic, organic, N.O.S. (Ethanolamine)
Class:	8
Packaging group:	II

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

###### Signal Word

Danger

###### Hazard statement:

H314 Causes severe skin burns and eye damage

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H319 Causes irritation to eyes

# BEAUTY & BUSINESS S.p.A.

H412 Harmful to aquatic life with long-lasting effects

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

# BEAUTY & BUSINESS S.p.A.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

Density:	> 0,935
Viscosity:	50000 - 100000

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE**

LD 50 Oral rat: 2000 mg/Kg

#### **5-AMINO-6-CHLORO-o-CRESOL**

LD 50 Oral rat: 3600 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **N,N-BIS(2-HYDROXYETHYL)-p-PHENYLENEDIAMINE SULFATE**

LD 50 Oral rat: 427 mg/Kg

#### **SODIUM LAURETH SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURYL SULFATE**

LD 50 Oral rat: 5000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

LC 50: 130 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3267
Proper shipping name:	Corrosive liquid, basic, organic, N.O.S. (Ethanalamine)
Class:	8
Packaging group:	II

## **Section 15: Regulatory information**

# BEAUTY & BUSINESS S.p.A.

## Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

## Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

# BEAUTY & BUSINESS S.p.A.

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory emulsion
Odour:	Characteristic
Flash point:	Not flammable
pH:	10,00 - 11,00

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

# BEAUTY & BUSINESS

## 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

## 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

# BEAUTY & BUSINESS

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Ivory - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.8 - 10.8
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2,4-DIAMINOPHENOXYETHANOL HCl**

LD 50 Oral rat: 1113 mg/Kg

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS S.p.A.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS S.p.A.

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.8 - 10.8
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **m-AMINOPHENOL**

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 924 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

m-AMINOPHENOL

LC 50: 1,1 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

# BEAUTY & BUSINESS S.p.A.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

H412 Harmful to aquatic life with long-lasting effects

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

## POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

## TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### BISABOLOL

LC 50: 10 mg/l/96h

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

LC 50: 349 mg/l/96h

#### LAURYL ALCOHOL

LC 50: 100 mg/l/96h

#### POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

# BEAUTY & BUSINESS S.p.A.

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

# BEAUTY & BUSINESS S.p.A.

## SAFETY DATA SHEET

### EVOLUTION OF THE COLOR CUBE 7

Date: 11/06/2018

Vers: 0

#### **Section 1: Identification of the substance/ mixture and of the company/undertaking**

##### **1.1 Product identifier**

PF005771 CI008055 EVOLUTION OF THE COLOR CUBE 7

##### **1.2 Relevant identified uses**

cosmetic product

##### **1.3 Details of the supplier of the safety data sheet**

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### **1.4 Emergency telephone number**

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### **Section 2: Hazard identification**

##### **2.1 Classification of the substance/mixture according to (EC) 1272/2008**

Serious eye Damage Cat. 1  
Skin irritation Cat. 2  
Hazardous to the aquatic environment - chronic toxicity Cat. 3  
Skin Sensitization Cat. 1

##### **2.2 Label**

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H315 Causes skin irritation  
H317 May cause an allergic skin reaction  
H318 Causes serious eye damage  
H412 Harmful to aquatic life with long-lasting effects

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Density:	0.935 - 0.980 g/cc
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

Tel.: 035 4197798 (orario di ufficio)

#### **Section 2: Hazard identification**

##### **2.1 Classification of the substance/mixture according to (EC) 1272/2008**

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 3

##### **2.2 Label**

Pictogram:

Signal Word

Danger

Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS S.p.A.

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.2 - 11.2

# BEAUTY & BUSINESS S.p.A.

Dry 110°:

30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

## SAFETY DATA SHEET

### EVOLUTION OF THE COLOR CUBE 4NB

Date: 15/12/2017

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF005775 CI008059 EVOLUTION OF THE COLOR CUBE 4NB

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 3

Skin Sensitization Cat. 1

##### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H315 Causes skin irritation

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % 2-METHYLRESORCINOL

CAS#: 608-25-3 EINECS#: 210-155-8

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Ivory - Compact Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.8 - 10.8
Density:	0.930 - 0.980 g/cc
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

###### Signal Word

Danger

###### Hazard statement:

H315 Causes skin irritation  
H317 May cause an allergic skin reaction  
H318 Causes serious eye damage  
H412 Harmful to aquatic life with long-lasting effects

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % 2-METHYLRESORCINOL

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Density:	0.935 - 0.980 g/cc
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

## SAFETY DATA SHEET

### EVOLUTION OF THE COLOR CUBE 8NB

Date: 18/12/2017

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF005779 CI008031 EVOLUTION OF THE COLOR CUBE 8NB

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 3

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H315 Contains TOLUENE-2,5-DIAMINE SULFATE, may produce an allergic reaction

H318 Causes skin irritation

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

###### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % 2-METHYLRESORCINOL

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS S.p.A.

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Ivory - Compact Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.2 - 11.2

# BEAUTY & BUSINESS S.p.A.

Density: 0.930 - 0.980 g/cc  
Dry 110°: 30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

## SAFETY DATA SHEET

### EVOLUTION OF THE COLOR CUBE 10NB

Date: 15/12/2017

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF005781 CI008064 EVOLUTION OF THE COLOR CUBE 10NB

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 3

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

###### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % BISABOLOL

CAS#: 515-69-5 EINECS#: 208-205-9

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS S.p.A.

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Ivory - Compact Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.2 - 11.2

# BEAUTY & BUSINESS S.p.A.

Dry 110°:

30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

#### MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

#### p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

#### POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### **AMMONIA**

LC 50: 0,89 mg/l/96h

#### **BISABOLOL**

LC 50: 10 mg/l/96h

### EVOLUTION OF THE COLOR CUBE 5NI

Date: 11/06/2018

Vers: 0

#### **Section 1: Identification of the substance/ mixture and of the company/undertaking**

##### **1.1 Product identifier**

PF005784 CI008067 EVOLUTION OF THE COLOR CUBE 5NI

##### **1.2 Relevant identified uses**

cosmetic product

##### **1.3 Details of the supplier of the safety data sheet**

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### **1.4 Emergency telephone number**

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### **Section 2: Hazard identification**

##### **2.1 Classification of the substance/mixture according to (EC) 1272/2008**

Serious eye Damage Cat. 1  
Skin irritation Cat. 2  
Hazardous to the aquatic environment - chronic toxicity Cat. 3  
Skin Sensitization Cat. 1

##### **2.2 Label**

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H315 Causes skin irritation  
H317 May cause an allergic skin reaction  
H318 Causes serious eye damage  
H412 Harmful to aquatic life with long-lasting effects

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % 2-METHYLRESORCINOL

CAS#: 608-25-3 EINECS#: 210-155-8

Acute Tox. 3 H301 – Eye Irrit. 2 H319 – Skin Irrit. 2 H315 – STOT SE 3 H335 – Aquatic Acute 1 H400

< 1 % BISABOLOL

CAS#: 515-69-5 EINECS#: 208-205-9

Aquatic Chronic 2 H411

< 1 % EDTA

CAS#: 60-00-4 EINECS#: 200-449-4

Eye Irrit. 2 H319 – Acute Tox. 4 H332 – STOT RE 2 H373

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **m-AMINOPHENOL**

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 924 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

m-AMINOPHENOL

LC 50: 1,1 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## SAFETY DATA SHEET

### EVOLUTION OF THE COLOR CUBE 7NI

Date: 11/06/2018

Vers: 0

#### **Section 1: Identification of the substance/ mixture and of the company/undertaking**

##### **1.1 Product identifier**

PF005786 CI008069 EVOLUTION OF THE COLOR CUBE 7NI

##### **1.2 Relevant identified uses**

cosmetic product

##### **1.3 Details of the supplier of the safety data sheet**

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### **1.4 Emergency telephone number**

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### **Section 2: Hazard identification**

##### **2.1 Classification of the substance/mixture according to (EC) 1272/2008**

Serious eye Damage Cat. 1  
Skin irritation Cat. 2  
Hazardous to the aquatic environment - chronic toxicity Cat. 3  
Skin Sensitization Cat. 1

##### **2.2 Label**

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H315 Causes skin irritation  
H317 May cause an allergic skin reaction  
H318 Causes serious eye damage  
H412 Harmful to aquatic life with long-lasting effects

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % 2-METHYLRESORCINOL

CAS#: 608-25-3 EINECS#: 210-155-8

Acute Tox. 3 H301 – Eye Irrit. 2 H319 – Skin Irrit. 2 H315 – STOT SE 3 H335 – Aquatic Acute 1 H400

< 1 % BISABOLOL

CAS#: 515-69-5 EINECS#: 208-205-9

Aquatic Chronic 2 H411

< 1 % EDTA

CAS#: 60-00-4 EINECS#: 200-449-4

Eye Irrit. 2 H319 – Acute Tox. 4 H332 – STOT RE 2 H373

< 1 % ERYTHORBIC ACID

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Density:	0.935 - 0.980 g/cc
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

## POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

## TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### BISABOLOL

LC 50: 10 mg/l/96h

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

LC 50: 349 mg/l/96h

#### LAURYL ALCOHOL

LC 50: 100 mg/l/96h

#### POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

Danger

Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

# BEAUTY & BUSINESS S.p.A.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.2 - 11.2
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 5000 mg/Kg

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory / Beige - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2,4-DIAMINOPHENOXYETHANOL HCl

LD 50 Oral rat: 1113 mg/Kg

AMMONIA

LD 50 Oral rat: 2000 mg/Kg

BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

MYRISTYL ALCOHOL

# BEAUTY & BUSINESS S.p.A.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS S.p.A.

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

#### MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

#### POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### BISABOLOL

LC 50: 10 mg/l/96h

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

# BEAUTY & BUSINESS S.p.A.

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

## 12.2 Persistence

No data available.

## 12.3 Bioaccumulative potential

No data available.

## 12.4 Motility in soil

No data available.

## 12.5 Results of PBT e vPvB assessment

No data available.

## 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

CAS#: 112-72-1 EINECS#: 204-000-3

Eye Irrit. 2 H319 – Aquatic Chronic 1 H410 – Fattore M: 1

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS S.p.A.

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0

# BEAUTY & BUSINESS S.p.A.

Dry 110°:

30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

# BEAUTY & BUSINESS S.p.A.

## Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

## Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS S.p.A.

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0

# BEAUTY & BUSINESS S.p.A.

Dry 110°:

30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0

# BEAUTY & BUSINESS S.p.A.

Dry 110°:

30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 3

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

###### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

# BEAUTY & BUSINESS S.p.A.

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

# BEAUTY & BUSINESS S.p.A.

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

H412 Harmful to aquatic life with long-lasting effects

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % 2,4-DIAMINOPHENOXYETHANOL HCl

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

# BEAUTY & BUSINESS S.p.A.

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

# BEAUTY & BUSINESS S.p.A.

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige thick emulsion
Odour:	Characteristic
Flash point:	Not flammable
pH:	9.7 - 10.7
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2,4-DIAMINOPHENOXYETHANOL HCl

LD 50 Oral rat: 1113 mg/Kg

2-AMINO-4-HYDROXYETHYLAMINOANISOLE SULFATE

LD 50 Oral rat: 588 mg/Kg

AMMONIA

LD 50 Oral rat: 2000 mg/Kg

BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### **Inhalation**

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### **Skin contact**

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### **Eye contact**

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### **Ingestion**

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige thick emulsion
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Density:	0.930 - 0.980 g/cc
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYL-5-HYDROXYETHYLAMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige thick emulsion
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Density:	0.935 - 0.980 g/cc
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYL-5-HYDROXYETHYLAMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

# BEAUTY & BUSINESS S.p.A.

## 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

## 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## Section 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

# BEAUTY & BUSINESS S.p.A.

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYL-5-HYDROXYETHYLAMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

## ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

## LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

## m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

## MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

## p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

## POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

## TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### BISABOLOL

LC 50: 10 mg/l/96h

#### EDTA

LC 50: 100 mg/l/96h

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

# BEAUTY & BUSINESS S.p.A.

## 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

## 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## Section 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

# BEAUTY & BUSINESS S.p.A.

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Compact cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Density:	0.930 - 0.980 g/cc
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick emulsion
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

#### m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

#### MYRISTYL ALCOHOL

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 2000 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory / Beige - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0

# BEAUTY & BUSINESS S.p.A.

Dry 110°:

30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

#### MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

#### p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

#### POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### **AMMONIA**

LC 50: 0,89 mg/l/96h

#### **BISABOLOL**

LC 50: 10 mg/l/96h

#### **EDTA**

LC 50: 100 mg/l/96h

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory / Beige - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0

# BEAUTY & BUSINESS S.p.A.

Dry 110°:

30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

# BEAUTY & BUSINESS S.p.A.

## Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

## Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

Danger

Hazard statement:

H315 Causes skin irritation  
H317 May cause an allergic skin reaction  
H318 Causes serious eye damage  
H412 Harmful to aquatic life with long-lasting effects

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory / Beige - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

# BEAUTY & BUSINESS S.p.A.

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

# BEAUTY & BUSINESS S.p.A.

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

# BEAUTY & BUSINESS S.p.A.

## Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

## Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

# BEAUTY & BUSINESS S.p.A.

## Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

## Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2-METHYL-5-HYDROXYETHYLAMINOPHENOL

# BEAUTY & BUSINESS S.p.A.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

# BEAUTY & BUSINESS S.p.A.

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

#### m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

#### MYRISTYL ALCOHOL

# BEAUTY & BUSINESS S.p.A.

Danger

## Hazard statement:

EUH208 Contains 2,4-DIAMINOPHENOXYETHANOL HCl , TOLUENE-2,5-DIAMINE SULFATE , may produce an allergic reaction

H315 Causes skin irritation

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H341 Suspected of causing genetic defects (state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard)

H411 Toxic to aquatic life with long-lasting effects

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P201 Obtain special instructions before use.

P202 Do not handle until all safety precautions have been read and understood.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

P281 Use personal protective equipment as required.

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P308 + P313 IF exposed or concerned: Get medical advice/attention.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

P391 Collect spillage.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

# BEAUTY & BUSINESS S.p.A.

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS S.p.A.

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

# BEAUTY & BUSINESS S.p.A.

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

# BEAUTY & BUSINESS S.p.A.

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE**

LD 50 Oral rat: 2000 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Red - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

# BEAUTY & BUSINESS S.p.A.

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

# BEAUTY & BUSINESS S.p.A.

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Red - Compact cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

LD 50 Oral rat: 2000 mg/Kg

#### 2,4-DIAMINOPHENOXYETHANOL HCl

LD 50 Oral rat: 1113 mg/Kg

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

# BEAUTY & BUSINESS S.p.A.

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

## **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Red - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	11.0 - 12.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

# BEAUTY & BUSINESS S.p.A.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BASIC RED 51

LD 50 Oral rat: 1000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### HC YELLOW NO. 2

LD 50 Oral rat: 1000 mg/Kg

#### LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

#### MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

#### PENTASODIUM PENTETATE

LD 50 Oral rat: 4550 mg/Kg

#### POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### BISABOLOL

LC 50: 10 mg/l/96h

#### LAURYL ALCOHOL

LC 50: 100 mg/l/96h

#### PENTASODIUM PENTETATE

LC 50: 854 mg/l/96h

#### POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

# BEAUTY & BUSINESS S.p.A.

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

# BEAUTY & BUSINESS S.p.A.

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Orange - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYL-5-HYDROXYETHYLAMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

## MYRISTYL ALCOHOL

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

# BEAUTY & BUSINESS S.p.A.

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.2 - 11.2
Dry 110°:	30.0 - 36.0 %

# BEAUTY & BUSINESS S.p.A.

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS S.p.A.

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.2 - 11.2

# BEAUTY & BUSINESS S.p.A.

Dry 110°:

30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

Eye Irrit. 2 H319 – Aquatic Chronic 1 H410 – Fattore M: 1

## 1-3 % TOLUENE-2,5-DIAMINE SULFATE

CAS#: 615-50-9 EINECS#: 210-431-8

Acute Tox. 3 H301 – Aquatic Chronic 2 H411 – Acute Tox. 4 H312 – Acute Tox. 4 H332 – Skin Sens. 1 H317

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 2000 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

# BEAUTY & BUSINESS S.p.A.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

# BEAUTY & BUSINESS S.p.A.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS S.p.A.

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0

# BEAUTY & BUSINESS S.p.A.

Dry 110°:

30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

# BEAUTY & BUSINESS S.p.A.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Red - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	11.5 - 12.5
Viscosity:	100000 - 250000 cPs
Dry 110°:	30.0 - 36.0 %

# BEAUTY & BUSINESS S.p.A.

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BASIC RED 51

LD 50 Oral rat: 1000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

#### MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

#### PENTASODIUM PENTETATE

LD 50 Oral rat: 4550 mg/Kg

#### POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### BISABOLOL

LC 50: 10 mg/l/96h

#### ETHANOLAMINE

# BEAUTY & BUSINESS S.p.A.

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

PENTASODIUM PENTETATE

LC 50: 854 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

## 12.2 Persistence

No data available.

## 12.3 Bioaccumulative potential

No data available.

## 12.4 Motility in soil

No data available.

## 12.5 Results of PBT e vPvB assessment

No data available.

## 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3267
Proper shipping name:	Corrosive liquid, basic, organic, N.O.S. (Ethanolamine; Ammonia)
Class:	8
Packaging group:	II

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE**

LD 50 Oral rat: 2000 mg/Kg

#### **1-NAPHTHOL**

LD 50 Oral rat: 2300 mg/Kg

#### **2,4-DIAMINOPHENOXYETHANOL HCl**

LD 50 Oral rat: 1113 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 1515 mg/Kg

LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

LC 50: 130 mg/l/96h

1-NAPHTHOL

LC 50: 4,2 mg/l/96h

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

# BEAUTY & BUSINESS S.p.A.

## Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

### EVOLUTION OF THE COLOR CUBE 7.34

Date: 15/12/2017

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF009688 CI010527 EVOLUTION OF THE COLOR CUBE 7.34

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1  
Skin irritation Cat. 2  
Germ cell mutagenicity Cat. 2  
Hazardous to the aquatic environment - chronic toxicity Cat. 2

##### 2.2 Label

Pictogram:

Signal Word

Danger

# BEAUTY & BUSINESS S.p.A.

## Hazard statement:

EUH208 Contains RESORCINOL , may produce an allergic reaction

H315 Causes skin irritation

H318 Causes serious eye damage

H341 Suspected of causing genetic defects (state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard)

H411 Toxic to aquatic life with long-lasting effects

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P201 Obtain special instructions before use.

P202 Do not handle until all safety precautions have been read and understood.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

P281 Use personal protective equipment as required.

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P308 + P313 IF exposed or concerned: Get medical advice/attention.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P391 Collect spillage.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS S.p.A.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS S.p.A.

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Orange - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2-AMINO-3-HYDROXYPYRIDINE

LD 50 Oral rat: 500 mg/Kg

2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

AMMONIA

LD 50 Oral rat: 2000 mg/Kg

BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### **AMMONIA**

LC 50: 0,89 mg/l/96h

#### **BISABOLOL**

LC 50: 10 mg/l/96h

#### **EDTA**

LC 50: 100 mg/l/96h

#### **ETHANOLAMINE**

LC 50: 349 mg/l/96h

#### **LAURYL ALCOHOL**

LC 50: 100 mg/l/96h

#### **p-AMINOPHENOL**

LC 50: 10 mg/l/96h

#### **POLYQUATERNIUM-22**

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

# BEAUTY & BUSINESS S.p.A.

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

# BEAUTY & BUSINESS S.p.A.

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.5 - 11.5
Dry 110°:	38.0 - 42.0 %

## **Section 10. Stability and reactivity**

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

# BEAUTY & BUSINESS S.p.A.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

AMMONIA

LD 50 Oral rat: 2000 mg/Kg

## SAFETY DATA SHEET

### EVOLUTION OF THE COLOR CUBE 11.11

Date: 15/12/2017

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF011231 CI011661 EVOLUTION OF THE COLOR CUBE 11.11

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

Hazardous to the aquatic environment - chronic toxicity Cat. 3

Skin Sensitization Cat. 1

##### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H314 Causes severe skin burns and eye damage

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % BISABOLOL

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.5 - 11.5
Dry 110°:	38.0 - 42.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS S.p.A.

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### AMMONIUM LAURYL SULFATE

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### DIMETHYLPABAMIDOPROPYL LAURDIMONIUM TOSYLATE

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### AMMONIUM LAURYL SULFATE

LC 50: 10 mg/l/96h

#### BISABOLOL

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.5 - 11.5
Dry 110°:	38.0 - 42.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS S.p.A.

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### AMMONIUM LAURYL SULFATE

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### DIMETHYLPABAMIDOPROPYL LAURDIMONIUM TOSYLATE

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### AMMONIUM LAURYL SULFATE

LC 50: 10 mg/l/96h

#### BISABOLOL

LC 50: 10 mg/l/96h

#### DIMETHYLPABAMIDOPROPYL LAURDIMONIUM TOSYLATE

LC 50: 10,7 mg/l/96h

#### EDTA

# BEAUTY & BUSINESS S.p.A.

ETHANOLAMINE

LC 50: 349 mg/l/96h

## 12.2 Persistence

No data available.

## 12.3 Bioaccumulative potential

No data available.

## 12.4 Motility in soil

No data available.

## 12.5 Results of PBT e vPvB assessment

No data available.

## 12.6 Other adverse effects

No data available.

## Section 13: Disposal considerations

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## Section 14: Transport information

UN#:	3267
Proper shipping name:	Corrosive liquid, basic, organic, N.O.S. (Ethanolamine; Ammonia)
Class:	8
Packaging group:	II

## Section 15: Regulatory information

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### Evaluation of chemical security

No data available

## Section 16: Other informations

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

# BEAUTY & BUSINESS S.p.A.

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.5 - 11.5
Dry 110°:	38.0 - 42.0 %

## **Section 10. Stability and reactivity**

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

# BEAUTY & BUSINESS S.p.A.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### AMMONIUM LAURYL SULFATE

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### DIMETHYLPABAMIDOPROPYL LAURDIMONIUM TOSYLATE

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### AMMONIUM LAURYL SULFATE

LC 50: 10 mg/l/96h

#### BISABOLOL

LC 50: 10 mg/l/96h

#### DIMETHYLPABAMIDOPROPYL LAURDIMONIUM TOSYLATE

LC 50: 10,7 mg/l/96h

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

LC 50: 349 mg/l/96h

# BEAUTY & BUSINESS S.p.A.

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

# BEAUTY & BUSINESS S.p.A.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Ivory - Compact Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **m-AMINOPHENOL**

LD 50 Oral rat: 924 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

m-AMINOPHENOL

LC 50: 1,1 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1  
Skin irritation Cat. 2  
Hazardous to the aquatic environment - chronic toxicity Cat. 3

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H315 Causes skin irritation  
H318 Causes serious eye damage  
H412 Harmful to aquatic life with long-lasting effects

###### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS S.p.A.

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters
