## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.5 - 11.5
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS S.p.A.

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

#### MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

#### POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### BISABOLOL

LC 50: 10 mg/l/96h

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

# BEAUTY & BUSINESS S.p.A.

LC 50: 349 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

## 12.2 Persistence

No data available.

## 12.3 Bioaccumulative potential

No data available.

## 12.4 Motility in soil

No data available.

## 12.5 Results of PBT e vPvB assessment

No data available.

## 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

# BEAUTY & BUSINESS S.p.A.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **MYRISTYL ALCOHOL**

LD 50 Oral rat: 2000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **POLYQUATERNIUM-22**

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

# BEAUTY & BUSINESS S.p.A.

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

# BEAUTY & BUSINESS S.p.A.

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory to beige thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

LD 50 Oral rat: 2000 mg/Kg

#### 1-NAPHTHOL

LD 50 Oral rat: 2300 mg/Kg

#### 2,4-DIAMINOPHENOXYETHANOL HCl

LD 50 Oral rat: 1113 mg/Kg

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Ivory - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Dry 110°:	30.0 - 36.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE**

LD 50 Oral rat: 2000 mg/Kg

#### **1-NAPHTHOL**

Hazard statement:

H315 Causes skin irritation  
H317 May cause an allergic skin reaction  
H318 Causes serious eye damage  
H412 Harmful to aquatic life with long-lasting effects

# BEAUTY & BUSINESS S.p.A.

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

# BEAUTY & BUSINESS S.p.A.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS S.p.A.

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.5 - 11.5
Density:	0.930 - 0.980 g/cc
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS S.p.A.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

AMMONIA

LD 50 Oral rat: 2000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

# BEAUTY & BUSINESS S.p.A.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

# BEAUTY & BUSINESS S.p.A.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS S.p.A.

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.5 - 11.5
Density:	0.930 - 0.980 g/cc
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS S.p.A.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

AMMONIA

LD 50 Oral rat: 2000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

AMMONIA

LC 50: 0,89 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

# BEAUTY & BUSINESS S.p.A.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

# BEAUTY & BUSINESS S.p.A.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS S.p.A.

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	Ivory compact cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10,0 - 11,0
Dry 110°:	30,0 - 36,0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

Hazard statement:

EUH208 Contains 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE , TOLUENE-2,5-DIAMINE SULFATE , may produce an allergic reaction

H315 Causes skin irritation

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS

## Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	Ivory compact cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10,0 - 11,0
Dry 110°:	30,0 36,0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### COCAMIDOPROPYL BETAINE

LD 50 Oral rat: 2335 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

# BEAUTY & BUSINESS

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	Ivory compact cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10,0 - 11,0
Dry 110°:	30,0 - 36,0 %

## **Section 10. Stability and reactivity**

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

# BEAUTY & BUSINESS

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

AMMONIA

LD 50 Oral rat: 2000 mg/Kg

BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

COCAMIDOPROPYL BETAINE

LD 50 Oral rat: 2335 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

AMMONIA

LC 50: 0,89 mg/l/96h

BISABOLOL

LC 50: 10 mg/l/96h

COCAMIDOPROPYL BETAINE

LC 50: 1,1 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

# BEAUTY & BUSINESS S.p.A.

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory/ beige compact cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10,0 - 11,0

# BEAUTY & BUSINESS S.p.A.

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

#### MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

#### POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### BISABOLOL

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory / beige compact cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10,0 - 11,0

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2,4-DIAMINOPHENOXYETHANOL HCl**

LD 50 Oral rat: 1113 mg/Kg

#### **2-AMINO-3-HYDROXYPYRIDINE**

LD 50 Oral rat: 500 mg/Kg

#### **AMMONIA**

LD 50 Oral rat: 2000 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

## p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

## POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

## TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### BISABOLOL

LC 50: 10 mg/l/96h

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

LC 50: 349 mg/l/96h

#### LAURYL ALCOHOL

LC 50: 100 mg/l/96h

#### p-AMINOPHENOL

LC 50: 10 mg/l/96h

#### POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

# BEAUTY & BUSINESS S.p.A.

## **Section 14: Transport information**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Fuchsia compact cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10,0 - 11,0

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

LD 50 Oral rat: 2000 mg/Kg

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

#### MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

#### p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

# BEAUTY & BUSINESS S.p.A.

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

# BEAUTY & BUSINESS S.p.A.

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory emulsion
Odour:	Characteristic
Flash point:	Not flammable
pH:	10,00 - 11,00
Density:	> 0,935
Dry 110°:	29,00 - 35,00

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE

LD 50 Oral rat: 2000 mg/Kg

#### 2-AMINO-3-HYDROXYPYRIDINE

LD 50 Oral rat: 500 mg/Kg

#### AMMONIA

LD 50 Oral rat: 2000 mg/Kg

#### BISABOLOL

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

# BEAUTY & BUSINESS S.p.A.

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

# BEAUTY & BUSINESS S.p.A.

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Eye Irrit. 2 H319 – Aquatic Chronic 1 H410 – Fattore M: 1

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory emulsion
Odour:	Characteristic
Flash point:	Not flammable
pH:	10,00 - 11,00
Density:	> 0,935
Dry 110°:	29,00 - 35,00

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2-AMINO-3-HYDROXYPYRIDINE

LD 50 Oral rat: 500 mg/Kg

AMMONIA

LD 50 Oral rat: 2000 mg/Kg

BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

## p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

## POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

## TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### AMMONIA

LC 50: 0,89 mg/l/96h

#### BISABOLOL

LC 50: 10 mg/l/96h

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

LC 50: 349 mg/l/96h

#### LAURYL ALCOHOL

LC 50: 100 mg/l/96h

#### p-AMINOPHENOL

LC 50: 10 mg/l/96h

#### POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## SAFETY DATA SHEET

The HAIR Supporters SCALP & FIBER RESTORER

Date: 12/09/2016

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF014570 CI014889 The HAIR Supporters SCALP & FIBER RESTORER

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 2

#### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

H411 Toxic to aquatic life with long-lasting effects

Precautionary statement (Disposal)

# BEAUTY & BUSINESS

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P391 Collect spillage.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % ETHYLHEXYLGLYCERIN

CAS#: 70445-33-9 EINECS#: 408-080-2

Eye Dam. 1 H318 – Aquatic Chronic 3 H412 – Acute Tox. 4 H332

< 1 % LACTIC ACID

CAS#: 50-21-5 EINECS#: 200-018-0

Skin Irrit. 2 H315 – Eye Dam. 1 H318

< 1 % PHENOXYETHANOL

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

1-3 % CETRIMONIUM CHLORIDE

CAS#: 112-02-7 EINECS#: 203-928-6

Acute Tox. 3 H311 – Acute Tox. 3 H302 – Skin Corr. 1A H314 – Aquatic Tox. 1 H400 – Aquatic Chronic 1 H410 – Fattore M: 1

1-3 % MYRISTYL ALCOHOL

CAS#: 112-72-1 EINECS#: 204-000-3

Eye Irrit. 2 H319 – Aquatic Chronic 1 H410

1-3 % STEARALKONIUM CHLORIDE

CAS#: 122-19-0 EINECS#:

Acute Tox. 4 H302 – Aquatic Acute 1 H400 – Skin Irrit. 2 H315 – Eye Dam. 1 H318 – Fattore M: 1

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

# BEAUTY & BUSINESS

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	White fluid emulsion
Odour:	Characteristic
Flash point:	Not flammable
pH:	3,0 - 4,0
Density:	0,970 - 0,990 g/cc
Viscosity:	2500 - 4500 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### CETRIMONIUM CHLORIDE

LD 50 Oral rat: 2000 mg/Kg

#### ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

#### LACTIC ACID

LD 50 Oral rat: 4936 mg/Kg

#### MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

#### PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

#### STEARALKONIUM CHLORIDE

LD 50 Oral rat: 760 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### CETRIMONIUM CHLORIDE

LC 50: 1 mg/l/96h

#### ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

#### LACTIC ACID

LC 50: 130 mg/l/96h

#### PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

# BEAUTY & BUSINESS

## Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	white - cream
Odour:	characteristic
Flash point:	Not flammable
pH:	3.0 - 4.3
Density:	0.955 - 0.999 g/cc
Viscosity:	30000 - 55000 cPs
Dry 110°:	17.5 - 19.5 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

BEHENTRIMONIUM CHLORIDE

LD 50 Oral rat: 3190 mg/Kg

ETHYLHEXYLGLYCERIN

# BEAUTY & BUSINESS

LD 50 Oral rat: 2000 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BEHENTRIMONIUM CHLORIDE

LC 50: 3,5 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

LISSE DESIGN KT DETANGLING CREAM

Date: 25/07/2017

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF008975 CI009844 LISSE DESIGN KT DETANGLING CREAM

#### 1.2 Relevant identified uses

prodotto cosmetico

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Flammable liquid Cat. 3

Hazardous to the aquatic environment - chronic toxicity Cat. 3

#### 2.2 Label

Pictogram:

Signal Word

Warning

Hazard statement:

H226 Flammable liquid and vapour

H412 Harmful to aquatic life with long-lasting effects

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

Precautionary statement (Prevention)

P210 Keep away from heat/sparks/open flames/hot surfaces. — No smoking.

P233 Keep container tightly closed.

P240 Ground/bond container and receiving equipment.

P241 Use explosion-proof electrical/ventilating/lighting/ equipment.

P242 Use only non-sparking tools.

P243 Take precautionary measures against static discharge.

# BEAUTY & BUSINESS

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P370 + P378 In case of fire: Use appropriate media for extinction (see Section 5 on this label)

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % ACRYLATES/C10-30 ALKYL ACRYLATE CROSSPOLYMER

CAS#: EINECS#:

Aquatic Acute 1 H400 – Aquatic Chronic 1 H410 – Asp. Tox. 1 H304 – Flam. Liq. 2 H225 – Skin Irrit. 2 H315 – Fattore M: 1

Flam. Liq. 2 H225 – Eye Irrit. 2 H319

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

# BEAUTY & BUSINESS

## 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

## 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## SAFETY DATA SHEET

### LISSE DESIGN KT MAINTENANCE SHAMPOO

Date: 25/07/2017

Vers: 0

#### **Section 1: Identification of the substance/ mixture and of the company/undertaking**

##### **1.1 Product identifier**

PF009064 CI009941 LISSE DESIGN KT MAINTENANCE SHAMPOO

##### **1.2 Relevant identified uses**

cosmetic product

##### **1.3 Details of the supplier of the safety data sheet**

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### **1.4 Emergency telephone number**

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### **Section 2: Hazard identification**

##### **2.1 Classification of the substance/mixture according to (EC) 1272/2008**

Serious eye Damage Cat. 1

Skin irritation Cat. 2

##### **2.2 Label**

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

###### Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

###### Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

# BEAUTY & BUSINESS

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## 2.3 Additional hazards

None

## **Section 3: Composition/ information on ingredients**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White - liquid opaque
Odour:	Characteristic
Flash point:	Not flammable
pH:	5.0 - 6.0
Density:	1.025 - 1.045 g/cc
Viscosity:	4500 - 8500 cPs
Dry 110°:	28.0 - 31.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMODIMETHICONE

LD 50 Oral rat: 2000 mg/Kg

#### COCAMIDOPROPYL HYDROXYSULTAINE

LD 50 Oral rat: 2950 mg/Kg

#### COCAMIDOPROPYLAMINE OXIDE

LD 50 Oral rat: 1000 mg/Kg

#### COCO-GLUCOSIDE

LD 50 Oral rat: 2000 mg/Kg

#### DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

#### DISODIUM LAURETH SULFOSUCCINATE

LD 50 Oral rat: 2000 mg/Kg

#### ETHYLHEXYLGLYCERIN

# BEAUTY & BUSINESS

LD 50 Oral rat: 2000 mg/Kg

## LACTIC ACID

LD 50 Oral rat: 4936 mg/Kg

## PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

## SODIUM COCOYL ISETHIONATE

LD 50 Oral rat: 4330 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### COCAMIDOPROPYL HYDROXYSULTAINE

LC 50: 2,66 mg/l/96h

#### COCAMIDOPROPYLAMINE OXIDE

LC 50: 3,4 mg/l/96h

#### COCO-GLUCOSIDE

LC 50: 100 mg/l/96h

#### DISODIUM EDTA

LC 50: 320 mg/l/96h

#### ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

#### LACTIC ACID

LC 50: 130 mg/l/96h

#### PHENOXYETHANOL

LC 50: 500 mg/l/96h

#### POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

# BEAUTY & BUSINESS S.p.A.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS S.p.A.

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	COLORLESS - LIQUID OPAQUE
Odour:	CHARACTERISTIC
Flash point:	Not flammable
pH:	6.5 - 7.4
Density:	1.020 - 1.040 g/cc
Viscosity:	2500 - 3300 cPs
Dry 110°:	20.0 - 25.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS S.p.A.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **ETHYLHEXYLGLYCERIN**

LD 50 Oral rat: 2000 mg/Kg

#### **LAURETH-2**

LD 50 Oral rat: 2000 mg/Kg

#### **PHENOXYETHANOL**

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### **ETHANOLAMINE**

LC 50: 349 mg/l/96h

#### **ETHYLHEXYLGLYCERIN**

LC 50: 60,2 mg/l/96h

#### **LAURETH-2**

LC 50: 10 mg/l/96h

#### **PHENOXYETHANOL**

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## SAFETY DATA SHEET

Lisse Design Keratin Therapy - Smoothing fluid Mousse Maker

Date: 11/06/2018

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF012474 CI009843 Lisse Design Keratin Therapy - Smoothing fluid Mousse Maker

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Hazardous to the aquatic environment - chronic toxicity Cat. 3

Skin Sensitization Cat. 1

#### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

Precautionary statement (Prevention)

# BEAUTY & BUSINESS S.p.A.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % CETRIMONIUM CHLORIDE

## SAFETY DATA SHEET

### LISSE DESIGN KERATIN THERAPY SMOOTHING FLUID

Date: 25/07/2017

Vers: 0

#### **Section 1: Identification of the substance/ mixture and of the company/undertaking**

##### **1.1 Product identifier**

PF014311 CI009843 LISSE DESIGN KERATIN THERAPY SMOOTHING FLUID

##### **1.2 Relevant identified uses**

cosmetic product

##### **1.3 Details of the supplier of the safety data sheet**

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### **1.4 Emergency telephone number**

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### **Section 2: Hazard identification**

##### **2.1 Classification of the substance/mixture according to (EC) 1272/2008**

Serious eye Damage Cat. 1

Hazardous to the aquatic environment - chronic toxicity Cat. 3

Skin Sensitization Cat. 1

##### **2.2 Label**

Pictogram:

Signal Word

Danger

Hazard statement:

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

# BEAUTY & BUSINESS

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % CETRIMONIUM CHLORIDE

CAS#: 112-02-7 EINECS#: 203-928-6

Acute Tox. 3 H311 – Acute Tox. 3 H302 – Skin Corr. 1A H314 – Aquatic Tox. 1 H400 – Aquatic Chronic 1 H410 – Fattore M: 1

< 1 % DISODIUM EDTA

CAS#: 139-33-3 EINECS#:

Acute Tox. 4 H332 – STOT RE 2 H373

< 1 % GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE

CAS#: 65497-29-2 EINECS#:

Aquatic Acute 1 H400 – Aquatic Chronic 1 H410 – Fattore M: 1

16-20 % GLYOXYLIC ACID

CAS#: 298-12-4 EINECS#: 206-058-5

Met. Corr. 1 H290 – Eye Dam. 1 H318 – Skin Sens. 1 H317

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	white - liquid opaque
Odour:	characteristic
Flash point:	Not flammable
pH:	1.2 - 2.0
Density:	1.090 - 1.105 g/cc
Dry 110°:	21.5 - 25.5 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **CETRIMONIUM CHLORIDE**

LD 50 Oral rat: 2000 mg/Kg

#### **DISODIUM EDTA**

LD 50 Oral rat: 2000 mg/Kg

# BEAUTY & BUSINESS

## GLYOXYLIC ACID

LD 50 Oral rat: 2528 mg/Kg

### **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

#### **12.1 Toxicity**

##### CETRIMONIUM CHLORIDE

LC 50: 1 mg/l/96h

##### DISODIUM EDTA

LC 50: 320 mg/l/96h

##### GLYOXYLIC ACID

LC 50: 200 mg/l/96h

#### **12.2 Persistence**

No data available.

#### **12.3 Bioaccumulative potential**

No data available.

#### **12.4 Motility in soil**

No data available.

#### **12.5 Results of PBT e vPvB assessment**

No data available.

#### **12.6 Other adverse effects**

No data available.

### **Section 13: Disposal considerations**

#### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

### **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

### **Section 15: Regulatory information**

#### Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### **Evaluation of chemical security**

No data available

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

CETEARETH-20

LD 50 Oral rat: 5000 mg/Kg

HYDROGEN PEROXIDE

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 1193 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

CETEARETH-20

LC 50: 100 mg/l/96h

HYDROGEN PEROXIDE

LC 50: 16,4 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#: Not dangerous

Proper shipping name: Not dangerous

Class: Not dangerous

Packaging group: Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### Evaluation of chemical security

No data available

## **Section 16: Other informations**

# BEAUTY & BUSINESS S.p.A.

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.  
The user must verify the suitability and completeness of such information, in relation to the particular use intended.  
This safety data sheet cancels and replaces any previous releases of the same.

### **Section 1: Identification of the substance/ mixture and of the company/undertaking**

#### **1.1 Product identifier**

PF005925 CI007852 Oxid'o 30 volumi

#### **1.2 Relevant identified uses**

cosmetic product

#### **1.3 Details of the supplier of the safety data sheet**

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

#### **1.4 Emergency telephone number**

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

### **Section 2: Hazard identification**

#### **2.1 Classification of the substance/mixture according to (EC) 1272/2008**

Skin Corrosion Cat. 1A/1B/1C  
Serious eye Damage Cat. 1

#### **2.2 Label**

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

H314 Causes severe skin burns and eye damage  
H318 Causes serious eye damage

##### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

##### Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.  
P264 Wash hands and other skin areas exposed to material thoroughly after handling.  
P280 Wear protective gloves/protective clothing/eye protection/face protection

##### Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

# BEAUTY & BUSINESS S.p.A.

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % CETEARETH-20

CAS#: 68439-49-6 EINECS#:

Acute Tox. 3 H302 – Eye Dam. 1 H318

< 1 % SODIUM STANNATE

CAS#: 12058-66-1 EINECS#: 235-030-5

Eye Irrit. 2 H319 – STOT SE 3 H335 – Skin Irrit. 2 H315

7-10 % HYDROGEN PEROXIDE

CAS#: 7722-84-1 EINECS#: 231-765-0

Acute Tox. 4 H332 – Acute Tox. 4 H302 – Skin Corr. 1A H314 – Aquatic Chronic 3 H412

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS S.p.A.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS S.p.A.

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	2.2 - 3.2
Density:	1.010 - 1.030 g/cc
Viscosity:	4000 - 7000 cPs
Dry 110°:	3.0 - 4.5 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

# BEAUTY & BUSINESS

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White - Cream
Odour:	Odourless
Flash point:	Not flammable
pH:	2.2 - 3.2
Density:	0.995 - 1.015 g/cc
Viscosity:	4000 - 7000 cPs
Dry 110°:	3.0 - 4.5 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### CETEARETH-20

LD 50 Oral rat: 5000 mg/Kg

#### HYDROGEN PEROXIDE

LD 50 Oral rat: 1193 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### CETEARETH-20

# BEAUTY & BUSINESS

LC 50: 100 mg/l/96h

HYDROGEN PEROXIDE

LC 50: 16,4 mg/l/96h

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

OXID'O 20 VOLUMI

Date: 25/07/2017

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF011592 CI011983 OXID'O 20 VOLUMI

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

#### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H314 Causes severe skin burns and eye damage

H318 Causes serious eye damage

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

# BEAUTY & BUSINESS

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % CETEARETH-20

CAS#: 68439-49-6 EINECS#:

Acute Tox. 3 H302 – Eye Dam. 1 H318

< 1 % SODIUM STANNATE

CAS#: 12058-66-1 EINECS#: 235-030-5

Eye Irrit. 2 H319 – STOT SE 3 H335 – Skin Irrit. 2 H315

5-7 % HYDROGEN PEROXIDE

CAS#: 7722-84-1 EINECS#: 231-765-0

Acute Tox. 4 H332 – Acute Tox. 4 H302 – Skin Corr. 1A H314 – Aquatic Chronic 3 H412

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

# BEAUTY & BUSINESS

## 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

## 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

# BEAUTY & BUSINESS

## 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

## 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

# BEAUTY & BUSINESS

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White - Cream
Odour:	Odourless
Flash point:	Not flammable
pH:	2.2 - 3.2
Density:	1.020 - 1.040 g/cc
Viscosity:	4000 - 7000 cPs
Dry 110°:	3.0 - 4.5 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### CETEARETH-20

LD 50 Oral rat: 5000 mg/Kg

#### HYDROGEN PEROXIDE

LD 50 Oral rat: 1193 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### CETEARETH-20

## SAFETY DATA SHEET

### PIGMENTS Nutritive Shampoo Shampoo to Amplify Reflections

Date: 16/09/2016

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF014096 CI014223 PIGMENTS Nutritive Shampoo Shampoo to Amplify Reflections

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

Hazardous to the aquatic environment - chronic toxicity Cat. 3

##### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

EUH208 Contains ALPHA-ISOMETHYL IONONE , HEXYL CINNAMAL , may produce an allergic reaction

H315 Causes skin irritation

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

Precautionary statement (Prevention)

# BEAUTY & BUSINESS

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	light yellow hazy fluid gel
Odour:	Characteristic
Flash point:	Not flammable
pH:	5,0 - 6,0
Density:	1,020 - 1,040 g/cc
Viscosity:	2000 - 3000 cPs
Dry 110°:	27,0 32,0 %

# BEAUTY & BUSINESS

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **CETRIMONIUM CHLORIDE**

LD 50 Oral rat: 2000 mg/Kg

#### **CITRIC ACID**

LD 50 Oral rat: 5400 mg/Kg

#### **COCAMIDOPROPYL BETAINE**

LD 50 Oral rat: 2335 mg/Kg

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	white consistent cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	3,5 - 4,5
Density:	0,970 - 0.990 g/cc
Viscosity:	35000 - 45000 cPs
Dry 110°:	10,0 - 15,0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

BEHENTRIMONIUM CHLORIDE

LD 50 Oral rat: 3190 mg/Kg

CETRIMONIUM CHLORIDE

# BEAUTY & BUSINESS

LD 50 Oral rat: 2000 mg/Kg

ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

QUATERNIUM-87

LD 50 Oral rat: 2000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BEHENTRIMONIUM CHLORIDE

LC 50: 3,5 mg/l/96h

CETRIMONIUM CHLORIDE

LC 50: 1 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#: Not Dangerous

Proper shipping name: Not Dangerous

Class: Not Dangerous

Packaging group: Not Dangerous

# BEAUTY & BUSINESS

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

## Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	white consistent cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	3,5 - 4,5
Density:	0,970 - 0.990 g/cc
Viscosity:	30000 - 40000 cPs
Dry 110°:	12,0 18,0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

# BEAUTY & BUSINESS

## BEHENTRIMONIUM CHLORIDE

LD 50 Oral rat: 3190 mg/Kg

## CETRIMONIUM CHLORIDE

LD 50 Oral rat: 2000 mg/Kg

## ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

## PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

### **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

#### **12.1 Toxicity**

##### BEHENTRIMONIUM CHLORIDE

LC 50: 3,5 mg/l/96h

##### CETRIMONIUM CHLORIDE

LC 50: 1 mg/l/96h

##### ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

##### PHENOXYETHANOL

LC 50: 500 mg/l/96h

#### **12.2 Persistence**

No data available.

#### **12.3 Bioaccumulative potential**

No data available.

#### **12.4 Motility in soil**

No data available.

#### **12.5 Results of PBT e vPvB assessment**

No data available.

#### **12.6 Other adverse effects**

No data available.

### **Section 13: Disposal considerations**

#### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

### **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

PIGMENTS Ultra Concentrated Pure Pigment .6 Red 90ml

Date: 15/03/2016

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF014101 CI014215 PIGMENTS Ultra Concentrated Pure Pigment .6 Red 90ml

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

#### 2.2 Label

#### 2.3 Additional hazards

None

### Section 3: Composition/ information on ingredients

#### 3.1 Substances:

Not applicable

#### 3.2 Mixture:

< 1 % BASIC YELLOW 87

CAS#: 68259-00-7 EINECS#: 269-503-2

Acute Tox. 4 H302 – Aquatic Chronic 2 H411

< 1 % COCAMIDOPROPYL BETAINE

CAS#: 61789-40-0 EINECS#: 263-058-8

Eye Dam. 1 H318 – Aquatic Chronic 3 H412

< 1 % ETHYLHEXYLGLYCERIN

# BEAUTY & BUSINESS

CAS#: 70445-33-9 EINECS#: 408-080-2

Eye Dam. 1 H318 – Aquatic Chronic 3 H412 – Acute Tox. 4 H332

< 1 % PHENOXYETHANOL

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

1-3 % BASIC RED 51

CAS#: 77061-58-6 EINECS#: 278-601-4

Acute Tox. 4 H302 – Eye Irrit. 2 H319

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

# BEAUTY & BUSINESS

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.  
Avoid contact and inhalation of vapours. See also paragraph 8.  
When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	FLUID GEL RED
Odour:	CHARACTERISTIC
Flash point:	Not flammable

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	Fluid gel Violet
Odour:	Characteristic
Flash point:	Not flammable

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **COCAMIDOPROPYL BETAINE**

LD 50 Oral rat: 2335 mg/Kg

#### **ETHYLHEXYLGLYCERIN**

LD 50 Oral rat: 2000 mg/Kg

#### **LACTIC ACID**

LD 50 Oral rat: 4936 mg/Kg

#### **PHENOXYETHANOL**

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### **COCAMIDOPROPYL BETAINE**

LC 50: 1,1 mg/l/96h

#### **ETHYLHEXYLGLYCERIN**

LC 50: 60,2 mg/l/96h

#### **LACTIC ACID**

LC 50: 130 mg/l/96h

#### **PHENOXYETHANOL**

LC 50: 500 mg/l/96h

# BEAUTY & BUSINESS

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

PIGMENTS Ultra Concentrated Pure Pigment .35 Golden Mahogany 90ml

Date: 15/03/2016

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF014104 CI014216 PIGMENTS Ultra Concentrated Pure Pigment .35 Golden Mahogany 90ml

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

#### 2.2 Label

#### 2.3 Additional hazards

None

### Section 3: Composition/ information on ingredients

#### 3.1 Substances:

Not applicable

#### 3.2 Mixture:

< 1 % BASIC RED 51

CAS#: 77061-58-6 EINECS#: 278-601-4

Acute Tox. 4 H302 – Eye Irrit. 2 H319

< 1 % BASIC YELLOW 87

CAS#: 68259-00-7 EINECS#: 269-503-2

Acute Tox. 4 H302 – Aquatic Chronic 2 H411

< 1 % COCAMIDOPROPYL BETAINE

# BEAUTY & BUSINESS

CAS#: 61789-40-0 EINECS#: 263-058-8

Eye Dam. 1 H318 – Aquatic Chronic 3 H412

< 1 % ETHYLHEXYLGLYCERIN

CAS#: 70445-33-9 EINECS#: 408-080-2

Eye Dam. 1 H318 – Aquatic Chronic 3 H412 – Acute Tox. 4 H332

< 1 % PHENOXYETHANOL

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

# BEAUTY & BUSINESS

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	Fluid gel Brown
Odour:	Characteristic

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **BASIC YELLOW 87**

LD 50 Oral rat: 1000 mg/Kg

#### **COCAMIDOPROPYL BETAINE**

LD 50 Oral rat: 2335 mg/Kg

#### **ETHYLHEXYLGLYCERIN**

LD 50 Oral rat: 2000 mg/Kg

#### **PHENOXYETHANOL**

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### **BASIC YELLOW 87**

LC 50: 1,6 mg/l/96h

#### **COCAMIDOPROPYL BETAINE**

LC 50: 1,1 mg/l/96h

#### **ETHYLHEXYLGLYCERIN**

LC 50: 60,2 mg/l/96h

#### **PHENOXYETHANOL**

LC 50: 500 mg/l/96h

##### **2.1 Classification of the substance/mixture according to (EC) 1272/2008**

##### **2.2 Label**

##### **2.3 Additional hazards**

None

#### **Section 3: Composition/ information on ingredients**

##### **3.1 Substances:**

Not applicable

##### **3.2 Mixture:**

< 1 % BASIC YELLOW 87

CAS#: 68259-00-7 EINECS#: 269-503-2

Acute Tox. 4 H302 – Aquatic Chronic 2 H411

< 1 % COCAMIDOPROPYL BETAINE

CAS#: 61789-40-0 EINECS#: 263-058-8

Eye Dam. 1 H318 – Aquatic Chronic 3 H412

# BEAUTY & BUSINESS S.p.A.

< 1 % ETHYLHEXYLGLYCERIN

CAS#: 70445-33-9 EINECS#: 408-080-2

Eye Dam. 1 H318 – Aquatic Chronic 3 H412 – Acute Tox. 4 H332

< 1 % PHENOXYETHANOL

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Dark brown fluid gel
Odour:	Characteristic
Flash point:	Not flammable
pH:	3,5 - 4,5
Density:	0.990 - 1,010 g/cc
Viscosity:	2500 - 3500 cPs
Dry 110°:	1,5 - 2,00 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

BASIC YELLOW 87

LD 50 Oral rat: 1000 mg/Kg

ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BASIC YELLOW 87

LC 50: 1,6 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

# BEAUTY & BUSINESS S.p.A.

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### **Inhalation**

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### **Skin contact**

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### **Eye contact**

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### **Ingestion**

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS S.p.A.

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	8.5 - 9.5
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2,4-DIAMINOPHENOXYETHANOL HCl

LD 50 Oral rat: 1113 mg/Kg

4-CHLORORESORCINOL

LD 50 Oral rat: 369 mg/Kg

BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

# BEAUTY & BUSINESS

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

3-5 % ETHANOLAMINE

CAS#: 141-43-5 EINECS#: 205-483-3

Acute Tox. 4 H312 – Acute Tox. 4 H332 – STOT SE 3 H335 – Skin Corr. 1A H314 – Aquatic Acute 3 H412

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	8.5 - 9.5
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **4-CHLORORESORCINOL**

LD 50 Oral rat: 369 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **m-AMINOPHENOL**

LD 50 Oral rat: 924 mg/Kg

#### **SODIUM LAURETH SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURYL SULFATE**

# BEAUTY & BUSINESS

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BISABOLOL

LC 50: 10 mg/l/96h

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **4-CHLORORESORCINOL**

LD 50 Oral rat: 369 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **m-AMINOPHENOL**

# BEAUTY & BUSINESS

LD 50 Oral rat: 924 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

m-AMINOPHENOL

LC 50: 1,1 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

Acute Tox. 4 H312 – Acute Tox. 4 H332 – STOT SE 3 H335 – Skin Corr. 1A H314 – Aquatic Acute 3 H412

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect: Beige - Ivory - Cream

Odour: Characteristic

Flash point: Not flammable

pH: 10.0 - 11.0

# BEAUTY & BUSINESS

Viscosity: 50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **4-CHLORORESORCINOL**

LD 50 Oral rat: 369 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURETH SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURYL SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

# BEAUTY & BUSINESS

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

### **4.1 Description of first aid measures**

#### **Inhalation**

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### **Skin contact**

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### **Eye contact**

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### **Ingestion**

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect: Beige - Ivory - Cream

Odour: Characteristic

Flash point: Not flammable

pH: 10.0 - 11.0

# BEAUTY & BUSINESS

Viscosity: 50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **4-CHLORORESORCINOL**

LD 50 Oral rat: 369 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **SODIUM LAURETH SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURYL SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

Acute Tox. 4 H312 – Acute Tox. 4 H332 – STOT SE 3 H335 – Skin Corr. 1A H314 – Aquatic Acute 3 H412

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **4-CHLORORESORCINOL**

LD 50 Oral rat: 369 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **m-AMINOPHENOL**

# BEAUTY & BUSINESS

LD 50 Oral rat: 924 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

m-AMINOPHENOL

LC 50: 1,1 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

##### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS

## Precautionary statement (Prevention)

- P260 Do not breathe dust/fume/gas/mist/vapours/spray.
- P261 Avoid breathing dust/fume/gas/mist/vapours/spray.
- P264 Wash hands and other skin areas exposed to material thoroughly after handling.
- P272 Contaminated work clothing should not be allowed out of the workplace.
- P273 Avoid release to the environment.
- P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

- P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting
- P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower
- P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
- P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- P310 Immediately call a POISON CENTER or doctor/physician.
- P321 Specific treatment (see Section 4 on this label).
- P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

- P405 Store locked up

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Ivory - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **4-CHLORORESORCINOL**

LD 50 Oral rat: 369 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURETH SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURYL SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

# BEAUTY & BUSINESS

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

# BEAUTY & BUSINESS

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Light yellow - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **SODIUM LAURETH SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURYL SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

#### 1.1 Product identifier

PF015520 CI015741 PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 9.13

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

Hazardous to the aquatic environment - chronic toxicity Cat. 3

#### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H314 Causes severe skin burns and eye damage

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

# BEAUTY & BUSINESS

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Light yellow - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **4-CHLORORESORCINOL**

LD 50 Oral rat: 369 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **p-AMINOPHENOL**

# BEAUTY & BUSINESS

LD 50 Oral rat: 2000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

p-AMINOPHENOL

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

# BEAUTY & BUSINESS

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Light yellow - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **SODIUM LAURETH SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURYL SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### **BISABOLOL**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Caramel - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### 4-CHLORORESORCINOL

LD 50 Oral rat: 369 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

#### m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

#### p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

#### SODIUM LAURETH SULFATE

# BEAUTY & BUSINESS

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Caramel - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2-AMINO-3-HYDROXYPYRIDINE

LD 50 Oral rat: 500 mg/Kg

4-CHLORORESORCINOL

LD 50 Oral rat: 369 mg/Kg

BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

SODIUM LAURETH SULFATE

# BEAUTY & BUSINESS

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF015528 CI015749 PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 8.32

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

Hazardous to the aquatic environment - chronic toxicity Cat. 3

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

EUH208 Contains TOLUENE-2,5-DIAMINE SULFATE , may produce an allergic reaction

H314 Causes severe skin burns and eye damage

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

##### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

##### Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

# BEAUTY & BUSINESS

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

# BEAUTY & BUSINESS

## 5.3 Advice for fire-fighters

Avoid breathing fumes.  
Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.  
If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.  
If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.  
Avoid contact and inhalation of vapours. See also paragraph 8.  
When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.  
At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

# BEAUTY & BUSINESS

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Caramel - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-AMINO-3-HYDROXYPYRIDINE

LD 50 Oral rat: 500 mg/Kg

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### 4-CHLORORESORCINOL

LD 50 Oral rat: 369 mg/Kg

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Caramel - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2-AMINO-3-HYDROXYPYRIDINE

LD 50 Oral rat: 500 mg/Kg

2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

4-CHLORORESORCINOL

LD 50 Oral rat: 369 mg/Kg

BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Caramel - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-AMINO-3-HYDROXYPYRIDINE**

LD 50 Oral rat: 500 mg/Kg

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **4-CHLORORESORCINOL**

LD 50 Oral rat: 369 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

# BEAUTY & BUSINESS

LD 50 Oral rat: 5000 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Grey hazelnut - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0

# BEAUTY & BUSINESS

Viscosity: 50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **4-CHLORORESORCINOL**

LD 50 Oral rat: 369 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **SODIUM LAURETH SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURYL SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF015536 CI015757 PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 8.01

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

Hazardous to the aquatic environment - chronic toxicity Cat. 3

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

EUH208 Contains TOLUENE-2,5-DIAMINE SULFATE , may produce an allergic reaction

H314 Causes severe skin burns and eye damage

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

##### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

##### Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

# BEAUTY & BUSINESS

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

# BEAUTY & BUSINESS

Handle in accordance with good industrial hygiene and safety practice.  
Avoid contact and inhalation of vapours. See also paragraph 8.  
When using do not eat or drink.

## **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Grey hazelnut - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

# BEAUTY & BUSINESS

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

2,4-DIAMINOPHENOXETHANOL HCl

LD 50 Oral rat: 1113 mg/Kg

4-CHLORORESORCINOL

LD 50 Oral rat: 369 mg/Kg

BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

LC 50: 100 mg/l/96h

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Grey hazelnut - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### 4-CHLORORESORCINOL

LD 50 Oral rat: 369 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### BISABOLOL

LC 50: 10 mg/l/96h

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3267
Proper shipping name:	CORROSIVE LIQUID, BASIC ORGANIC, N.O.S. (Ethanolamine)
Class:	8
Packaging group:	II

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Grey hazelnut - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### 4-CHLORORESORCINOL

LD 50 Oral rat: 369 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### BISABOLOL

LC 50: 10 mg/l/96h

#### EDTA

LC 50: 100 mg/l/96h

#### ETHANOLAMINE

LC 50: 100 mg/l/96h

## SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3267
Proper shipping name:	CORROSIVE LIQUID, BASIC ORGANIC, N.O.S. (Ethanolamine)
Class:	8
Packaging group:	II

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF015542 CI015763 PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 10.1

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

EUH208 Contains TOLUENE-2,5-DIAMINE SULFATE, may produce an allergic reaction

H314 Causes severe skin burns and eye damage

H318 Causes serious eye damage

##### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

##### Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

##### Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

# BEAUTY & BUSINESS

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

# BEAUTY & BUSINESS

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Grey Hazelnut - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	8.5 - 9.5
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

2,4-DIAMINOPHENOXYETHANOL HCl

LD 50 Oral rat: 1113 mg/Kg

BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

m-AMINOPHENOL

LD 50 Oral rat: 924 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

# BEAUTY & BUSINESS

LD 50 Oral rat: 102 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

m-AMINOPHENOL

LC 50: 1,1 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3267
Proper shipping name:	CORROSIVE LIQUID, BASIC ORGANIC, N.O.S. (Ethanolamine)
Class:	8
Packaging group:	II

## SAFETY DATA SHEET

PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 7.21

Date: 09/09/2017

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF015544 CI015765 PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 7.21

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

EUH208 Contains TOLUENE-2,5-DIAMINE SULFATE, may produce an allergic reaction

H314 Causes severe skin burns and eye damage

H318 Causes serious eye damage

##### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

##### Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

##### Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

# BEAUTY & BUSINESS

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

# BEAUTY & BUSINESS

Handle in accordance with good industrial hygiene and safety practice.  
Avoid contact and inhalation of vapours. See also paragraph 8.  
When using do not eat or drink.

## **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Grey hazelnut - Cream

## SAFETY DATA SHEET

PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 9.21

Date: 09/09/2017

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF015546 CI015767 PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 9.21

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

EUH208 Contains TOLUENE-2,5-DIAMINE SULFATE, may produce an allergic reaction

H314 Causes severe skin burns and eye damage

H318 Causes serious eye damage

##### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

##### Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

##### Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

# BEAUTY & BUSINESS

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

# BEAUTY & BUSINESS

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Grey hazelnut - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

# BEAUTY & BUSINESS

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

EDTA

LD 50 Oral rat: 2000 mg/Kg

ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

Hazardous to the aquatic environment - chronic toxicity Cat. 3

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

EUH208 Contains TOLUENE-2,5-DIAMINE SULFATE , may produce an allergic reaction

H314 Causes severe skin burns and eye damage

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

###### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

###### Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P273 Avoid release to the environment.

# BEAUTY & BUSINESS

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

# BEAUTY & BUSINESS

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Salmon pink - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0

# BEAUTY & BUSINESS

Viscosity: 50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **2-AMINO-3-HYDROXYPYRIDINE**

LD 50 Oral rat: 500 mg/Kg

#### **2-METHYLRESORCINOL**

LD 50 Oral rat: 200 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **p-AMINOPHENOL**

LD 50 Oral rat: 2000 mg/Kg

#### **SODIUM LAURETH SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM LAURYL SULFATE**

LD 50 Oral rat: 5000 mg/Kg

#### **TOLUENE-2,5-DIAMINE SULFATE**

LD 50 Oral rat: 102 mg/Kg

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

Hazardous to the aquatic environment - chronic toxicity Cat. 3

Skin Sensitization Cat. 1

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

EUH208 Contains 2,4-DIAMINOPHENOXYETHANOL HCl, TOLUENE-2,5-DIAMINE SULFATE, may produce an allergic reaction

H314 Causes severe skin burns and eye damage

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

##### Precautionary statement (Disposal)

# BEAUTY & BUSINESS

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

# BEAUTY & BUSINESS

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Salmon pink - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE**

LD 50 Oral rat: 2000 mg/Kg

#### **2,4-DIAMINOPHENOXYETHANOL HCl**

LD 50 Oral rat: 1113 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

#### **EDTA**

LD 50 Oral rat: 2000 mg/Kg

#### **ERYTHORBIC ACID**

LD 50 Oral rat: 18000 mg/Kg

#### **ETHANOLAMINE**

LD 50 Oral rat: 1515 mg/Kg

#### **LAURETH-3**

LD 50 Oral rat: 5000 mg/Kg

#### **m-AMINOPHENOL**

# BEAUTY & BUSINESS

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	3267
Proper shipping name:	CORROSIVE LIQUID, BASIC ORGANIC, N.O.S. (Ethanolamine)
Class:	8
Packaging group:	II

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 6.66

Date: 09/09/2017

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF015552 CI015773 PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 6.66

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

Hazardous to the aquatic environment - chronic toxicity Cat. 3

Skin Sensitization Cat. 1

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

H314 Causes severe skin burns and eye damage

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

##### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS

## Precautionary statement (Prevention)

- P260 Do not breathe dust/fume/gas/mist/vapours/spray.
- P261 Avoid breathing dust/fume/gas/mist/vapours/spray.
- P264 Wash hands and other skin areas exposed to material thoroughly after handling.
- P272 Contaminated work clothing should not be allowed out of the workplace.
- P273 Avoid release to the environment.
- P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

- P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting
- P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower
- P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
- P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- P310 Immediately call a POISON CENTER or doctor/physician.
- P321 Specific treatment (see Section 4 on this label).
- P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

- P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Salmon pink - Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	10.0 - 11.0
Viscosity:	50000 - 100000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **1-HYDROXYETHYL 4,5-DIAMINO PYRAZOLE SULFATE**

LD 50 Oral rat: 2000 mg/Kg

#### **2-AMINO-3-HYDROXYPYRIDINE**

LD 50 Oral rat: 500 mg/Kg

#### **BISABOLOL**

LD 50 Oral rat: 5000 mg/Kg

## SAFETY DATA SHEET

PRECIOUS NATURE Extra Creamy Activator 10 vol - 3%

Date: 09/09/2017

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF015554 CI015825 PRECIOUS NATURE Extra Creamy Activator 10 vol - 3%

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1

Skin irritation Cat. 2

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

H315 Causes skin irritation

H318 Causes serious eye damage

##### Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

##### Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

# BEAUTY & BUSINESS

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

## 2.3 Additional hazards

None

## **Section 3: Composition/ information on ingredients**

### 3.1 Substances:

Not applicable

### 3.2 Mixture:

< 1 % DISODIUM EDTA

CAS#: 139-33-3 EINECS#:

Acute Tox. 4 H332 – STOT RE 2 H373

< 1 % SODIUM STANNATE

CAS#: 12058-66-1 EINECS#: 235-030-5

Eye Irrit. 2 H319 – STOT SE 3 H335 – Skin Irrit. 2 H315

3-5 % HYDROGEN PEROXIDE

CAS#: 7722-84-1 EINECS#: 231-765-0

Acute Tox. 4 H332 – Acute Tox. 4 H302 – Skin Corr. 1A H314 – Aquatic Chronic 3 H412

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

# BEAUTY & BUSINESS

## 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

## 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

# BEAUTY & BUSINESS

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	WHITE - Compact Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	2.5 - 3.3
Density:	0.920 - 0.950 g/cc
Viscosity:	15000 - 30000 cPs
Dry 110°:	27.0 - 33.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

#### HYDROGEN PEROXIDE

LD 50 Oral rat: 1193 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### DISODIUM EDTA

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

# BEAUTY & BUSINESS

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	WHITE - Compact Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	2.5 - 3.3
Density:	0.940 - 0.970 g/cc
Viscosity:	15000 - 30000 cPs
Dry 110°:	27.0 - 33.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

#### HYDROGEN PEROXIDE

LD 50 Oral rat: 1193 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### DISODIUM EDTA

# BEAUTY & BUSINESS

LC 50: 320 mg/l/96h

HYDROGEN PEROXIDE

LC 50: 16,4 mg/l/96h

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	2984
Proper shipping name:	HYDROGEN PEROXIDE, AQUEOUS SOLUTION

## SAFETY DATA SHEET

PRECIOUS NATURE Extra Creamy Activator 40 vol - 12%

Date: 09/09/2017

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF015557 CI015828 PRECIOUS NATURE Extra Creamy Activator 40 vol - 12%

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corrosion Cat. 1A/1B/1C

Serious eye Damage Cat. 1

#### 2.2 Label

##### Pictogram:

##### Signal Word

Danger

##### Hazard statement:

H314 Causes severe skin burns and eye damage

H318 Causes serious eye damage

##### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

##### Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

##### Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

# BEAUTY & BUSINESS

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % DISODIUM EDTA

CAS#: 139-33-3 EINECS#:

Acute Tox. 4 H332 – STOT RE 2 H373

< 1 % SODIUM STANNATE

CAS#: 12058-66-1 EINECS#: 235-030-5

Eye Irrit. 2 H319 – STOT SE 3 H335 – Skin Irrit. 2 H315

10-13 % HYDROGEN PEROXIDE

CAS#: 7722-84-1 EINECS#: 231-765-0

Acute Tox. 4 H332 – Acute Tox. 4 H302 – Skin Corr. 1A H314 – Aquatic Chronic 3 H412

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

# BEAUTY & BUSINESS

## 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

## 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

# BEAUTY & BUSINESS

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/or Section 11. Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

## SECTION 5: Fire fighting measures

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.  
Refer to Section 8.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.  
If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.  
If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## SECTION 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.  
Avoid contact and inhalation of vapours. See also paragraph 8.  
When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## SECTION 8: Exposure controls / personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 9: Physical and chemical properties

## SAFETY DATA SHEET

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 2015/830

### PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 6NF

Date: 01/23/2019

Vers: 0

#### SECTION 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

Product description: PRECIOUS NATURE AMMONIA-FREE PERMANENT HAIR COLOR 6NF

Product code: PF019123 - CI018063

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### SECTION 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Skin Corr. 1A/1B/1C

Eye Dam. 1

Aquatic Chronic 3

Skin Sens. 1

##### 2.2 Label according to (EC) 1272/2008

###### Pictogram:

GHS05

GHS07

###### Signal Word

Danger

###### Hazard statement:

EUH208 Contains 2-AMINO-3-HYDROXYPYRIDINE , HYDROXYETHYL-3,4-METHYLENEDIOXYANILINE HCL, may produce an allergic reaction

H314 Causes severe skin burns and eye damage

H317 May cause an allergic skin reaction

H318 Causes serious eye damage

# BEAUTY & BUSINESS

H412 Harmful to aquatic life with long-lasting effects

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P260 Do not breathe dust/fume/gas/mist/vapours/spray.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

P405 Store locked up

## 2.3 Additional hazards

None known

## SECTION 3: Composition / informations on ingredients

### 3.1 Substances:

Not applicable

### 3.2 Mixture:

< 1 % 2-METHYLRESORCINOL

CAS#: 608-25-3 EINECS#: 210-155-8

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/or Section 11. Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

## SECTION 5: Fire fighting measures

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.  
Refer to Section 8.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.  
If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.  
If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## SECTION 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.  
Avoid contact and inhalation of vapours. See also paragraph 8.  
When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## SECTION 8: Exposure controls / personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.  
At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 9: Physical and chemical properties

Aspect:	Emulsion
Colour:	Ivory to Beige
Odour:	Characteristic
Density:	> 0,935
Dry content (110 °C):	n.a.
pH:	9,70 - 11,00
Viscosity, dynamic:	50000 - 100000
Flash point:	n.d.

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

Strong acids, strong oxidants.

### 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## SECTION 11: Toxicological informations

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

# BEAUTY & BUSINESS

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## SECTION 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## SECTION 13: Disposal consideration

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## SECTION 14: Transport informations

UN#: 3267

Proper shipping name: Corrosive liquid, basic, organic, N.O.S. (Ethanolamine)

Class: 8

# BEAUTY & BUSINESS

Packaging group: II

## SECTION 15: Regulatory informations

### 15.1 Regulations

Regulation (EC) 1907/2006 (REACH) and following amendments

Regulation (EC) 1272/2008 (CLP) and following amendments

Regulation (EC) 1223/2009 (Cosmetic Regulation) and following amendments

In the EU, finished cosmetic products are exempted from any obligation of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)].

### 15.2 Evaluation of chemical security

No data available

## SECTION 16: Other informations

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

According to Regulation (EC) N° 1907/2006 (REACH) with its amendment Regulation (EC) N° 2015/830

Sources of Key Data:

Regulation (EC) N° 1272/2008 and Regulation (EC) N° 1907/2006, with following amendments

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/or Section 11. Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

## SECTION 5: Fire fighting measures

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.  
Refer to Section 8.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.  
If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.  
If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## SECTION 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.  
Avoid contact and inhalation of vapours. See also paragraph 8.  
When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## SECTION 8: Exposure controls / personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.  
At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 9: Physical and chemical properties

Aspect:	Emulsion
Colour:	Ivory to Beige
Odour:	Characteristic
Density:	> 0,935
Dry content (110 °C):	n.a.
pH:	9,70 - 11,00
Viscosity, dynamic:	50000 - 100000
Flash point:	n.d.

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

Strong acids, strong oxidants.

### 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## SECTION 11: Toxicological informations

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

# BEAUTY & BUSINESS

LD 50 Oral rat: 5000 mg/Kg

p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

## SECTION 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

BISABOLOL

LC 50: 10 mg/l/96h

EDTA

LC 50: 100 mg/l/96h

ETHANOLAMINE

LC 50: 349 mg/l/96h

LAURETH-3

LC 50: 10 mg/l/96h

p-AMINOPHENOL

LC 50: 10 mg/l/96h

SODIUM LAURETH SULFATE

LC 50: 100 mg/l/96h

SODIUM LAURYL SULFATE

LC 50: 100 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## SECTION 13: Disposal consideration

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

# BEAUTY & BUSINESS

## SECTION 14: Transport informations

UN#:	3267
Proper shipping name:	Corrosive liquid, basic. Organic, N.O.S. (Ethanolamine)
Class:	8
Packaging group:	II

## SECTION 15: Regulatory informations

### 15.1 Regulations

Regulation (EC) 1907/2006 (REACH) and following amendments

Regulation (EC) 1272/2008 (CLP) and following amendments

Regulation (EC) 1223/2009 (Cosmetic Regulation) and following amendments

In the EU, finished cosmetic products are exempted from any obligation of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)].

### 15.2 Evaluation of chemical security

No data available

## SECTION 16: Other informations

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

According to Regulation (EC) N° 1907/2006 (REACH) with its amendment Regulation (EC) N° 2015/830

Sources of Key Data:

Regulation (EC) N° 1272/2008 and Regulation (EC) N° 1907/2006, with following amendments

Hazard statement:

EUH208 Contains 2-AMINO-3-HYDROXYPYRIDINE , TOLUENE-2,5-DIAMINE SULFATE , may produce an allergic reaction

H314 Causes severe skin burns and eye damage

H318 Causes serious eye damage

H412 Harmful to aquatic life with long-lasting effects

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

# BEAUTY & BUSINESS

## Precautionary statement (Prevention)

- P260 Do not breathe dust/fume/gas/mist/vapours/spray.
- P264 Wash hands and other skin areas exposed to material thoroughly after handling.
- P273 Avoid release to the environment.
- P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

- P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting
- P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower
- P304 + P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
- P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- P310 Immediately call a POISON CENTER or doctor/physician.
- P321 Specific treatment (see Section 4 on this label).
- P363 Wash contaminated clothing before reuse.

## Precautionary statement (Storage)

- P405 Store locked up

## 2.3 Additional hazards

None known

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/or Section 11. Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

## SECTION 5: Fire fighting measures

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

Refer to Section 8.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

# BEAUTY & BUSINESS

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## SECTION 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## SECTION 8: Exposure controls / personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 9: Physical and chemical properties

Aspect:	Emulsion
Colour:	Ivory to Beige
Odour:	Characteristic
Density:	> 0,935

# BEAUTY & BUSINESS

Dry content (110 °C):	n.a.
pH:	9,70 - 11,00
Viscosity, dynamic:	50000 - 100000
Flash point:	n.d.

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

Strong acids, strong oxidants.

### 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## SECTION 11: Toxicological informations

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### 2-METHYLRESORCINOL

LD 50 Oral rat: 200 mg/Kg

#### BISABOLOL

LD 50 Oral rat: 5000 mg/Kg

#### EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ERYTHORBIC ACID

LD 50 Oral rat: 18000 mg/Kg

#### ETHANOLAMINE

LD 50 Oral rat: 1515 mg/Kg

#### LAURETH-3

LD 50 Oral rat: 5000 mg/Kg

#### p-AMINOPHENOL

LD 50 Oral rat: 2000 mg/Kg

#### SODIUM LAURETH SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM LAURYL SULFATE

LD 50 Oral rat: 5000 mg/Kg

#### TOLUENE-2,5-DIAMINE SULFATE

LD 50 Oral rat: 102 mg/Kg

5-7 % SODIUM LAUROYL METHYL ISETHIONATE

CAS#: EINECS#:

Skin Irrit. 2 H315 – Eye Irrit. 2 H319

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

# BEAUTY & BUSINESS

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

# BEAUTY & BUSINESS

## Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Yellow - Clear Liquid
Odour:	Characteristic
Flash point:	Not flammable
pH:	6.5 - 7.0
Density:	1.020 - 1.040 g/cc
Viscosity:	1000 - 1600 cPs
Dry 110°:	18.8 - 20.8 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

# BEAUTY & BUSINESS

## ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

## PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## QUATERNIUM-52

LD 50 Oral rat: 2000 mg/Kg

## SODIUM COCOAMPHOACETATE

LD 50 Oral rat: 2000 mg/Kg

## SODIUM LAUROYL METHYL ISETHIONATE

LD 50 Oral rat: 1000 mg/Kg

### **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

#### **12.1 Toxicity**

##### DISODIUM EDTA

LC 50: 320 mg/l/96h

##### ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

##### PHENOXYETHANOL

LC 50: 500 mg/l/96h

##### QUATERNIUM-52

LC 50: 10 mg/l/96h

##### SODIUM COCOAMPHOACETATE

LC 50: 100 mg/l/96h

##### SODIUM LAUROYL METHYL ISETHIONATE

LC 50: 257,86 mg/l/96h

#### **12.2 Persistence**

No data available.

#### **12.3 Bioaccumulative potential**

No data available.

#### **12.4 Motility in soil**

No data available.

#### **12.5 Results of PBT e vPvB assessment**

No data available.

#### **12.6 Other adverse effects**

No data available.

### **Section 13: Disposal considerations**

#### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige - Opaque Shampoo
Odour:	Characteristic
Flash point:	Not flammable
pH:	5.0 - 6.0
Density:	1.025 - 1.045 g/cc
Viscosity:	3500 - 5500 cPs
Dry 110°:	20.0 - 23.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

COCAMIDOPROPYLAMINE OXIDE

LD 50 Oral rat: 1000 mg/Kg

COCO-GLUCOSIDE

LD 50 Oral rat: 2000 mg/Kg

DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

DISODIUM LAURETH SULFOSUCCINATE

LD 50 Oral rat: 2000 mg/Kg

ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

LACTIC ACID

LD 50 Oral rat: 4936 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

SODIUM COCOYL ISETHIONATE

LD 50 Oral rat: 4330 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

COCAMIDOPROPYLAMINE OXIDE

LC 50: 3,4 mg/l/96h

COCO-GLUCOSIDE

LC 50: 100 mg/l/96h

DISODIUM EDTA

LC 50: 320 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

LACTIC ACID

LC 50: 130 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Eye irritation Cat. 2

##### 2.2 Label

Pictogram:

Signal Word

Warning

Hazard statement:

H319 Causes serious eye irritation

Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

Precautionary statement (Response)

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P337 + P313 If eye irritation persists: Get medical advice/attention.

##### 2.3 Additional hazards

None

#### Section 3: Composition/ information on ingredients

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

# BEAUTY & BUSINESS

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White - Gel Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	3.6 - 4.6
Density:	0.990 - 1.010 g/cc
Viscosity:	20000 - 30000 cPs
Dry 110°:	13.0 - 16.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

BEHENTRIMONIUM CHLORIDE

LD 50 Oral rat: 3190 mg/Kg

DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

QUATERNIUM-87

LD 50 Oral rat: 2000 mg/Kg

# BEAUTY & BUSINESS

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BEHENTRIMONIUM CHLORIDE

LC 50: 3,5 mg/l/96h

DISODIUM EDTA

LC 50: 320 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

Skin Irrit. 2 H315 – Eye Dam. 1 H318 – STOT RE 2 H373 – Aquatic Acute 1 H400 – Aquatic Chronic 2 H411 – Fattore M: 1

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White - Fluid Cream
Odour:	Characterist
Flash point:	Not flammable
pH:	4.5 - 5.5
Density:	0.990 - 1.010 g/cc
Dry 110°:	4.9 - 6.9 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

BEHENTRIMONIUM CHLORIDE

LD 50 Oral rat: 3190 mg/Kg

Eye Irrit. 2 H319 – Skin Irrit. 2 H315

5-7 % SODIUM C14-16 OLEFIN SULFONATE

CAS#: 68439-57-6 EINECS#: 270-407-8

Eye Irrit. 2 H315 – Eye Irrit. 2 H319 – Aquatic Chronic 1 H411

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

# BEAUTY & BUSINESS

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory - Thick Opaque Liquid
Odour:	Characteristic
Flash point:	Not flammable
pH:	5.3 - 5.8

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

#### DISODIUM LAURETH SULFOSUCCINATE

LD 50 Oral rat: 2000 mg/Kg

#### ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

#### LACTIC ACID

LD 50 Oral rat: 4936 mg/Kg

#### LAURETH-2

LD 50 Oral rat: 2000 mg/Kg

#### PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

#### SODIUM C14-16 OLEFIN SULFONATE

LD 50 Oral rat: 2310 mg/Kg

#### SODIUM COCOAMPHOACETATE

LD 50 Oral rat: 2000 mg/Kg

#### TRIDECETH-2 CARBOXAMIDE MEA

LD 50 Oral rat: 2000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### DISODIUM EDTA

LC 50: 320 mg/l/96h

#### ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

# BEAUTY & BUSINESS

## LACTIC ACID

LC 50: 130 mg/l/96h

## LAURETH-2

LC 50: 10 mg/l/96h

## PHENOXYETHANOL

LC 50: 500 mg/l/96h

## SODIUM C14-16 OLEFIN SULFONATE

LC 50: 2564 mg/l/96h

## SODIUM COCOAMPHOACETATE

LC 50: 100 mg/l/96h

## TRIDECETH-2 CARBOXAMIDE MEA

LC 50: 0,93 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

### Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

#### PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

#### QUATERNIUM-87

LD 50 Oral rat: 2000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### BEHENTRIMONIUM METHOSULFATE

LC 50: 96 mg/l/96h

#### ETHYLHEXYLGLYCERIN

# BEAUTY & BUSINESS

LC 50: 60,2 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

# BEAUTY & BUSINESS

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White - Thick Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	3.0 - 4.0
Density:	0.980 - 1.000 g/cc
Viscosity:	25000 - 40000 cPs
Dry 110°:	9.7 - 11.7 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	dense red gel
Odour:	characteristic
Flash point:	Not flammable
pH:	2.5 to 3.5
Density:	0.990 to 1.010 g/cc
Viscosity:	15000.0 to 25000.0 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### **BASIC RED 51**

LD 50 Oral rat: 1000 mg/Kg

#### **LACTIC ACID**

LD 50 Oral rat: 4936 mg/Kg

#### **LAURYL ALCOHOL**

LD 50 Oral rat: 5000 mg/Kg

#### **SODIUM DEHYDROACETATE**

LD 50 Oral rat: 500 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### **LACTIC ACID**

LC 50: 130 mg/l/96h

# BEAUTY & BUSINESS

## LAURYL ALCOHOL

LC 50: 100 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

REVOLUTION JC DEEP RED

Date: 23/12/2016

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

CI005161 REVOLUTION JC DEEP RED

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Eye irritation Cat. 2

Skin Sensitization Cat. 1

#### 2.2 Label

Pictogram:

Signal Word

Warning

Hazard statement:

H317 May cause an allergic skin reaction

H319 Causes serious eye irritation

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P280 Wear protective gloves/protective clothing/eye protection/face protection

Precautionary statement (Response)

# BEAUTY & BUSINESS

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P321 Specific treatment (see Section 4 on this label).

P337 + P313 If eye irritation persists: Get medical advice/attention.

P363 Wash contaminated clothing before reuse.

## 2.3 Additional hazards

None

## **Section 3: Composition/ information on ingredients**

### 3.1 Substances:

Not applicable

### 3.2 Mixture:

< 1 % 3-NITRO-p-HYDROXYETHYLAMINOPHENOL

CAS#: 65235-31-6 EINECS#:

Acute Tox. 4 H302 – Skin Irrit. 2 H315 – Skin Sens. 1A H317 – Eye Irrit. 2 H319 – Aquatic Chronic 2 H411

< 1 % LACTIC ACID

CAS#: 50-21-5 EINECS#: 200-018-0

Skin Irrit. 2 H315 – Eye Dam. 1 H318

< 1 % SODIUM DEHYDROACETATE

CAS#: 4418-26-2 EINECS#: 224-580-1

Acute Tox. 4 H302

1-3 % CETEARETH-30

CAS#: 68439-49-6 EINECS#:

Acute Tox. 3 H302 – Eye Irrit. 1 H318

1-3 % LAURYL ALCOHOL

CAS#: 112-53-8 EINECS#: 203-982-0

Eye Irrit. 2 H319 – Aquatic Chronic 2 H411 – Aquatic Acute 1 H400 – Fattore M: 1

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	dense red gel
Odour:	characteristic
Flash point:	Not flammable
pH:	2.5 - 3.5
Density:	0.990 - 1.010 g/cc
Viscosity:	15000 - 25000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

CETEARETH-20

LD 50 Oral rat: 5000 mg/Kg

HC YELLOW NO. 2

LD 50 Oral rat: 1000 mg/Kg

IMIDAZOLIDINYL UREA

LD 50 Oral rat: 2599 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

CETEARETH-20

LC 50: 100 mg/l/96h

IMIDAZOLIDINYL UREA

LC 50: 138 mg/l/96h

# BEAUTY & BUSINESS

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

CAS#: 68439-49-6 EINECS#:

Acute Tox. 3 H302 – Eye Dam. 1 H318

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# DOBOS S.A de C.V

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

# DOBOS S.A de C.V

## **Section 9: Physical and chemical properties**

Aspect and colour	Yellow thick gel
Odour:	Characteristic
Flash point:	Not flammable
pH:	3,5 - 4,5
Density:	0,980 - 1,020 g/cc
Viscosity:	6000 - 20000 cPs
Dry 110°:	10,0 - 14,0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

CETEARETH-20

LD 50 Oral rat: 5000 mg/Kg

IMIDAZOLIDINYL UREA

LD 50 Oral rat: 2599 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

CETEARETH-20

LC 50: 100 mg/l/96h

IMIDAZOLIDINYL UREA

LC 50: 138 mg/l/96h

# DOBOS S.A de C.V

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

Acute Tox. 3 H302 – Eye Dam. 1 H318

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# DOBOS S.A de C.V

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

# DOBOS S.A de C.V

## **Section 9: Physical and chemical properties**

Aspect and colour	Green thick gel
Odour:	Characteristic
Flash point:	Not flammable
pH:	3,5 - 4,5
Density:	0,980 - 1,020 g/cc
Viscosity:	6000 - 20000 cPs
Dry 110°:	10,0 - 14,0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

CETEARETH-20

LD 50 Oral rat: 5000 mg/Kg

IMIDAZOLIDINYL UREA

LD 50 Oral rat: 2599 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

CETEARETH-20

LC 50: 100 mg/l/96h

IMIDAZOLIDINYL UREA

LC 50: 138 mg/l/96h

# DOBOS S.A de C.V

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# DOBOS S.A de C.V

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

# DOBOS S.A de C.V

## **Section 9: Physical and chemical properties**

Aspect and colour	Violet thick gel
Odour:	Characteristic
Flash point:	Not flammable
pH:	3,5 - 4,5
Density:	0,980 - 1,020 g/cc
Viscosity:	6000 - 20000 cPs
Dry 110°:	10,0 - 14,0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

CETEARETH-20

LD 50 Oral rat: 5000 mg/Kg

IMIDAZOLIDINYL UREA

LD 50 Oral rat: 2599 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

CETEARETH-20

LC 50: 100 mg/l/96h

IMIDAZOLIDINYL UREA

LC 50: 138 mg/l/96h

# DOBOS S.A de C.V

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

1-3 % CETEARETH-20

CAS#: 68439-49-6 EINECS#:

Acute Tox. 3 H302 – Eye Dam. 1 H318

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# DOBOS S.A de C.V

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

# DOBOS S.A de C.V

## **Section 9: Physical and chemical properties**

Colour and aspect:	Green - Gel
Odour:	Characteristic
Flash point:	Not flammable
pH:	3.5 - 4.5
Density:	0.980 - 1.020 g/cc
Viscosity:	6000 - 18000 cPs
Dry 110°:	9.0 - 13.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

CETEARETH-20

LD 50 Oral rat: 5000 mg/Kg

IMIDAZOLIDINYL UREA

LD 50 Oral rat: 2599 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

CETEARETH-20

LC 50: 100 mg/l/96h

IMIDAZOLIDINYL UREA

LC 50: 138 mg/l/96h

# DOBOS S.A de C.V

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

1-3 % CETEARETH-20

CAS#: 68439-49-6 EINECS#:

Acute Tox. 3 H302 – Eye Dam. 1 H318

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# DOBOS S.A de C.V

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Blue - Gel
Odour:	Characteristic
Flash point:	Not flammable
pH:	3.5 - 4.5
Density:	0.980 - 1.020 g/cc
Viscosity:	6000 - 18000 cPs
Dry 110°:	9.0 - 13.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

CETEARETH-20

LD 50 Oral rat: 5000 mg/Kg

IMIDAZOLIDINYL UREA

LD 50 Oral rat: 2599 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

CETEARETH-20

LC 50: 100 mg/l/96h

IMIDAZOLIDINYL UREA

LC 50: 138 mg/l/96h

# DOBOS S.A de C.V

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

Precautionary statement (Response)

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
P337 + P313 If eye irritation persists: Get medical advice/attention.

##### 2.3 Additional hazards

None

# DOBOS S.A de C.V

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % IMIDAZOLIDINYL UREA

CAS#: 39236-46-9 EINECS#:

Skin Sens. 1 H317

< 1 % PHENOXYETHANOL

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

1-3 % CETEARETH-20

CAS#: 68439-49-6 EINECS#:

Acute Tox. 3 H302 – Eye Dam. 1 H318

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# DOBOS S.A de C.V

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Aspect and colour	Violet thick gel
Odour:	Characteristic
Flash point:	Not flammable
pH:	3.5 - 4.5
Density:	0.990 - 1.010 g/cc
Viscosity:	15000 - 25000 cPs
Dry 110°:	9.0 - 12.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

CETEARETH-20

LD 50 Oral rat: 5000 mg/Kg

IMIDAZOLIDINYL UREA

LD 50 Oral rat: 2599 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

CETEARETH-20

LC 50: 100 mg/l/96h

IMIDAZOLIDINYL UREA

LC 50: 138 mg/l/96h

Odour:	Characteristic
Flash point:	Not flammable
pH:	5.3 - 6.3
Density:	1.000 - 1.030 g/cc
Viscosity:	2500 - 4500 cPs
Dry 110°:	27.0 - 30.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS S.p.A.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

DISODIUM LAURETH SULFOSUCCINATE

LD 50 Oral rat: 2000 mg/Kg

ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

LAURETH-2

LD 50 Oral rat: 2000 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

SODIUM C14-16 OLEFIN SULFONATE

LD 50 Oral rat: 2079 mg/Kg

SODIUM COCOAMPHOACETATE

LD 50 Oral rat: 2000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

DISODIUM EDTA

LC 50: 320 mg/l/96h

DISODIUM LAURETH SULFOSUCCINATE

LC 50: 35 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

LAURETH-2

LC 50: 10 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

SODIUM C14-16 OLEFIN SULFONATE

LC 50: 4,2 mg/l/96h

SODIUM COCOAMPHOACETATE

LC 50: 100 mg/l/96h

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

### SEMI DI LINO RECONSTRUCTION DAMAGED HAIR Reparative Mask

Date: 17/05/2018

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF016410 CI017056 SEMI DI LINO RECONSTRUCTION DAMAGED HAIR Reparative Mask

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1  
Skin irritation Cat. 2  
Hazardous to the aquatic environment - chronic toxicity Cat. 2  
Skin Sensitization Cat. 1

##### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

H315 Causes skin irritation  
H317 May cause an allergic skin reaction

# BEAUTY & BUSINESS S.p.A.

H318 Causes serious eye damage

H411 Toxic to aquatic life with long-lasting effects

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P332 + P313 If skin irritation occurs: Get medical advice/attention.

P362 Take off contaminated clothing and wash before reuse.

P363 Wash contaminated clothing before reuse.

P391 Collect spillage.

## **2.3 Additional hazards**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SAFETY DATA SHEET

### SEMI DI LINO RECONSTRUCTION DAMAGED HAIR Anti-Breakage Daily Fluid

Date: 17/05/2018

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF016412 CI017057 SEMI DI LINO RECONSTRUCTION DAMAGED HAIR Anti-Breakage Daily Fluid

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Eye irritation Cat. 2  
Hazardous to the aquatic environment - chronic toxicity Cat. 3

##### 2.2 Label

Pictogram:

Signal Word

Warning

Hazard statement:

H314 Causes skin irritation  
H319 Causes serious eye irritation  
H412 Harmful to aquatic life with long-lasting effects

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

Precautionary statement (Prevention)

P264 Wash hands and other skin areas exposed to material thoroughly after handling.  
P273 Avoid release to the environment.  
P280 Wear protective gloves/protective clothing/eye protection/face protection

Precautionary statement (Response)

# BEAUTY & BUSINESS S.p.A.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P337 + P313 If eye irritation persists: Get medical advice/attention.

## 2.3 Additional hazards

None

## Section 3: Composition/ information on ingredients

### 3.1 Substances:

Not applicable

### 3.2 Mixture:

< 1 % BEHENTRIMONIUM METHOSULFATE

CAS#: 81646-13-1 EINECS#: 279-791-1

Skin Irrit. 2 H315 – Eye Dam. 1 H318 – STOT RE 2 H373 – Aquatic Acute 1 H400 – Fattore M: 1

< 1 % CETRIMONIUM CHLORIDE

CAS#: 112-02-7 EINECS#: 203-928-6

Acute Tox. 3 H311 – Acute Tox. 3 H302 – Skin Corr. 1A H314 – Aquatic Tox. 1 H400 – Aquatic Chronic 1 H410 – Fattore M: 1

< 1 % ETHYLHEXYLGLYCERIN

CAS#: 70445-33-9 EINECS#: 408-080-2

Eye Dam. 1 H318 – Aquatic Chronic 3 H412 – Acute Tox. 4 H332

< 1 % PARFUM / FRAGRANCE

CAS#: EINECS#:

Skin Irrit. 2 H315 – Skin Sens. 1 H317 – Eye Irrit. 2 H319 – Aquatic Chronic 1 H411

< 1 % PHENOXYETHANOL

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

1-3 % AMODIMETHICONE

CAS#: 71750-80-6 ; 106842-44-8 EINECS#:

Eye Irrit. 2 H319

## Section 4: First aid measures

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS S.p.A.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS S.p.A.

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White opalescent liquid
Odour:	Characteristic
Flash point:	Not flammable
pH:	3.4 - 4.2
Density:	0.990 - 1.000 g/cc
Dry 110°:	6.30 - 8.20 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMODIMETHICONE

LD 50 Oral rat: 2000 mg/Kg

#### CETRIMONIUM CHLORIDE

LD 50 Oral rat: 2000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BEHENTRIMONIUM METHOSULFATE

LC 50: 96 mg/l/96h

CETRIMONIUM CHLORIDE

LC 50: 1 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

# BEAUTY & BUSINESS S.p.A.

## Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

## Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

Density:	0.990 - 1.010 g/cc
Dry 110°:	2.8 - 3.8 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

# BEAUTY & BUSINESS S.p.A.

Set out below is the toxicological information relating to the main substances in the preparation:

## CETRIMONIUM CHLORIDE

LD 50 Oral rat: 2000 mg/Kg

## IMIDAZOLIDINYL UREA

LD 50 Oral rat: 2599 mg/Kg

## LAURYL PYRROLIDONE

LD 50 Oral rat: 2050 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### CETRIMONIUM CHLORIDE

LC 50: 1 mg/l/96h

#### IMIDAZOLIDINYL UREA

LC 50: 138 mg/l/96h

#### LAURYL PYRROLIDONE

LC 50: 0,93 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

# BEAUTY & BUSINESS S.p.A.

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

# BEAUTY & BUSINESS S.p.A.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Ivory pearly liquid

## SAFETY DATA SHEET

### SEMI DI LINO MOISTURE DRY HAIR Nutritive Mask

Date: 17/05/2018

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF016417 CI017052 SEMI DI LINO MOISTURE DRY HAIR Nutritive Mask

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Serious eye Damage Cat. 1  
Hazardous to the aquatic environment - chronic toxicity Cat. 3  
Skin Sensitization Cat. 1

##### 2.2 Label

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H317 May cause an allergic skin reaction  
H318 Causes serious eye damage  
H412 Harmful to aquatic life with long-lasting effects

###### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

###### Precautionary statement (Prevention)

# BEAUTY & BUSINESS S.p.A.

P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White thick cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	3.8 - 4.6
Density:	0.980 - 1.000 g/cc
Viscosity:	16000 - 20000 cPs
Dry 110°:	14.5 - 16.5 %

# BEAUTY & BUSINESS S.p.A.

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMODIMETHICONE

LD 50 Oral rat: 2000 mg/Kg

#### BEHENTRIMONIUM CHLORIDE

LD 50 Oral rat: 3190 mg/Kg

#### DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

#### LACTIC ACID

LD 50 Oral rat: 4936 mg/Kg

#### PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

#### STEARAMIDOPROPYL DIMETHYLAMINE

LD 50 Oral rat: 5000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS S.p.A.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS S.p.A.

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White fluid cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	3.3 - 4.3
Density:	0.980 - 1.000 g/cc
Viscosity:	5000 - 8000 cPs
Dry 110°:	9.0 - 12.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMODIMETHICONE

LD 50 Oral rat: 2000 mg/Kg

#### BEHENTRIMONIUM CHLORIDE

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 3190 mg/Kg

ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

HEXYLENE GLYCOL

LD 50 Oral rat: 9 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BEHENTRIMONIUM CHLORIDE

LC 50: 3,5 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS S.p.A.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMODIMETHICONE

LD 50 Oral rat: 2000 mg/Kg

#### BEHENTRIMONIUM CHLORIDE

LD 50 Oral rat: 3190 mg/Kg

#### DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

#### ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

#### HEXYLENE GLYCOL

LD 50 Oral rat: 9 mg/Kg

#### PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

#### QUATERNIUM-87

LD 50 Oral rat: 2000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### BEHENTRIMONIUM CHLORIDE

LC 50: 3,5 mg/l/96h

#### DISODIUM EDTA

LC 50: 320 mg/l/96h

#### ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

#### PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

# BEAUTY & BUSINESS S.p.A.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

Acute Tox. 4 H302 – Eye Irrit. 2 H319

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

# BEAUTY & BUSINESS S.p.A.

## 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

## 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

## 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## Section 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

# BEAUTY & BUSINESS S.p.A.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS S.p.A.

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White/ ivory pearly liquid
Odour:	Characteristic
Flash point:	Not flammable
pH:	5.3 - 6.3
Density:	1.010 - 1.040 g/cc
Viscosity:	3800 - 5800 cPs
Dry 110°:	25.5 - 27.5 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

# BEAUTY & BUSINESS S.p.A.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

DISODIUM LAURETH SULFOSUCCINATE

LD 50 Oral rat: 2000 mg/Kg

ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

LAURETH-2

LD 50 Oral rat: 2000 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

SODIUM C14-16 OLEFIN SULFONATE

LD 50 Oral rat: 2079 mg/Kg

SODIUM COCOAMPHOACETATE

LD 50 Oral rat: 2000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

DISODIUM EDTA

LC 50: 320 mg/l/96h

DISODIUM LAURETH SULFOSUCCINATE

LC 50: 35 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

LAURETH-2

LC 50: 10 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

SODIUM C14-16 OLEFIN SULFONATE

LC 50: 4,2 mg/l/96h

SODIUM COCOAMPHOACETATE

LC 50: 100 mg/l/96h

# BEAUTY & BUSINESS S.p.A.

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMODIMETHICONE

LD 50 Oral rat: 2000 mg/Kg

#### BEHENTRIMONIUM CHLORIDE

LD 50 Oral rat: 3190 mg/Kg

#### ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

#### PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

BEHENTRIMONIUM CHLORIDE

LC 50: 3,5 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#: Not dangerous

Proper shipping name: Not dangerous

Class: Not dangerous

Packaging group: Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS S.p.A.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS S.p.A.

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	3.7 - 4.7
Density:	0.980 - 1.000 g/cc
Viscosity:	25000 - 35000 cPs
Dry 110°:	15.5 - 17.5 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS S.p.A.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Blue limpid liquid
Odour:	Characteristic
Flash point:	20 °C
pH:	5.0 - 7.0
Density:	0.900 - 0.930 g/cc

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS S.p.A.

## 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

ALCOHOL DENAT.

LD 50 Oral rat: 50 mg/Kg

CETRIMONIUM CHLORIDE

LD 50 Oral rat: 2000 mg/Kg

LAURYL ALCOHOL

LD 50 Oral rat: 5000 mg/Kg

MYRISTYL ALCOHOL

LD 50 Oral rat: 2000 mg/Kg

## Section 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

ALCOHOL DENAT.

LC 50: 13000 mg/l/96h

CETRIMONIUM CHLORIDE

LC 50: 1 mg/l/96h

LAURYL ALCOHOL

LC 50: 100 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

# BEAUTY & BUSINESS S.p.A.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	1266
Proper shipping name:	PERFUMERY PRODUCTS, Environmentally hazardous
Class:	3
Packaging group:	II

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

SEMI DI LINO SUBLIME ALL HAIR TYPES Shine Lotion

Date: 17/05/2018

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF016452 CI001620 SEMI DI LINO SUBLIME ALL HAIR TYPES Shine Lotion

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Eye irritation Cat. 2  
Flammable liquid Cat. 3  
Hazardous to the aquatic environment - chronic toxicity Cat. 3

#### 2.2 Label

##### Pictogram:

##### Signal Word

Warning

##### Hazard statement:

H226 Flammable liquid and vapour  
H319 Causes serious eye irritation  
H412 Harmful to aquatic life with long-lasting effects

##### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

##### Precautionary statement (Prevention)

# BEAUTY & BUSINESS S.p.A.

- P210 Keep away from heat/sparks/open flames/hot surfaces. — No smoking.
- P233 Keep container tightly closed.
- P240 Ground/bond container and receiving equipment.
- P241 Use explosion-proof electrical/ventilating/lighting/ equipment.
- P242 Use only non-sparking tools.
- P243 Take precautionary measures against static discharge.
- P264 Wash hands and other skin areas exposed to material thoroughly after handling.
- P273 Avoid release to the environment.
- P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

- P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower
- P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- P337 + P313 If eye irritation persists: Get medical advice/attention.
- P370 + P378 In case of fire: Use appropriate media for extinction (see Section 5 on this label)

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % CETRIMONIUM CHLORIDE

## SAFETY DATA SHEET

SEMI DI LINO SUBLIME ALL HAIR TYPES Cristalli Liquidi THE ORIGINAL

Date: 17/05/2018

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF016454 CI001609 SEMI DI LINO SUBLIME ALL HAIR TYPES Cristalli Liquidi THE ORIGINAL

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Flammable liquid Cat. 3

#### 2.2 Label

Pictogram:

Signal Word

Warning

Hazard statement:

EUH208 Contains may produce an allergic reaction

H226 Flammable liquid and vapour

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

Precautionary statement (Prevention)

P210 Keep away from heat/sparks/open flames/hot surfaces. — No smoking.

P233 Keep container tightly closed.

P240 Ground/bond container and receiving equipment.

P241 Use explosion-proof electrical/ventilating/lighting/ equipment.

P242 Use only non-sparking tools.

P243 Take precautionary measures against static discharge.

# BEAUTY & BUSINESS S.p.A.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P370 + P378 In case of fire: Use appropriate media for extinction (see Section 5 on this label)

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % AMODIMETHICONE

CAS#: 106842-44-8 EINECS#:

Flam. Liq. 3 H227 – Skin Irrit. 2 H315 – Eye Irrit. 2 H319 – Acute Tox. 2 H330 – Skin Mild Irrit. 3 H361

7-10 % DISILOXANE

CAS#: 107-46-0 EINECS#: 203-492-7

Flam. Liq. 2 H225 – Aquatic Acute 1 H400 – Fattore M: 1

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO2, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

# BEAUTY & BUSINESS S.p.A.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS S.p.A.

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Light yellow limpid liquid
Odour:	Characteristic
Flash point:	30,5 °C
Density:	0.930 - 0.960 g/cc
Viscosity:	330 - 380 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### AMODIMETHICONE

LD 50 Oral rat: 5000 mg/Kg

#### DISILOXANE

LD 50 Oral rat: 12000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### AMODIMETHICONE

LC 50: 1,6 mg/l/96h

#### DISILOXANE

LC 50: 3,02 mg/l/96h

# BEAUTY & BUSINESS S.p.A.

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	1266
Proper shipping name:	PERFUMERY PRODUCTS
Class:	3
Packaging group:	III

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

### SEMI DI LINO SUBLIME ALL HAIR TYPES Cristalli Spray

Date: 17/05/2018

Vers: 0

#### Section 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

PF016457 CI010877 SEMI DI LINO SUBLIME ALL HAIR TYPES Cristalli Spray

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

#### Section 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Flammable liquid Cat. 2

Hazardous to the aquatic environment - acute toxicity Cat. 1

##### 2.2 Label

Pictogram:

Signal Word

Danger

Hazard statement:

EUH208 Contains PARFUM / FRAGRANCE, may produce an allergic reaction

H225 Highly flammable liquid and vapour

H400 Very toxic to aquatic life

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

Precautionary statement (Prevention)

P210 Keep away from heat/sparks/open flames/hot surfaces. — No smoking.

# BEAUTY & BUSINESS S.p.A.

P233 Keep container tightly closed.

P240 Ground/bond container and receiving equipment.

P241 Use explosion-proof electrical/ventilating/lighting/ equipment.

P242 Use only non-sparking tools.

P243 Take precautionary measures against static discharge.

P273 Avoid release to the environment.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P370 + P378 In case of fire: Use appropriate media for extinction (see Section 5 on this label)

P391 Collect spillage.

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % PARFUM / FRAGRANCE

CAS#: EINECS#:

Eye Irrit. 2 H319 – Skin Irrit. 2 H315 – Skin Sens. 1 H317 – Aquatic Chronic 2 H411

30-50 % DISILOXANE

CAS#: 107-46-0 EINECS#: 203-492-7

Flam. Liq. 2 H225 – Aquatic Acute 1 H400 – Fattore M: 1

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS S.p.A.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS S.p.A.

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Colourless limpid liquid
Odour:	Characteristic
Flash point:	3 °C
Density:	0.815 - 0.835 g/cc

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### DISILOXANE

LD 50 Oral rat: 12000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

DISILOXANE

LC 50: 3,02 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	1266
Proper shipping name:	PERFUMERY PRODUCTS Environmentally Hazardous
Class:	3
Packaging group:	II

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

# BEAUTY & BUSINESS S.p.A.

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## Section 8: Exposure controls/ personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## Section 9: Physical and chemical properties

Colour and aspect:	Rose limpid liquid
Odour:	Characteristic
Flash point:	26 °C
pH:	5.5 - 6.5
Density:	0.920 - 0.940 g/cc

## Section 10. Stability and reactivity

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

# BEAUTY & BUSINESS S.p.A.

## **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## **10.5 Incompatible materials**

Strong acids, strong oxidants.

## **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

ALCOHOL DENAT.

LD 50 Oral rat: 50 mg/Kg

COETH-7

LD 50 Oral rat: 2000 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

ALCOHOL DENAT.

LC 50: 13000 mg/l/96h

COETH-7

LC 50: 10 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

# BEAUTY & BUSINESS S.p.A.

## **Section 14: Transport information**

UN#:	1266
Proper shipping name:	PERFUMERY PRODUCTS
Class:	3
Packaging group:	III

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

SEMI DI LINO SUBLIME ALL HAIR TYPES Detoxifying Mud

Date: 17/05/2018

Vers: 0

### Section 1: Identification of the substance/ mixture and of the company/undertaking

#### 1.1 Product identifier

PF016896 CI017077 SEMI DI LINO SUBLIME ALL HAIR TYPES Detoxifying Mud

#### 1.2 Relevant identified uses

cosmetic product

#### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.  
Via Ciserano, snc. - 24046  
Osio Sotto (BG) - ITALY  
Tel.: 035 4197798  
Fax: 035 4197734  
e-mail: schede.sicurezza@alfaparfgroup.it

#### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.  
Tel.: 035 4197798 (orario di ufficio)

### Section 2: Hazard identification

#### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

#### 2.2 Label

#### Hazard statement:

EUH208 Contains IMIDAZOLIDINYL UREA , may produce an allergic reaction

#### 2.3 Additional hazards

None

### Section 3: Composition/ information on ingredients

#### 3.1 Substances:

Not applicable

#### 3.2 Mixture:

< 1 % DISODIUM EDTA

CAS#: 139-33-3 EINECS#:

Acute Tox. 4 H332 – STOT RE 2 H373

< 1 % IMIDAZOLIDINYL UREA

CAS#: 39236-46-9 EINECS#:

# BEAUTY & BUSINESS S.p.A.

Skin Sens. 1 H317

< 1 % LACTIC ACID

CAS#: 50-21-5 EINECS#: 200-018-0

Skin Irrit. 2 H315 – Eye Dam. 1 H318

< 1 % PHENOXYETHANOL

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

# BEAUTY & BUSINESS S.p.A.

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Grey clay emulsion
Odour:	Characteristic
Flash point:	Not flammable
pH:	3.6 - 4.4
Density:	1.100 - 1.300 g/cc
Viscosity:	20000 - 30000 cPs
Dry 110°:	39.0 - 42.0 %

# BEAUTY & BUSINESS S.p.A.

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

#### IMIDAZOLIDINYL UREA

LD 50 Oral rat: 2599 mg/Kg

#### LACTIC ACID

LD 50 Oral rat: 4936 mg/Kg

#### PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### DISODIUM EDTA

LC 50: 320 mg/l/96h

#### IMIDAZOLIDINYL UREA

LC 50: 138 mg/l/96h

#### LACTIC ACID

LC 50: 130 mg/l/96h

#### PHENOXYETHANOL

Signal Word

Danger

# BEAUTY & BUSINESS S.p.A.

## Hazard statement:

EUH208 Contains ALPHA-ISOMETHYL IONONE, LINALOOL , may produce an allergic reaction  
H226 Flammable liquid and vapour  
H315 Causes skin irritation  
H318 Causes serious eye damage  
H411 Toxic to aquatic life with long-lasting effects

## Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

## Precautionary statement (Prevention)

P210 Keep away from heat/sparks/open flames/hot surfaces. — No smoking.  
P233 Keep container tightly closed.  
P240 Ground/bond container and receiving equipment.  
P241 Use explosion-proof electrical/ventilating/lighting/ equipment.  
P242 Use only non-sparking tools.  
P243 Take precautionary measures against static discharge.  
P264 Wash hands and other skin areas exposed to material thoroughly after handling.  
P273 Avoid release to the environment.  
P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P302 + P352 IF ON SKIN: Wash with plenty of soap and water.  
P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower  
P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
P310 Immediately call a POISON CENTER or doctor/physician.  
P321 Specific treatment (see Section 4 on this label).  
P332 + P313 If skin irritation occurs: Get medical advice/attention.  
P362 Take off contaminated clothing and wash before reuse.  
P370 + P378 In case of fire: Use appropriate media for extinction (see Section 5 on this label)  
P391 Collect spillage.

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

# BEAUTY & BUSINESS S.p.A.

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

# BEAUTY & BUSINESS S.p.A.

## Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Violet/ purple liquid
Odour:	Characteristic
Flash point:	Not flammable
pH:	4.0 - 5.0
Density:	1.009 - 1.016 g/cc
Dry 110°:	12.0 - 16.0 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

AMODIMETHICONE

LD 50 Oral rat: 2000 mg/Kg

CETRIMONIUM CHLORIDE

# BEAUTY & BUSINESS S.p.A.

LD 50 Oral rat: 2000 mg/Kg

ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

HEXYLENE GLYCOL

LD 50 Oral rat: 9 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

CETRIMONIUM CHLORIDE

LC 50: 1 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

CAS#: 154248-98-3 EINECS#:

Skin Irrit. 2 H315 – Eye Dam. 1 H318

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	yellow clear liquid
Odour:	Characteristic
Flash point:	Not flammable
pH:	4.8 - 5.4
Density:	1.000 - 1.020 g/cc

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

COCETH-7

LD 50 Oral rat: 2000 mg/Kg

DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

ETHYLHEXYLGLYCERIN

# BEAUTY & BUSINESS

LD 50 Oral rat: 2000 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

COCETH-7

LC 50: 10 mg/l/96h

DISODIUM EDTA

LC 50: 320 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## **Section 15: Regulatory information**

# BEAUTY & BUSINESS

## Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

## Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## **Section 4: First aid measures**

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

# BEAUTY & BUSINESS

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

# BEAUTY & BUSINESS

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White Fluid Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	3.8 - 4.8
Density:	0.940 - 0.980 g/cc
Viscosity:	7000 - 15000 cPs

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### BEHENTRIMONIUM CHLORIDE

LD 50 Oral rat: 3190 mg/Kg

#### CETRIMONIUM CHLORIDE

LD 50 Oral rat: 2000 mg/Kg

# BEAUTY & BUSINESS

## DISILOXANE

LD 50 Oral rat: 12000 mg/Kg

## ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

## PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### BEHENTRIMONIUM CHLORIDE

LC 50: 3,5 mg/l/96h

#### CETRIMONIUM CHLORIDE

LC 50: 1 mg/l/96h

#### DISILOXANE

LC 50: 3,02 mg/l/96h

#### ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

#### PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

# BEAUTY & BUSINESS

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### **Respiratory protection**

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### **Hand protection**

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### **Eye protection**

Safety glasses with side shields (EN 166).

#### **Additional information about design of technical facilities**

# BEAUTY & BUSINESS

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Limpid Transparent liquid
Odour:	Characteristic
Flash point:	49,5 °C
pH:	4.5 - 5.5
Density:	1.040 - 1.060 g/cc

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

ALCOHOL DENAT.

LD 50 Oral rat: 50 mg/Kg

IMIDAZOLIDINYL UREA

LD 50 Oral rat: 2599 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

ALCOHOL DENAT.

LC 50: 13000 mg/l/96h

IMIDAZOLIDINYL UREA

LC 50: 138 mg/l/96h

PHENOXYETHANOL

# BEAUTY & BUSINESS

LC 50: 500 mg/l/96h

## **12.2 Persistence**

No data available.

## **12.3 Bioaccumulative potential**

No data available.

## **12.4 Motility in soil**

No data available.

## **12.5 Results of PBT e vPvB assessment**

No data available.

## **12.6 Other adverse effects**

No data available.

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	1266
Proper shipping name:	PERFUMERY PRODUCTS
Class:	3
Packaging group:	III

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

< 1 % PHENOXYETHANOL

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

# BEAUTY & BUSINESS

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Transparent Wax
Odour:	Characteristic
Flash point:	Not flammable
pH:	4.8 - 5.3
Density:	1.020 - 1.040 g/cc

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

# BEAUTY & BUSINESS

## **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## **10.3 Possibility of hazard reactions**

None relevant.

## **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## **10.5 Incompatible materials**

Strong acids, strong oxidants.

## **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### DISODIUM EDTA

LD 50 Oral rat: 2000 mg/Kg

#### IMIDAZOLIDINYL UREA

LD 50 Oral rat: 2599 mg/Kg

#### PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## **Section 12: Ecological informations**

Adopt good working practices, avoiding littering.

### **12.1 Toxicity**

#### DISODIUM EDTA

LC 50: 320 mg/l/96h

#### IMIDAZOLIDINYL UREA

LC 50: 138 mg/l/96h

#### PHENOXYETHANOL

LC 50: 500 mg/l/96h

### **12.2 Persistence**

No data available.

### **12.3 Bioaccumulative potential**

No data available.

### **12.4 Motility in soil**

No data available.

### **12.5 Results of PBT e vPvB assessment**

No data available.

### **12.6 Other adverse effects**

No data available.

# BEAUTY & BUSINESS

## **Section 13: Disposal considerations**

### **13.1 Methods of treatment of the waste**

Operate in compliance with local and national regulations.

#### **Contaminated packaging**

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## **Section 14: Transport information**

UN#:	Not dangerous
Proper shipping name:	Not dangerous
Class:	Not dangerous
Packaging group:	Not dangerous

## **Section 15: Regulatory information**

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### **Evaluation of chemical security**

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

# BEAUTY & BUSINESS

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## **Section 8: Exposure controls/ personal protection**

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	Beige / Compact Cream
Odour:	Characteristic
Flash point:	Not flammable
pH:	5.8 - 6.8
Density:	1.120 - 1.240 g/cc

## **Section 10. Stability and reactivity**

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

# BEAUTY & BUSINESS

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## Section 11: Toxicological information

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

SODIUM DEHYDROACETATE

LD 50 Oral rat: 500 mg/Kg

## Section 13: Disposal considerations

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## Section 14: Transport information

UN#:	Not Dangerous
Proper shipping name:	Not Dangerous
Class:	Not Dangerous
Packaging group:	Not Dangerous

## Section 15: Regulatory information

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

#### Evaluation of chemical security

No data available

## Section 16: Other informations

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

## SAFETY DATA SHEET

### STYLE STORIES SCULPTING HAIRSPRAY

Date: 27/11/2017

Vers: 0

#### **Section 1: Identification of the substance/ mixture and of the company/undertaking**

##### **1.1 Product identifier**

PF017575 CI017208 STYLE STORIES SCULPTING HAIRSPRAY

##### **1.2 Relevant identified uses**

cosmetic product

##### **1.3 Details of the supplier of the safety data sheet**

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### **1.4 Emergency telephone number**

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### **Section 2: Hazard identification**

##### **2.1 Classification of the substance/mixture according to (EC) 1272/2008**

Eye irritation Cat. 2

Flammable liquid Cat. 2

##### **2.2 Label**

###### Pictogram:

###### Signal Word

Danger

###### Hazard statement:

H225 Highly flammable liquid and vapour

H319 Causes serious eye irritation

###### Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

###### Precautionary statement (Prevention)

P210 Keep away from heat/sparks/open flames/hot surfaces. — No smoking.

P233 Keep container tightly closed.

P240 Ground/bond container and receiving equipment.

# BEAUTY & BUSINESS

P241 Use explosion-proof electrical/ventilating/lighting/ equipment.

P242 Use only non-sparking tools.

P243 Take precautionary measures against static discharge.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P337 + P313 If eye irritation persists: Get medical advice/attention.

P370 + P378 In case of fire: Use appropriate media for extinction (see Section 5 on this label)

## **2.3 Additional hazards**

None

## **Section 3: Composition/ information on ingredients**

### **3.1 Substances:**

Not applicable

### **3.2 Mixture:**

< 1 % AMINOMETHYL PROPANOL

30-50 % ALCOHOL DENAT.

CAS#: 64-17-5 EINECS#: 200-578-6

Flam. Liq. 2 H225 – Eye Irrit. 2 H319

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

### **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

Regulations:

1907/2006/CE (Reach)

1272/2008/CE (CLP)

1223/2009 CD (EU Cosmetic Regulation)

In the EU, finished cosmetic products are exempted from any obligations of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)]

Evaluation of chemical security

No data available

## **Section 16: Other informations**

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above.

The user must verify the suitability and completeness of such information, in relation to the particular use intended.

This safety data sheet cancels and replaces any previous releases of the same.

## Safety Data Sheet

According to Annex II to REACH - Regulation 2015/830

### SECTION 1. Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

Code: 003\_042  
Product name: CERA APM STYLE STORIES

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified Uses	Industrial	Professional	Consumer
Chemical preparation	-	✔	✔
Uses Advised Against			

Do not use for uses other than those indicated

#### 1.3. Details of the supplier of the safety data sheet

Name: BERGEN Srl  
Full address: Via Roma, 90  
District and Country: 37060 Castel D'Azzano VR  
ITALIA  
Tel. +39 045 512090 - 045 518009  
fax +39 045 512777

e-mail address of the competent person responsible for the Safety Data Sheet: info@bergen.it

#### 1.4. Emergency telephone number

For urgent inquiries refer to: Tel. +39 045 512090 (office hours)

### SECTION 2. Hazards identification

#### 2.1. Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in (EC) Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of (EU) Regulation 2015/830. Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

#### Hazard classification and indication:

Aerosol, category 2	H223 H229	Flammable aerosol. Pressurised container: may burst if heated.
Eye irritation, category 2	H319	Causes serious eye irritation.

#### 2.2. Label elements

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

Hazard pictograms:

Signal words:

Warning

Hazard statements:

**H223** Flammable aerosol.  
**H229** Pressurised container: may burst if heated.  
**H319** Causes serious eye irritation.

Precautionary statements:

**P101** If medical advice is needed, have product container or label at hand.  
**P102** Keep out of reach of children.  
**P210** Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.  
**P211** Do not spray on an open flame or other ignition source.  
**P251** Do not pierce or burn, even after use.  
**P280** Wear eye protection / face protection.  
**P337+P313** If eye irritation persists: Get medical advice / attention.  
**P410+P412** Protect from sunlight. Do not expose to temperatures exceeding 50°C / 122°F.

### 2.3. Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0,1%.

## SECTION 3. Composition/information on ingredients

### 3.1. Substances

Information not relevant

### 3.2. Mixtures

Contains:

Identification	x = Conc. %	Classification 1272/2008 (CLP)
<b>DIMETHYL ETHER</b>		
CAS 115-10-6	30 ≤ x < 32,5	Flam. Gas 1 H220, Press. Gas H280
EC 204-065-8		
INDEX -		
Reg. no. 01-2119472128-37		
<b>ETHANOL</b>		
CAS 64-17-5	24 ≤ x < 25,5	Flam. Liq. 2 H225, Eye Irrit. 2 H319
EC 200-578-6		
INDEX 603-002-00-5		
Reg. no. 01-2119457610-43		

The full wording of hazard (H) phrases is given in section 16 of the sheet.

The product is an aerosol containing propellants. For the purposes of calculation of the health hazards, propellants are not considered (unless they have health hazards). The percentages indicated are inclusive of the propellants.

Percentage of propellants: 30,00 %

## SECTION 4. First aid measures

### 4.1. Description of first aid measures

No episodes of harm to the staff authorised to use the product have been reported. The following general measures should be adopted as necessary:  
INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention.  
INGESTION: Get medical advice/attention. Induce vomiting only if indicated by the doctor. Do not give anything by mouth to an unconscious person.  
EYES and SKIN: Wash with plenty of water. In the event of persistent irritation, get medical advice/attention.

### 4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

### 4.3. Indication of any immediate medical attention and special treatment needed

Information not available

## SECTION 5. Firefighting measures

### 5.1. Extinguishing media

#### SUITABLE EXTINGUISHING EQUIPMENT

The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray.

#### UNSUITABLE EXTINGUISHING EQUIPMENT

None in particular.

### 5.2. Special hazards arising from the substance or mixture

#### HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

If overheated, aerosol cans can deform, explode and be propelled considerable distances. Put a protective helmet on before approaching the fire. Do not breathe combustion products.

### 5.3. Advice for firefighters

#### GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear.

#### SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

## SECTION 6. Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site. Send away individuals who are not suitably equipped. Wear

protective gloves / protective clothing / eye protection / face protection.

## 6.2. Environmental precautions

Do not disperse in the environment.

## 6.3. Methods and material for containment and cleaning up

Use inert absorbent material to soak up leaked product. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

## 6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

## SECTION 7. Handling and storage

### 7.1. Precautions for safe handling

Avoid bunching of electrostatic charges. Do not spray on flames or incandescent bodies. Vapours may catch fire and an explosion may occur; vapour accumulation is therefore to be avoided by leaving windows and doors open and ensuring good cross ventilation. Do not eat, drink or smoke during use. Do not breathe spray.

### 7.2. Conditions for safe storage, including any incompatibilities

Store in a place where adequate ventilation is ensured, away from direct sunlight at a temperature below 50°C / 122°F, away from any combustion sources.

Storage class TRGS 510 (Germany):

2B

### 7.3. Specific end use(s)

Information not available

## SECTION 8. Exposure controls/personal protection

### 8.1. Control parameters

Predicted no-effect concentration - PNEC		
Normal value in fresh water	0,96	mg/l
Normal value in marine water	0,79	mg/l
Normal value for fresh water sediment	3,6	mg/kg
Normal value for marine water sediment	2,9	mg/kg
Normal value for water, intermittent release	2,75	mg/l
Normal value of STP microorganisms	580	mg/l
Normal value for the food chain (secondary poisoning)	0,38	mg/kg
Normal value for the terrestrial compartment	0,63	mg/kg

Health - Derived no-effect level - DNEL / DMEL								
Route of exposure	Effects on consumers				Effects on workers			
	Acute local	Acute systemic	Chronic local	Chronic systemic	Acute local	Acute systemic	Chronic local	Chronic systemic
Oral				87 mg/kg bw/d				
Inhalation				114 mg/m3				950 mg/m3
Skin				206 mg/kg bw/d				343 mg/kg bw/d

Legend:

(C) = CEILING ; INHAL = Inhalable Fraction ; RESP = Respirable Fraction ; THORA = Thoracic Fraction.

VND = hazard identified but no DNEL/PNEC available ; NEA = no exposure expected ; NPI = no hazard identified.

### 8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired

through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

#### HAND PROTECTION

None required.

#### SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

#### EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

#### RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, a mask with a type AX filter combined with a type P filter should be worn (see standard EN 14387).

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

#### ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

## SECTION 9. Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

Appearance	aerosol
Colour	rose
Odour	characteristic
Odour threshold	Not available
pH	Not available
Melting point / freezing point	Not available
Initial boiling point	Not available
Boiling range	Not available
Flash point	Not available
Evaporation rate	Not available
Flammability (solid, gas)	Not available
Lower inflammability limit	Not available
Upper inflammability limit	Not available
Lower explosive limit	1,8 % (V/V)
Upper explosive limit	9,5 % (V/V)
Vapour pressure	Not available
Vapour density	Not available
Relative density	0,96 g/ml
Solubility	Not available
Partition coefficient: n-octanol/water	Not available
Auto-ignition temperature	Not available
Decomposition temperature	Not available
Viscosity	Not available
Explosive properties	lower propellant explosion limit: 1.8%
Oxidising properties	the product is not an oxidizing substance

### 9.2. Other information

Information not available

## SECTION 10. Stability and reactivity

### 10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

### 10.2. Chemical stability

The product is stable in normal conditions of use and storage.

### 10.3. Possibility of hazardous reactions

No hazardous reactions are foreseeable in normal conditions of use and storage.

#### ETHANOL

Risk of explosion on contact with: alkaline metals,alkaline oxides,calcium hypochlorite,sulphur monofluoride,acetic anhydride,acids,concentrated hydrogen peroxide,perchlorates,perchloric acid,perchloronitrile,mercury nitrate,nitric acid,silver,silver nitrate,ammonia,silver oxide,ammonia,strong oxidising agents,nitrogen dioxide.May react dangerously with: bromoacetylene,chlorine acetylene,bromine trifluoride,chromium trioxide,chromyl chloride,fluorine,potassium tert-butoxide,lithium hydride,phosphorus trioxide,black platinum,zirconium (IV) chloride,zirconium (IV) iodide.Forms explosive mixtures with: air.

### 10.4. Conditions to avoid

Avoid overheating.

#### ETHANOL

Avoid exposure to: sources of heat,naked flames.

### 10.5. Incompatible materials

Strong reducing or oxidising agents, strong acids or alkalis, hot material.

### 10.6. Hazardous decomposition products

Information not available

## SECTION 11. Toxicological information

### 11.1. Information on toxicological effects

#### Metabolism, toxicokinetics, mechanism of action and other information

Information not available

#### Information on likely routes of exposure

Information not available

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

Information not available

#### Interactive effects

Information not available

#### ACUTE TOXICITY

LC50 (Inhalation) of the mixture:  
Not classified (no significant component)  
LD50 (Oral) of the mixture:  
Not classified (no significant component)  
LD50 (Dermal) of the mixture:  
Not classified (no significant component)

#### DIMETHYL ETHER

LC50 (Inhalation) 164000 ppm 4 h

#### ETHANOL

LD50 (Oral) > 5000 mg/kg Rat

LC50 (Inhalation) 120 mg/l/4h Pimephales promelas

#### SKIN CORROSION / IRRITATION

Does not meet the classification criteria for this hazard class

#### SERIOUS EYE DAMAGE / IRRITATION

Causes serious eye irritation

#### RESPIRATORY OR SKIN SENSITISATION

Does not meet the classification criteria for this hazard class

#### GERM CELL MUTAGENICITY

Does not meet the classification criteria for this hazard class

#### CARCINOGENICITY

Does not meet the classification criteria for this hazard class

#### REPRODUCTIVE TOXICITY

Does not meet the classification criteria for this hazard class

#### STOT - SINGLE EXPOSURE

Does not meet the classification criteria for this hazard class

#### STOT - REPEATED EXPOSURE

Does not meet the classification criteria for this hazard class

ASPIRATION HAZARD

Does not meet the classification criteria for this hazard class

**SECTION 12. Ecological information****12.1. Toxicity**

## DIMETHYL ETHER

LC50 - for Fish > 4,1 g/l/96h

EC50 - for Crustacea 4,4 g/l/48h

Chronic NOEC for Fish > 4,4 g/l

## ETHANOL

LC50 - for Fish 14200 mg/l/96h

EC50 - for Crustacea 454 mg/l/48h

EC50 - for Algae / Aquatic Plants 275 mg/l/72h

Chronic NOEC for Fish 250 mg/l

Chronic NOEC for Crustacea 96 mg/l

Chronic NOEC for Algae / Aquatic Plants 11,5 mg/l

**12.2. Persistence and degradability**

## ETHANOL

Solubility in water 1000 - 10000 mg/l

Rapidly degradable

**12.3. Bioaccumulative potential**

## ETHANOL

Partition coefficient: n-octanol/water -0,35

**12.4. Mobility in soil**

Information not available

**12.5. Results of PBT and vPvB assessment**

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0,1%.

**12.6. Other adverse effects**

Information not available

**SECTION 13. Disposal considerations**

**13.1. Waste treatment methods**

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Waste transportation may be subject to ADR restrictions.

CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

**SECTION 14. Transport information****14.1. UN number**

ADR / RID, IMDG, IATA: 1950

**14.2. UN proper shipping name**

ADR / RID: AEROSOLS  
 IMDG: AEROSOLS

#### 14.7. Transport in bulk according to Annex II of Marpol and the IBC Code

Information not relevant

### SECTION 15. Regulatory information

#### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Seveso Category - Directive 2012/18/EC: P3a

Restrictions relating to the product or contained substances pursuant to Annex XVII to EC Regulation 1907/2006

##### Product

Point 40

Substances in Candidate List (Art. 59 REACH)

On the basis of available data, the product does not contain any SVHC in percentage greater than 0,1%.

Substances subject to authorisation (Annex XIV REACH)

None

Substances subject to exportation reporting pursuant to (EC) Reg. 649/2012:

None

Substances subject to the Rotterdam Convention:

None

Substances subject to the Stockholm Convention:

None

##### Healthcare controls

Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

#### 15.2. Chemical safety assessment

No chemical safety assessment has been processed for the mixture and the substances it contains.

**SECTION 16. Other information**

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

<b>Flam. Gas 1</b>	Flammable gas, category 1
<b>Aerosol 2</b>	Aerosol, category 2
<b>Aerosol 3</b>	Aerosol, category 3
<b>Flam. Liq. 2</b>	Flammable liquid, category 2
<b>Press. Gas</b>	Pressurised gas
<b>Eye Irrit. 2</b>	Eye irritation, category 2
<b>H220</b>	Extremely flammable gas.
<b>H223</b>	Flammable aerosol.
<b>H229</b>	Pressurised container: may burst if heated.
<b>H225</b>	Highly flammable liquid and vapour.
<b>H280</b>	Contains gas under pressure; may burst if heated.
<b>H319</b>	Causes serious eye irritation.

**LEGEND:**

- ADR: European Agreement concerning the carriage of Dangerous goods by Road
- CAS NUMBER: Chemical Abstract Service Number
- CE50: Effective concentration (required to induce a 50% effect)
- CE NUMBER: Identifier in ESIS (European archive of existing substances)
- CLP: EC Regulation 1272/2008

Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.

## **SECTION1. Identification of the substance/mixture and of the company/undertaking**

### **1.1. Product identifier**

Product code : PF017557 APM STYLE STORIES THERM. PROTECTOR 200ml  
Trades code :

### **1.2. Relevant identified uses of the substance or mixture and uses advised against**

Cosmetic Product

Sectors of use:

Private households (= general public = consumers)[SU21], Public domain (administration, education, entertainment, services, craftsmen)[SU22]

Uses advised against

Do not use for purposes other than those listed

### **1.3. Details of the supplier of the safety data sheet**

Bergen s.r.l.  
Via Roma, 90  
37060 Castel d'Azzano (Verona)  
Tel. +39 045 512090 - 045 518009  
Fax. +39 045 512777  
e-mail: info@bergen.it  
www.bergen.it

Persona competente responsabile della scheda di dati di sicurezza: sds@chimicahts.it

## **SECTION2. Hazards identification**

### **2.1. Classification of the substance or mixture**

2.1.1 Classification according to Regulation (EC) No 1272/2008:

Pictograms:  
GHS02

Hazard Class and Category Code(s):  
Flam. Aerosol 1

Hazard statement Code(s):  
H222 - Extremely flammable aerosol.  
H229 - Pressurised container: May burst if heated.

Aerosol that ignites easily even at low temperatures, fire risk  
The repeated inhalation of vapors can cause drowsiness and giddiness.  
Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50 ° C.

The aerosol containers overheated burst and can be ejected with violence from a distance and can take place a dangerous mechanism for the fire.

**2.2. Label elements**

Labelling according to Regulation (EC) No 1272/2008:

Pictogram, Signal Word Code(s):  
GHS02 - Danger

Hazard statement Code(s):  
H222 - Extremely flammable aerosol.  
H229 - Pressurised container: May burst if heated.

Supplemental Hazard statement Code(s):  
not applicable

Precautionary statements:

General

P102 - Keep out of reach of children.

Prevention

P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P211 - Do not spray on an open flame or other ignition source.

P251 - Do not pierce or burn, even after use.

Storage

P410+P412 - Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.

**2.3. Other hazards**

The substance / mixture does NOT contains substances PBT/vPvB according to Regulation (EC) No 1907/2006, Annex XIII

No information on other hazards

**SECTION3. Composition/information on ingredients**
**3.1 Substances**

Irrilevant

**3.2 Mixtures**

Refer to paragraph 16 for full text of hazard statements

Petroleum gas contains less than 0,1 % w/w 1,3-butadiene (EINECS No 203-450-8)

Substance	Concentration	Classification	Index	CAS	EINECS	REACH

**SECTION4. First aid measures**

#### **4.1. Description of first aid measures**

**Inhalation:**

Air the area. Move immediately the contaminated patient from the area and keep him at rest in a well ventilated area. If you feel unwell seek medical advice.

**Direct contact with skin (of the pure product):**

Wash thoroughly with soap and running water.

**Direct contact with eyes (of the pure product):**

Wash immediately and thoroughly with running water for at least 10 minutes.

**Ingestion:**

Not hazardous. It's possible to give activated charcoal in water or liquid paraffin medicine

#### **4.2. Most important symptoms and effects, both acute and delayed**

The repeated inhalation of vapors can cause drowsiness and giddiness.

#### **4.3. Indication of any immediate medical attention and special treatment needed**

If medical advice is needed, have product container or label at hand.

### **SECTION5. Firefighting measures**

#### **5.1. Extinguishing media**

**Advised extinguishing agents:**

CO2 or dry powder extinguisher

**Extinguishing means to avoid:**

Direct jets of water

#### **5.2. Special hazards arising from the substance or mixture**

The aerosol containers overheated burst and can be ejected with violence from a distance and can take place a dangerous mechanism for the fire.

Manufactured under pressure in sealed metal container (test pressure 15 bar max). Cool containers with water spray trying to remove them from the fire. The aerosol containers can be overheated and burst violently ejected from a distance (protect the head using a safety helmet).

#### **5.3. Advice for firefighters**

Use protection for the breathing apparatus

Safety helmet and full protective suit.

The spray water can be used to protect the people involved in the extinction

You may also use selfrespirator, especially when working in confined and poorly ventilated area and if you use halogenated extinguishers (Halon 1211 fluobrene, Solkan 123, NAF, etc...)

Keep containers cool with water spray

### **SECTION6. Accidental release measures**

#### **6.1. Personal precautions, protective equipment and emergency procedures**

**6.1.1 For non-emergency personnel:**

Leave the area surrounding the spill or release. Do not smoke

Leave the surrounding area recalling that any overheating could project the cylinder at a considerable distance.

Wear gloves and protective clothing

**6.1.2 For emergency responders:**

Given the tightness of aerosol, it is unlikely that the spillage may occur.

However if some container is damaged likely to cause a loss, insulate the tank in question by bringing it to open air or covering it with inert material and fuel (eg sand, earth, vermiculite) and having the care to avoid any point of ignition that might pose a serious risk of fire.

Wear gloves and protective clothing

Eliminate all unguarded flames and possible sources of ignition. No smoking.

Provision of sufficient ventilation.

Evacuate the danger area and, in case, consult an expert.

## 6.2. Environmental precautions

Contain spill

Inform the competent authorities.

Discharge the remains in compliance with the regulations

## 6.3. Methods and material for containment and cleaning up

6.3.1 For containment:

Recover the product for reuse, if possible, or the removal.

6.3.2 For cleaning up:

After wiping up, wash with water the area and materials involved

6.3.3 Other information:

None in particular.

## 6.4. Reference to other sections

Refer to paragraphs 8 and 13 for more information

# SECTION 7. Handling and storage

## 7.1. Precautions for safe handling

Avoid contact and inhalation of vapors

Use extreme caution when handling the product. Avoid shock or friction.

Do not smoke at work

At work do not eat or drink.

Vapors are heavier than air and may spread close to the ground and form explosive mixtures with air. Prevent formation of flammable or explosive concentrations in the air.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50 ° C.

Do not pierce or burn, even after the use. Do not spray on flame or incandescent objects. Use in adequately ventilated areas.

See also paragraph 8 below.

## 7.2. Conditions for safe storage, including any incompatibilities

Keep in original container closed tightly. Do not store in open or unlabeled containers.

Keep containers upright and safe by avoiding the possibility of falls or collisions.

Pressurized container. Store in a ventilated place, in original packaging away from heat and sunlight.

Keep away from open flames, sparks and heat sources. Avoid direct sunlight exposure.

## 7.3. Specific end use(s)

Private households (= general public = consumers):

Store in cool and dry places.

Public domain (administration, education, entertainment, services, craftsmen):

Handle with care.

Store in ventilated place away from heat sources,

Keep the container tightly closed.

## **SECTION8. Exposure controls/personal protection**

### **8.1. Control parameters**

No data available on the mixture.

Related to contained substances:

Petroleum gas:

DNEL, inhalation, long term, systemic effects, workers: 2.21 mg/m<sup>3</sup>

DNEL, dermal, long term, systemic effects, workers: 23.4 mg/kg bw/day

DNEL, inhalation, long term, systemic effects, population: 0.0664 mg/m<sup>3</sup>

ISODODECANE:

No data available.

- Substance: ethanol

DNEL

Systemic effects Long term Workers inhalation = 950 (mg/m<sup>3</sup>)

Local effects Short term Workers inhalation = 1900 (mg/m<sup>3</sup>)

PNEC

Sweet water = 0,96 (mg/l)

sediment Sweet water = 3,6 (mg/kg/sediment)

Sea water = 0,79 (mg/l)

sediment Sea water = 2,9 (mg/kg/sediment)

ground = 0,63 (mg/kg ground)

### **8.2. Exposure controls**

Appropriate engineering controls:

Private households (= general public = consumers):

Open with caution. Close the container immediately after its use.

Adopt the appropriate protective measures.

Public domain (administration, education, entertainment, services, craftsmen):

Open with caution. Close the container immediately after its use.

Adopt the appropriate protective measures.

Individual protection measures:

(a) Eye / face protection

Wear safety goggles to EN-166

(b) Skin protection

(i) Hand protection

Not needed for normal use.

(ii) Other

Avoid direct contact with the skin

Better is to use cotton antistatic clothing

(c) Respiratory protection

Work in a sufficiently ventilated to avoid inhaling the product.

(d) Thermal hazards

No hazard to report

Environmental exposure controls:  
Use according to good working practices to avoid pollution into the environment.

**SECTION9. Physical and chemical properties**
**9.1. Information on basic physical and chemical properties**

Physical and chemical properties	Value	Determination method
Appearance	pressure vessel with base and liquefied gas	
Odour	characteristic	
Odour threshold	not determined	
pH	not determined	
Melting point/freezing point	not determined	
Initial boiling point and boiling range	not determined	
Flash point	not determined	ASTM D92
Evaporation rate	irrelevant	
Flammability (solid, gas)	not determined	
Upper/lower flammability or explosive limits	per il propellente: 9.5% LEL/UEL 1.8%	
Vapour pressure	not determined	
Vapour density	not determined	
Relative density	not determined	
Solubility	water soluble base	
Water solubility	water soluble base	
Partition coefficient: n-octanol/water	not determined	
Auto-ignition temperature	405°C	
Decomposition temperature	irrelevant	
Viscosity	not determined	
Explosive properties	limite inferiore di esplosione dl propellente: 1.8%	
Oxidising properties	non-oxidizing	
Container volume	not determined	
Product volume	not determined	
Pressure to 20°C	3.8 - 4.2 bar	
Deformation pressure	not determined	
Burst pressure of the container	not determined	
Flash point of liquid phase	not determined	
Propellant inflammability	infiammabile	

**9.2. Other information**

No data available.

**SECTION10. Stability and reactivity**
**10.1. Reactivity**

No reactivity hazards

### **10.2. Chemical stability**

No hazardous reaction when handled and stored according to provisions.

### **10.3. Possibility of hazardous reactions**

There are no hazardous reactions

### **10.4. Conditions to avoid**

Avoid the accumulation of electrostatic charges.

The aerosol product is stable for a period longer than 36 months under normal storage conditions cannot be dangerous reactions because the nearly exhausted, the hermetic tight container.

Avoid contact with oxidizing substances. The product may catch fire.

Avoid heat, flames, sparks and hot surfaces.

### **10.5. Incompatible materials**

Embers, oxidizing materials.

### **10.6. Hazardous decomposition products**

Does not decompose when used for intended uses.

## **SECTION 11. Toxicological information**

### **11.1. Information on toxicological effects**

No toxicological tests have been performed on the mixture.

(a) acute toxicity: based on available data, the classification criteria are not met.

(b) skin corrosion/irritation based on available data, the classification criteria are not met.

(c) serious eye damage/irritation: based on available data, the classification criteria are not met.

(d) respiratory or skin sensitization: based on available data, the classification criteria are not met.

(e) germ cell mutagenicity: based on available data, the classification criteria are not met.

(f) carcinogenicity: based on available data, the classification criteria are not met.

(g) reproductive toxicity: based on available data, the classification criteria are not met.

(h) specific target organ toxicity (STOT) single exposure: based on available data, the classification criteria are not met.

(i) specific target organ toxicity (STOT) repeated exposure based on available data, the classification criteria are not met.

(j) aspiration hazard: based on available data, the classification criteria are not met.

Related to contained substances:

Petroleum gas:

Toxicity:

Not-toxic but simple suffocating. Gaseous state has no effect on the skin and mucous membranes. The vapours may cause narcotic effects.

Irritating power:

The contact of the liquid product on the skin causes cold sores.

There is no evidence relating to the following effects: Chronic toxicity - Sensitization - Mutagenesis - Teratogenesis - Carcinogenesis.

ethanol:

Rat DL50 (oral): 7000 mg / kg (HSDB, 2015);  
Mouse DL50 (oral): 3400 mg / kg (HSDB, 2015);  
Rabbit DL50 (cutaneous): > 20000 mg / kg (INRS, 2011);  
Rat CL50-10 hours (inhalation): 20000 ppm (HSDB, 2015);  
Mouse CL50-4 hours = 39 mg / m<sup>3</sup> (HSDB, 2015).  
LD50 (rat) Oral (mg/kg body weight) = 7000  
LD50 Dermal (rat or rabbit) (mg/kg body weight) = 20000

ISODODECANE:

LD50 (rat) Oral (mg/kg body weight) = 5000

## SECTION 12. Ecological information

### 12.1. Toxicity

The product has not been tested for environmental impact in the event of accidental release in the environment.

Related to contained substances:

Petroleum gas:

Toxicity to fish, LC50, 96h: 24.11 mg/l  
Toxicity to Daphnia, LC50, 48h: 14.22 mg/l  
Toxicity to algae, EC50, 96h: 7.71 mg/l  
C(E)L50 (mg/l) = 7,71

ethanol:

FISH:

CL-50 (96 h) *Salmo gairdneri*: 13 g / l;  
*Pimephales promelas*: 13.5 -15.3 g / l.  
INVERTEBRATES IN WATER WATER:  
CE50 (48 h) *Daphnia Magna*: 12.34 g / l; NOEC (reproduction, 21 days): > 10 mg / l.  
*Ceriodaphnia dubia*: EC50 (4 8h): 5.012 g / l;  
NOEC (reproduction, 10 days): 9.6 mg / l.  
*Palaemonetes pugio* NOEC (development, 10 days): 79 mg / l.  
INVERTEBRATES IN WATER SALAD:  
CE50 (24 h) *Salt Artemia* 23.9, > 10 g / l;  
CE50 (48 h) *Artemia saline nauplii*: 857 mg / l  
SEAWEED:  
*Chlorella vulgaris*, 72 h: CE50 275 mg / l, CE10 11.5 mg / l;  
*Selenastrum capricornutum*, 72 hr, CE50: 12.9 g / l, CE10 = 0.44 g / l;  
*Chlamydomonas eugamethos*, 48 h, CE50: 18 g / l, NOEC = 7.9 g / l  
*Skeletonema costatum*, NOEC (5 days): 3.24 g / l.  
C(E)L50 (mg/l) = 275  
NOEC (mg/l) = 10

ISODODECANE:

C(E)L50 (mg/l) = 0,04 10

Use according to good working practices to avoid pollution into the environment.

### 12.2. Persistence and degradability

No data available on the mixture.

Related to contained substances:

Petroleum gas:

No data available

ethanol:  
Readily biodegradable

ISODODECANE:  
No data available.

### 12.3. Bioaccumulative potential

No data available on the mixture.

Related to contained substances:

Petroleum gas:  
No data available

ethanol:  
N-octanol / water partition coefficient: -0.35  
The bioaccumulation potential is low.

ISODODECANE:  
No data available.

### 12.4. Mobility in soil

No data available on the mixture.

Related to contained substances:

Petroleum gas:  
No data available

ethanol:  
It is not persistent in the environment.  
Fully soluble in water, it volatiles in the atmosphere.

ISODODECANE:  
No data available.

### 12.5. Results of PBT and vPvB assessment

The substance / mixture does NOT contains substances PBT/vPvB according to Regulation (EC) No 1907/2006, Annex XIII

### 12.6. Other adverse effects

No adverse effects

## SECTION13. Disposal considerations

### 13.1. Waste treatment methods

The waste must be disposed of in compliance with the regulations in force delivering empty containers for final disposal and equipped to safely handle pressurized containers containing flammable liquids and gas waste. The empty container heated to temperatures exceeding 70 ° C can burst.

Recover if possible. Operate according to local or national regulations

## **SECTION 14. Transport information**

### **14.1. UN number**

ADR/RID/IMDG/ICAO-IATA: 1950

ADR exemption because compliance with the following characteristics:

Combination packagings: per inner packaging 1 L per package 30 Kg

Inner packagings placed in shrink-wrapped or stretch-wrapped trays: per inner packaging 1 L per package 20 Kg

### **14.2. UN proper shipping name**

ADR/RID/IMDG: AEROSOL flammable

ICAO-IATA: AEROSOL flammable

### **14.3. Transport hazard class(es)**

ADR/RID/IMDG/ICAO-IATA: Class : 2

ADR/RID/IMDG/ICAO-IATA: Label : Limited quantities

ADR: Tunnel restriction code : D

ADR/RID/IMDG/ICAO-IATA: Limited quantities : 1 L

IMDG - EmS : F-D, S-U

### **14.4. Packing group**

ADR/RID/IMDG/ICAO-IATA: --

### **14.5. Environmental hazards**

ADR/RID/ICAO-IATA: Product is not environmentally hazardous

IMDG: Marine polluting agent : Not

### **14.6. Special precautions for user**

The transport must be carried out by authorised vehicles carrying dangerous goods in accordance with the requirements of the current edition of A.D.R Agreement. and the national provisions applicable.

The transport must be carried out in the original packaging and in packages that are made from materials resistant from the content and not likely to generate with this dangerous reactions. Attendants to the loading and unloading of dangerous goods must have received proper training on the risks presented by prepared and on possible procedures to be taken in the event of emergency situations

### **14.7. Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code**

It is not intended to carry bulk

## **SECTION 15. Regulatory information**

### **15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture**

Directive 2013/10/EU (aerosol)

Decree 2/2/2002 n. 25 (risks related to chemical agents at work)

D.M. 2/26/2004 Work (occupational exposure limits)

D.M. 4/3/2007 (implementation of Directive 2006/8/EC)

Regulation (EC) No 1907/2006 (REACH)

Regulation (EC) no 1272/2008 (CLP)

Regulation (EC) no 790/2009, 2012/18/EU

Directive (cd. Seveso III)

Seveso category:

---

P3a - FLAMMABLE AEROSOLS

REGULATION (EU) No 1357/2014 - waste:

HP3 - Flammable

HP5 - Specific Target Organ Toxicity (STOT)/Aspiration Toxicity

### **15.2. Chemical safety assessment**

No chemical safety assessment was carried out by the supplier

---

## **SECTION 16. Other information**

### **16.1. Other information**

Description of the hazard statements exposed to point 3

H220 = Extremely flammable gas.

H280 = Contains gas under pressure; may explode if heated.

H225 = Highly flammable liquid and vapour.

H226 = Flammable liquid and vapour.

H304 = May be fatal if swallowed and enters airways.

H413 = May cause long lasting harmful effects to aquatic life.

Classification based on data of all mixture components

Main normative references:

Regulation 2008/1272/EC

Regulation 2015/830/EC

## **SECTION1. Identification of the substance/mixture and of the company/undertaking**

### **1.1. Product identifier**

Product code : PF017560 APM STYLE STORIES FIRING MOUSSE 250ml  
Trades code :

### **1.2. Relevant identified uses of the substance or mixture and uses advised against**

Cosmetic Product

Sectors of use:

Private households (= general public = consumers)[SU21], Public domain (administration, education, entertainment, services, craftsmen)[SU22]

Uses advised against

Do not use for purposes other than those listed

### **1.3. Details of the supplier of the safety data sheet**

Bergen s.r.l.  
Via Roma, 90  
37060 Castel d'Azzano (Verona)  
Tel. +39 045 512090 - 045 518009  
Fax. +39 045 512777

## **SECTION2. Hazards identification**

### **2.1. Classification of the substance or mixture**

2.1.1 Classification according to Regulation (EC) No 1272/2008:

Pictograms:  
GHS02

Hazard Class and Category Code(s):  
Flam. Aerosol 1

Hazard statement Code(s):  
H222 - Extremely flammable aerosol.  
H229 - Pressurised container: May burst if heated.

Aerosol that ignites easily even at low temperatures, fire risk  
The repeated inhalation of vapors can cause drowsiness and giddiness.  
Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50 ° C.

The aerosol containers overheated burst and can be ejected with violence from a distance and can take place a dangerous mechanism for the fire.

## 2.2. Label elements

Labelling according to Regulation (EC) No 1272/2008:

Pictogram, Signal Word Code(s):  
GHS02 - Danger

Hazard statement Code(s):  
H222 - Extremely flammable aerosol.  
H229 - Pressurised container: May burst if heated.

Supplemental Hazard statement Code(s):  
not applicable

Precautionary statements:

General

P101 - If medical advice is needed, have product container or label at hand.

P102 - Keep out of reach of children.

Prevention

P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P211 - Do not spray on an open flame or other ignition source.

P251 - Do not pierce or burn, even after use.

Storage

P410+P412 - Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.

## 2.3. Other hazards

The substance / mixture does NOT contains substances PBT/vPvB according to Regulation (EC) No 1907/2006, Annex XIII

No information on other hazards

## SECTION3. Composition/information on ingredients

### 3.1 Substances

Irrilevant

### 3.2 Mixtures

Refer to paragraph 16 for full text of hazard statements

Petroleum gas contains less than 0,1 % w/w 1,3-butadiene (EINECS No 203-450-8)

Note H - The classification and labelling shown for this substance applies to the hazardous property(ies) indicated by the hazard statement(s) in combination with the hazard class(es) and category(ies) shown. The requirements of Article 4 for manufacturers, importers or downstream users of this substance apply to all other hazard classes and categories. For hazard classes where the route of exposure or the nature of the effects leads to a differentiation of the classification of the hazard class, the manufacturer, importer or downstream user is required to consider the routes of exposure or the nature of the effects not already considered. The final label shall follow the requirements of Article 17 and of section 1.2 of Annex I.

Note K - The classification as a carcinogen or mutagen need not apply if it can be shown that the substance contains less than 0,1 % w/w 1,3-butadiene (Einecs No 203-450-8). If the substance is not classified as a carcinogen or mutagen, at least the precautionary statements (P102-)P210-P403 should apply. This note applies only to certain complex oil-derived substances in Part 3

Note S - This substance may not require a label according to Article 17 (see section 1.3 of Annex I) (Table 3.1). This substance may not require a label according to Article 23 of Directive 67/548/EEC (see section 8 of Annex VI to that

Directive) (Table 3.2).

Note U - When put on the market gases have to be classified as 'Gases under pressure', in one of the groups compressed gas, liquefied gas, refrigerated liquefied gas or dissolved gas. The group depends on the physical state in which the gas is packaged and therefore has to be assigned case by case.

Substance	Concentration	Classification	Index	CAS	EINECS	REACH
Petroleum gas Note: H K S U	> 1 <= 5%	Flam. Gas 1, H220; Liq. Gas, H280	649-199-00-1	68476-40-4	200-681-4	01-2119486 557-22

## SECTION4. First aid measures

### 4.1. Description of first aid measures

Inhalation:

Air the area. Move immediately the contaminated patient from the area and keep him at rest in a well ventilated area. If you feel unwell seek medical advice.

Direct contact with skin (of the pure product):

Wash thoroughly with soap and running water.

Direct contact with eyes (of the pure product):

Wash immediately and thoroughly with running water for at least 10 minutes.

Ingestion:

Not hazardous. It's possible to give activated charcoal in water or liquid paraffin medicine

### 4.2. Most important symptoms and effects, both acute and delayed

The repeated inhalation of vapors can cause drowsiness and giddiness.

### 4.3. Indication of any immediate medical attention and special treatment needed

If medical advice is needed, have product container or label at hand.

## SECTION5. Firefighting measures

### 5.1. Extinguishing media

Advised extinguishing agents:

CO2 or dry powder extinguisher

Extinguishing means to avoid:

Direct jets of water

### 5.2. Special hazards arising from the substance or mixture

The aerosol containers overheated burst and can be ejected with violence from a distance and can take place a dangerous mechanism for the fire.

Manufactured under pressure in sealed metal container (test pressure 15 bar max). Cool containers with water spray trying to remove them from the fire. The aerosol containers can be overheated and burst violently ejected from a distance (protect the head using a safety helmet).

### 5.3. Advice for firefighters

Use protection for the breathing apparatus

Safety helmet and full protective suit.

The spray water can be used to protect the people involved in the extinction

You may also use selfrespirator, especially when working in confined and poorly ventilated area and if you use

halogenated extinguishers (Halon 1211 fluobrene, Solkan 123, NAF, etc...)  
Keep containers cool with water spray

## **SECTION6. Accidental release measures**

### **6.1. Personal precautions, protective equipment and emergency procedures**

6.1.1 For non-emergency personnel:

Leave the area surrounding the spill or release. Do not smoke

Leave the surrounding area recalling that any overheating could project the cylinder at a considerable distance.

Wear gloves and protective clothing

6.1.2 For emergency responders:

Given the tightness of aerosol, it is unlikely that the spillage may occur.

However if some container is damaged likely to cause a loss, insulate the tank in question by bringing it to open air or covering it with inert material and fuel (eg sand, earth, vermiculite) and having the care to avoid any point of ignition that might pose a serious risk of fire.

Wear gloves and protective clothing

Eliminate all unguarded flames and possible sources of ignition. No smoking.

Provision of sufficient ventilation.

Evacuate the danger area and, in case, consult an expert.

### **6.2. Environmental precautions**

Contain spill

Inform the competent authorities.

Discharge the remains in compliance with the regulations

### **6.3. Methods and material for containment and cleaning up**

6.3.1 For containment:

Recover the product for reuse, if possible, or the removal.

6.3.2 For cleaning up:

After wiping up, wash with water the area and materials involved

6.3.3 Other information:

None in particular.

### **6.4. Reference to other sections**

Refer to paragraphs 8 and 13 for more information

## **SECTION7. Handling and storage**

### **7.1. Precautions for safe handling**

Avoid contact and inhalation of vapors

Use extreme caution when handling the product. Avoid shock or friction.

Do not smoke at work

At work do not eat or drink.

Vapors are heavier than air and may spread close to the ground and form explosive mixtures with air. Prevent formation of flammable or explosive concentrations in the air.

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50 ° C.

Do not pierce or burn, even after the use. Do not spray on flame or incandescent objects. Use in adequately ventilated areas.

See also paragraph 8 below.

### **7.2. Conditions for safe storage, including any incompatibilities**

Keep in original container closed tightly. Do not store in open or unlabeled containers.

Keep containers upright and safe by avoiding the possibility of falls or collisions.  
Pressurized container. Store in a ventilated place, in original packaging away from heat and sunlight.  
Keep away from open flames, sparks and heat sources. Avoid direct sunlight exposure.

### 7.3. Specific end use(s)

Private households (= general public = consumers):  
Store in cool and dry places.

Public domain (administration, education, entertainment, services, craftsmen):  
Handle with care.  
Store in ventilated place away from heat sources,  
Keep the container tightly closed.

## SECTION 8. Exposure controls/personal protection

### 8.1. Control parameters

No data available on the mixture.

Related to contained substances:

Petroleum gas:

DNEL, inhalation, long term, systemic effects, workers: 2.21 mg/m<sup>3</sup>

DNEL, dermal, long term, systemic effects, workers: 23.4 mg/kg bw/day

DNEL, inhalation, long term, systemic effects, population: 0.0664 mg/m<sup>3</sup>

### 8.2. Exposure controls

Appropriate engineering controls:

Private households (= general public = consumers):

Open with caution. Close the container immediately after its use.

Adopt the appropriate protective measures.

Public domain (administration, education, entertainment, services, craftsmen):

Open with caution. Close the container immediately after its use.

Adopt the appropriate protective measures.

Individual protection measures:

(a) Eye / face protection

Wear safety goggles to EN-166

(b) Skin protection

(i) Hand protection

Not needed for normal use.

(ii) Other

Avoid direct contact with the skin

Better is to use cotton antistatic clothing

(c) Respiratory protection

Work in a sufficiently ventilated to avoid inhaling the product.

(d) Thermal hazards

No hazard to report

Environmental exposure controls:

Use according to good working practices to avoid pollution into the environment.

**SECTION9. Physical and chemical properties**
**9.1. Information on basic physical and chemical properties**

Physical and chemical properties	Value	Determination method
Appearance	pressure vessel with base and liquefied gas	
Odour	characteristic	
Odour threshold	not determined	
pH	not determined	
Melting point/freezing point	not determined	
Initial boiling point and boiling range	not determined	
Flash point	not determined	ASTM D92
Evaporation rate	irrelevant	
Flammability (solid, gas)	not determined	
Upper/lower flammability or explosive limits	per il propellente: 9.5% LEL/UEL 1.8%	
Vapour pressure	not determined	
Vapour density	not determined	
Relative density	not determined	
Solubility	water soluble base	
Water solubility	water soluble base	
Partition coefficient: n-octanol/water	not determined	
Auto-ignition temperature	405°C	
Decomposition temperature	irrelevant	
Viscosity	not determined	
Explosive properties	limite inferiore di esplosione dl propellente: 1.8%	
Oxidising properties	non-oxidizing	
Container volume	not determined	
Product volume	not determined	
Pressure to 20°C	3.8 - 4.2 bar	
Deformation pressure	not determined	
Burst pressure of the container	not determined	
Flash point of liquid phase	not determined	
Propellant inflammability	infiammabile	

**9.2. Other information**

No data available.

**SECTION10. Stability and reactivity**
**10.1. Reactivity**

No reactivity hazards

**10.2. Chemical stability**

No hazardous reaction when handled and stored according to provisions.

### 10.3. Possibility of hazardous reactions

There are no hazardous reactions

### 10.4. Conditions to avoid

Avoid the accumulation of electrostatic charges.

The aerosol product is stable for a period longer than 36 months under normal storage conditions cannot be dangerous reactions because the nearly exhausted, the hermetic tight container.

Avoid contact with oxidizing substances. The product may catch fire.

Avoid heat, flames, sparks and hot surfaces.

### 10.5. Incompatible materials

Embers, oxidizing materials.

### 10.6. Hazardous decomposition products

Does not decompose when used for intended uses.

## SECTION 11. Toxicological information

### 11.1. Information on toxicological effects

No toxicological tests have been performed on the mixture.

(a) acute toxicity: based on available data, the classification criteria are not met.

(b) skin corrosion/irritation based on available data, the classification criteria are not met.

(c) serious eye damage/irritation: based on available data, the classification criteria are not met.

(d) respiratory or skin sensitization: based on available data, the classification criteria are not met.

(e) germ cell mutagenicity: based on available data, the classification criteria are not met.

(f) carcinogenicity: based on available data, the classification criteria are not met.

(g) reproductive toxicity: based on available data, the classification criteria are not met.

(h) specific target organ toxicity (STOT) single exposure: based on available data, the classification criteria are not met.

(i) specific target organ toxicity (STOT) repeated exposure based on available data, the classification criteria are not met.

(j) aspiration hazard: based on available data, the classification criteria are not met.

Related to contained substances:

Petroleum gas:

Toxicity:

Not-toxic but simple suffocating. Gaseous state has no effect on the skin and mucous membranes. The vapours may cause narcotic effects.

Irritating power:

The contact of the liquid product on the skin causes cold sores.

There is no evidence relating to the following effects: Chronic toxicity - Sensitization - Mutagenesis - Teratogenesis - Carcinogenesis.

## **SECTION12. Ecological information**

### **12.1. Toxicity**

The product has not been tested for environmental impact in the event of accidental release in the environment.

Related to contained substances:

Petroleum gas:

Toxicity to fish, LC50, 96h: 24.11 mg/l

Toxicity to Daphnia, LC50, 48h: 14.22 mg/l

Toxicity to algae, EC50, 96h: 7.71 mg/l

C(E)L50 (mg/l) = 7,71

Use according to good working practices to avoid pollution into the environment.

### **12.2. Persistence and degradability**

No data available on the mixture.

Related to contained substances:

Petroleum gas:

No data available

### **12.3. Bioaccumulative potential**

No data available on the mixture.

Related to contained substances:

Petroleum gas:

No data available

### **12.4. Mobility in soil**

No data available on the mixture.

Related to contained substances:

Petroleum gas:

No data available

### **12.5. Results of PBT and vPvB assessment**

The substance / mixture does NOT contains substances PBT/vPvB according to Regulation (EC) No 1907/2006, Annex XIII

### **12.6. Other adverse effects**

No adverse effects

## **SECTION13. Disposal considerations**

In conformity to Regulation (EU) 2015/830

### 13.1. Waste treatment methods

The waste must be disposed of in compliance with the regulations in force delivering empty containers for final disposal and equipped to safely handle pressurized containers containing flammable liquids and gas waste. The empty container heated to temperatures exceeding 70 ° C can burst.

Recover if possible. Operate according to local or national regulations

## SECTION 14. Transport information

### 14.1. UN number

ADR/RID/IMDG/ICAO-IATA: 1950

ADR exemption because compliance with the following characteristics:

Combination packagings: per inner packaging 1 L per package 30 Kg

Inner packagings placed in shrink-wrapped or stretch-wrapped trays: per inner packaging 1 L per package 20 Kg

### 14.2. UN proper shipping name

ADR/RID/IMDG: AEROSOL flammable

ICAO-IATA: AEROSOL flammable

### 14.3. Transport hazard class(es)

ADR/RID/IMDG/ICAO-IATA: Class : 2

ADR/RID/IMDG/ICAO-IATA: Label : Limited quantities

ADR: Tunnel restriction code : D

ADR/RID/IMDG/ICAO-IATA: Limited quantities : 1 L

IMDG - EmS : F-D, S-U

### 14.4. Packing group

ADR/RID/IMDG/ICAO-IATA: --

### 14.5. Environmental hazards

ADR/RID/ICAO-IATA: Product is not environmentally hazardous

IMDG: Marine polluting agent : Not

### 14.6. Special precautions for user

The transport must be carried out by authorised vehicles carrying dangerous goods in accordance with the requirements of the current edition of A.D.R Agreement. and the national provisions applicable.

The transport must be carried out in the original packaging and in packages that are made from materials resistant from the content and not likely to generate with this dangerous reactions. Attendants to the loading and unloading of dangerous goods must have received proper training on the risks presented by prepared and on possible procedures to be taken in the event of emergency situations

### 14.7. Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code

It is not intended to carry bulk

## SECTION 15. Regulatory information

### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Directive 2013/10/EU (aerosol)

Decree 2/2/2002 n. 25 (risks related to chemical agents at work)

D.M. 2/26/2004 Work (occupational exposure limits)

D.M. 4/3/2007 (implementation of Directive 2006/8/EC)

Regulation (EC) No 1907/2006 (REACH)

Regulation (EC) no 1272/2008 (CLP)  
Regulation (EC) no 790/2009, 2012/18/EU  
Directive (cd. Seveso III)  
Seveso category:  
P3a - FLAMMABLE AEROSOLS

REGULATION (EU) No 1357/2014 - waste:  
HP3 - Flammable

### 15.2. Chemical safety assessment

No chemical safety assessment was carried out by the supplier

## SECTION 16. Other information

### 16.1. Other information

Description of the hazard statements exposed to point 3  
H220 = Extremely flammable gas.  
H280 = Contains gas under pressure; may explode if heated.

Classification based on data of all mixture components

Main normative references:  
Regulation 2008/1272/EC  
Regulation 2015/830/EC

## **SECTION1. Identification of the substance/mixture and of the company/undertaking**

### **1.1. Product identifier**

Product code : PF017576 APM STYLE STORIES TEXT.DRY SHAMPOO 200ml  
Trades code :

### **1.2. Relevant identified uses of the substance or mixture and uses advised against**

Cosmetic Product

Sectors of use:

Private households (= general public = consumers)[SU21], Public domain (administration, education, entertainment, services, craftsmen)[SU22]

Uses advised against

Do not use for purposes other than those listed

### **1.3. Details of the supplier of the safety data sheet**

Bergen s.r.l.  
Via Roma, 90  
37060 Castel d'Azzano (Verona)  
Tel. +39 045 512090 - 045 518009  
Fax. +39 045 512777  
e-mail: info@bergen.it  
www.bergen.it

Persona competente responsabile della scheda di dati di sicurezza: sds@chimicahts.it

### **1.4. Emergency telephone number**

CAVp Osp. Pediatrico Bambino Gesù, Piazza Sant'Onofrio, 4 00165 Roma - Tel.: 06 68593726

Azienda Ospedaliera Papa Giovanni XXII, Piazza OMS, 1 24127 Bergamo - Tel.: 800883300

## **SECTION2. Hazards identification**

### **2.1. Classification of the substance or mixture**

2.1.1 Classification according to Regulation (EC) No 1272/2008:

Pictograms:  
GHS02

Hazard Class and Category Code(s):  
Flam. Aerosol 1

Hazard statement Code(s):  
H222 - Extremely flammable aerosol.  
H229 - Pressurised container: May burst if heated.

Aerosol that ignites easily even at low temperatures, fire risk  
The repeated inhalation of vapors can cause drowsiness and giddiness.  
Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50 ° C.

The aerosol containers overheated burst and can be ejected with violence from a distance and can take place a dangerous mechanism for the fire.

## 2.2. Label elements

Labelling according to Regulation (EC) No 1272/2008:

Pictogram, Signal Word Code(s):  
GHS02 - Danger

Hazard statement Code(s):  
H222 - Extremely flammable aerosol.  
H229 - Pressurised container: May burst if heated.

Supplemental Hazard statement Code(s):  
not applicable

Precautionary statements:

General

P102 - Keep out of reach of children.

Prevention

P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P211 - Do not spray on an open flame or other ignition source.

P251 - Do not pierce or burn, even after use.

Storage

P410+P412 - Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.

## 2.3. Other hazards

The substance / mixture does NOT contains substances PBT/vPvB according to Regulation (EC) No 1907/2006, Annex XIII

No information on other hazards

## SECTION3. Composition/information on ingredients

### 3.1 Substances

Irrilevant

### 3.2 Mixtures

Refer to paragraph 16 for full text of hazard statements

Petroleum gas contains less than 0,1 % w/w 1,3-butadiene (EINECS No 203-450-8)

Substance	Concentration	Classification	Index	CAS	EINECS	REACH
Petroleum gas Note: H K S U	> 50 <= 100%	Flam. Gas 1, H220; Liq. Gas, H280	649-199-00-1	68476-40-4	200-681-4	01-2119486 557-22
ethanol	> 5 <= 10%	Flam. Liq. 2, H225	603-002-00-5	64-17-5	200-578-6	01-2119457 610-43

## SECTION4. First aid measures

### 4.1. Description of first aid measures

Inhalation:

Air the area. Move immediately the contaminated patient from the area and keep him at rest in a well ventilated area. If you feel unwell seek medical advice.

Direct contact with skin (of the pure product):  
Wash thoroughly with soap and running water.

Direct contact with eyes (of the pure product):  
Wash immediately and thoroughly with running water for at least 10 minutes.

Ingestion:  
Not hazardous. It's possible to give activated charcoal in water or liquid paraffin medicine

#### **4.2. Most important symptoms and effects, both acute and delayed**

The repeated inhalation of vapors can cause drowsiness and giddiness.

#### **4.3. Indication of any immediate medical attention and special treatment needed**

If medical advice is needed, have product container or label at hand.

### **SECTION5. Firefighting measures**

#### **5.1. Extinguishing media**

Advised extinguishing agents:  
CO2 or dry powder extinguisher

Extinguishing means to avoid:  
Direct jets of water

#### **5.2. Special hazards arising from the substance or mixture**

The aerosol containers overheated burst and can be ejected with violence from a distance and can take place a dangerous mechanism for the fire.

Manufactured under pressure in sealed metal container (test pressure 15 bar max). Cool containers with water spray trying to remove them from the fire. The aerosol containers can be overheated and burst violently ejected from a distance (protect the head using a safety helmet).

#### **5.3. Advice for firefighters**

Use protection for the breathing apparatus  
Safety helmet and full protective suit.

The spray water can be used to protect the people involved in the extinction

You may also use selfrespirator, especially when working in confined and poorly ventilated area and if you use halogenated extinguishers (Halon 1211 fluobrene, Solkan 123, NAF, etc...)

Keep containers cool with water spray

### **SECTION6. Accidental release measures**

#### **6.1. Personal precautions, protective equipment and emergency procedures**

6.1.1 For non-emergency personnel:

Leave the area surrounding the spill or release. Do not smoke

Leave the surrounding area recalling that any overheating could project the cylinder at a considerable distance.

Wear gloves and protective clothing

6.1.2 For emergency responders:

Given the tightness of aerosol, it is unlikely that the spillage may occur.

However if some container is damaged likely to cause a loss, insulate the tank in question by bringing it to open air or covering it with inert material and fuel (eg sand, earth, vermiculite) and having the care to avoid any point of ignition that might pose a serious risk of fire.

Wear gloves and protective clothing

Eliminate all unguarded flames and possible sources of ignition. No smoking.

Provision of sufficient ventilation.  
Evacuate the danger area and, in case, consult an expert.

### **6.2. Environmental precautions**

Contain spill  
Inform the competent authorities.  
Discharge the remains in compliance with the regulations

### **6.3. Methods and material for containment and cleaning up**

6.3.1 For containment:  
Recover the product for reuse, if possible, or the removal.

6.3.2 For cleaning up:  
After wiping up, wash with water the area and materials involved

6.3.3 Other information:  
None in particular.

### **6.4. Reference to other sections**

Refer to paragraphs 8 and 13 for more information

## **SECTION 7. Handling and storage**

### **7.1. Precautions for safe handling**

Avoid contact and inhalation of vapors  
Use extreme caution when handling the product. Avoid shock or friction.  
Do not smoke at work  
At work do not eat or drink.  
Vapors are heavier than air and may spread close to the ground and form explosive mixtures with air. Prevent formation of flammable or explosive concentrations in the air.  
Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50 ° C.  
Do not pierce or burn, even after the use. Do not spray on flame or incandescent objects. Use in adequately ventilated areas.  
See also paragraph 8 below.

### **7.2. Conditions for safe storage, including any incompatibilities**

Keep in original container closed tightly. Do not store in open or unlabeled containers.  
Keep containers upright and safe by avoiding the possibility of falls or collisions.  
Pressurized container. Store in a ventilated place, in original packaging away from heat and sunlight.  
Keep away from open flames, sparks and heat sources. Avoid direct sunlight exposure.

### **7.3. Specific end use(s)**

Private households (= general public = consumers):  
Store in cool and dry places.

Public domain (administration, education, entertainment, services, craftsmen):  
Handle with care.  
Store in ventilated place away from heat sources,  
Keep the container tightly closed.

## **SECTION 8. Exposure controls/personal protection**

### **8.1. Control parameters**

No data available on the mixture.

Related to contained substances:

Petroleum gas:

DNEL, inhalation, long term, systemic effects, workers: 2.21 mg/m<sup>3</sup>

DNEL, dermal, long term, systemic effects, workers: 23.4 mg/kg bw/day

DNEL, inhalation, long term, systemic effects, population: 0.0664 mg/m<sup>3</sup>

- Substance: ethanol

DNEL

Systemic effects Long term Workers inhalation = 950 (mg/m<sup>3</sup>)

Local effects Short term Workers inhalation = 1900 (mg/m<sup>3</sup>)

PNEC

Sweet water = 0,96 (mg/l)

sediment Sweet water = 3,6 (mg/kg/sediment)

Sea water = 0,79 (mg/l)

sediment Sea water = 2,9 (mg/kg/sediment)

ground = 0,63 (mg/kg ground)

## 8.2. Exposure controls

Appropriate engineering controls:

Private households (= general public = consumers):

Open with caution. Close the container immediately after its use.

Adopt the appropriate protective measures.

Public domain (administration, education, entertainment, services, craftsmen):

Open with caution. Close the container immediately after its use.

Adopt the appropriate protective measures.

Individual protection measures:

(a) Eye / face protection

Wear safety goggles to EN-166

(b) Skin protection

(i) Hand protection

Not needed for normal use.

(ii) Other

Avoid direct contact with the skin

Better is to use cotton antistatic clothing

(c) Respiratory protection

Work in a sufficiently ventilated to avoid inhaling the product.

(d) Thermal hazards

No hazard to report

Environmental exposure controls:

Use according to good working practices to avoid pollution into the environment.

## SECTION9. Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

Physical and chemical properties	Value	Determination method
Appearance	pressure vessel with base and liquefied gas	
Odour	characteristic	
Odour threshold	not determined	
pH	not determined	
Melting point/freezing point	not determined	
Initial boiling point and boiling range	not determined	
Flash point	not determined	ASTM D92
Evaporation rate	irrelevant	
Flammability (solid, gas)	not determined	
Upper/lower flammability or explosive limits	per il propellente: 9.5% LEL/UEL 1.8%	
Vapour pressure	not determined	
Vapour density	not determined	
Relative density	not determined	
Solubility	water soluble base	
Water solubility	water soluble base	
Partition coefficient: n-octanol/water	not determined	
Auto-ignition temperature	405°C	
Decomposition temperature	irrelevant	
Viscosity	not determined	
Explosive properties	limite inferiore di esplosione dl propellente: 1.8%	
Oxidising properties	non-oxidizing	
Container volume	not determined	
Product volume	not determined	
Pressure to 20°C	3.8 - 4.2 bar	
Deformation pressure	not determined	
Burst pressure of the container	not determined	
Flash point of liquid phase	not determined	
Propellant inflammability	infiammabile	

## 9.2. Other information

No data available.

## SECTION10. Stability and reactivity

### 10.1. Reactivity

No reactivity hazards

### 10.2. Chemical stability

No hazardous reaction when handled and stored according to provisions.

### 10.3. Possibility of hazardous reactions

There are no hazardous reactions

#### **10.4. Conditions to avoid**

Avoid the accumulation of electrostatic charges.

The aerosol product is stable for a period longer than 36 months under normal storage conditions cannot be dangerous reactions because the nearly exhausted, the hermetic tight container.

Avoid contact with oxidizing substances. The product may catch fire.

Avoid heat, flames, sparks and hot surfaces.

#### **10.5. Incompatible materials**

Embers, oxidizing materials.

#### **10.6. Hazardous decomposition products**

Does not decompose when used for intended uses.

### **SECTION 11. Toxicological information**

#### **11.1. Information on toxicological effects**

No toxicological tests have been performed on the mixture.

(a) acute toxicity: based on available data, the classification criteria are not met.

(b) skin corrosion/irritation based on available data, the classification criteria are not met.

(c) serious eye damage/irritation: based on available data, the classification criteria are not met.

(d) respiratory or skin sensitization: based on available data, the classification criteria are not met.

(e) germ cell mutagenicity: based on available data, the classification criteria are not met.

(f) carcinogenicity: based on available data, the classification criteria are not met.

(g) reproductive toxicity: based on available data, the classification criteria are not met.

(h) specific target organ toxicity (STOT) single exposure: based on available data, the classification criteria are not met.

(i) specific target organ toxicity (STOT) repeated exposure based on available data, the classification criteria are not met.

(j) aspiration hazard: based on available data, the classification criteria are not met.

Related to contained substances:

Petroleum gas:

Toxicity:

Not-toxic but simple suffocating. Gaseous state has no effect on the skin and mucous membranes. The vapours may cause narcotic effects.

Irritating power:

The contact of the liquid product on the skin causes cold sores.

There is no evidence relating to the following effects: Chronic toxicity - Sensitization - Mutagenesis - Teratogenesis - Carcinogenesis.

ethanol:

Rat DL50 (oral): 7000 mg / kg (HSDB, 2015);

Mouse DL50 (oral): 3400 mg / kg (HSDB, 2015);

Rabbit DL50 (cutaneous): > 20000 mg / kg (INRS, 2011);

Rat CL50-10 hours (inhalation): 20000 ppm (HSDB, 2015);

Mouse CL50-4 hours = 39 mg / m<sup>3</sup> (HSDB, 2015).

LD50 (rat) Oral (mg/kg body weight) = 7000  
LD50 Dermal (rat or rabbit) (mg/kg body weight) = 20000

## SECTION 12. Ecological information

### 12.1. Toxicity

The product has not been tested for environmental impact in the event of accidental release in the environment.

Related to contained substances:

Petroleum gas:

Toxicity to fish, LC50, 96h: 24.11 mg/l  
Toxicity to Daphnia, LC50, 48h: 14.22 mg/l  
Toxicity to algae, EC50, 96h: 7.71 mg/l  
C(E)L50 (mg/l) = 7,71

ethanol:

FISH:

CL-50 (96 h) *Salmo gairdneri*: 13 g / l;  
*Pimephales promelas*: 13.5 -15.3 g / l.  
INVERTEBRATES IN WATER WATER:  
CE50 (48 h) *Daphnia Magna*: 12.34 g / l; NOEC (reproduction, 21 days):> 10 mg / l.  
*Ceriodaphnia dubia*: EC50 (4 8h): 5.012 g / l;  
NOEC (reproduction, 10 days): 9.6 mg / l.  
*Palaemonetes pugio* NOEC (development, 10 days): 79 mg / l.

INVERTEBRATES IN WATER SALAD:

CE50 (24 h) *Salt Artemia* 23.9,> 10 g / l;  
CE50 (48 h) *Artemia saline* nauplii: 857 mg / l

SEAWEED:

*Chlorella vulgaris*, 72 h: CE50 275 mg / l, CE10 11.5 mg / l;  
*Selenastrum capricornutum*, 72 hr, CE50: 12.9 g / l, CE10 = 0.44 g / l;  
*Chlamydomonas eugamethos*, 48 h, CE50: 18 g / l, NOEC = 7.9 g / l  
*Skeletonema costatum*, NOEC (5 days): 3.24 g / l.

C(E)L50 (mg/l) = 275

NOEC (mg/l) = 10

Use according to good working practices to avoid pollution into the environment.

### 12.2. Persistence and degradability

No data available on the mixture.

Related to contained substances:

Petroleum gas:

No data available

ethanol:

Readily biodegradable

### 12.3. Bioaccumulative potential

No data available on the mixture.

Related to contained substances:

Petroleum gas:  
No data available

ethanol:  
N-octanol / water partition coefficient: -0.35  
The bioaccumulation potential is low.

#### **12.4. Mobility in soil**

No data available on the mixture.

Related to contained substances:

Petroleum gas:  
No data available

ethanol:  
It is not persistent in the environment.  
Fully soluble in water, it volatiles in the atmosphere.

#### **12.5. Results of PBT and vPvB assessment**

The substance / mixture does NOT contains substances PBT/vPvB according to Regulation (EC) No 1907/2006, Annex XIII

#### **12.6. Other adverse effects**

No adverse effects

### **SECTION13. Disposal considerations**

#### **13.1. Waste treatment methods**

The waste must be disposed of in compliance with the regulations in force delivering empty containers for final disposal and equipped to safely handle pressurized containers containing flammable liquids and gas waste. The empty container heated to temperatures exceeding 70 ° C can burst.  
Recover if possible. Operate according to local or national regulations

### **SECTION14. Transport information**

#### **14.1. UN number**

ADR/RID/IMDG/ICAO-IATA: 1950

ADR exemption because compliance with the following characteristics:

Combination packagings: per inner packaging 1 L per package 30 Kg

Inner packagings placed in skrink-wrapped or stretch-wrapped trays: per inner packaging 1 L per package 20 Kg

#### **14.2. UN proper shipping name**

ADR/RID/IMDG: AEROSOL flammable

ICAO-IATA: AEROSOL flammable

#### **14.3. Transport hazard class(es)**

ADR/RID/IMDG/ICAO-IATA: Class : 2

ADR/RID/IMDG/ICAO-IATA: Label : Limited quantities

ADR: Tunnel restriction code : D  
ADR/RID/IMDG/ICAO-IATA: Limited quantities : 1 L  
IMDG - EmS : F-D, S-U

#### **14.4. Packing group**

ADR/RID/IMDG/ICAO-IATA: --

#### **14.5. Environmental hazards**

ADR/RID/ICAO-IATA: Product is not environmentally hazardous  
IMDG: Marine polluting agent : Not

#### **14.6. Special precautions for user**

The transport must be carried out by authorised vehicles carrying dangerous goods in accordance with the requirements of the current edition of A.D.R Agreement. and the national provisions applicable.  
The transport must be carried out in the original packaging and in packages that are made from materials resistant from the content and not likely to generate with this dangerous reactions. Attendants to the loading and unloading of dangerous goods must have received proper training on the risks presented by prepared and on possible procedures to be taken in the event of emergency situations

#### **14.7. Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code**

It is not intended to carry bulk

### **SECTION15. Regulatory information**

#### **15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture**

Directive 2013/10/EU (aerosol)  
Decree 2/2/2002 n. 25 (risks related to chemical agents at work)  
D.M. 2/26/2004 Work (occupational exposure limits)  
D.M. 4/3/2007 (implementation of Directive 2006/8/EC)  
Regulation (EC) No 1907/2006 (REACH)  
Regulation (EC) no 1272/2008 (CLP)  
Regulation (EC) no 790/2009, 2012/18/EU  
Directive (cd. Seveso III)  
Seveso category:  
P3a - FLAMMABLE AEROSOLS

REGULATION (EU) No 1357/2014 - waste:  
HP3 - Flammable

#### **15.2. Chemical safety assessment**

No chemical safety assessment was carried out by the supplier

### **SECTION16. Other information**

#### **16.1. Other information**

Description of the hazard statements exposed to point 3  
H220 = Extremely flammable gas.  
H280 = Contains gas under pressure; may explode if heated.  
H225 = Highly flammable liquid and vapour.

Classification based on data of all mixture components

## **Section 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### **4.2 Main symptoms**

# BEAUTY & BUSINESS S.p.A.

Symptoms and effects known are reported in Section 2 and/ or Section 11 Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **Section 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **Section 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **Section 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

## **Section 8: Exposure controls/ personal protection**

### **8.1 Control parameters**

No data available

### **8.2 Exposure control**

#### **Personal protective equipment**

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

# BEAUTY & BUSINESS S.p.A.

## Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## **Section 9: Physical and chemical properties**

Colour and aspect:	White opaque cleanser
Odour:	Characteristic
Flash point:	Not flammable
pH:	5,4 - 5,9
Density:	1,020 - 1,040 g/cm <sup>3</sup>
Viscosity:	3000 - 4000 cP
Dry 110°:	16,5 - 17,5 %

## **Section 10. Stability and reactivity**

### **10.1 Reactivity**

There are no data available on the product itself.

### **10.2 Chemical stability**

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### **10.3 Possibility of hazard reactions**

None relevant.

### **10.4 Conditions to avoid**

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### **10.5 Incompatible materials**

Strong acids, strong oxidants.

### **10.6 Hazardous decomposition products**

The combustion can release carbon oxides.

## **Section 11: Toxicological information**

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### **11.1 Information on toxicological effects**

Set out below is the toxicological information relating to the main substances in the preparation:

#### ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

# BEAUTY & BUSINESS S.p.A.

## LACTIC ACID

LD 50 Oral rat: 4936 mg/Kg

## LAURETH-2

LD 50 Oral rat: 2000 mg/Kg

## PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

## POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

## SODIUM C14-16 OLEFIN SULFONATE

LD 50 Oral rat: 2079 mg/Kg

## SAFETY DATA SHEET

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 2015/830

### SDL SCALP RENEW ENERG.SHAMPOO 250ml USA

Date: 11/25/2019

Vers: 0

#### SECTION 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

Product description: SDL SCALP RENEW ENERG.SHAMPOO 250ml USA

Product code: PF020153 - CI019231

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### SECTION 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Eye Dam. 1

##### 2.2 Label according to (EC) 1272/2008

###### Pictogram:

GHS05

###### Signal Word

Danger

###### Hazard statement:

H318 Causes serious eye damage

###### Precautionary statement (Prevention)

P280 Wear protective gloves/protective clothing/eye protection/face protection

###### Precautionary statement (Response)

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

## 2.3 Additional hazards

None known

## SECTION 3: Composition / informations on ingredients

### 3.1 Substances:

Not applicable

### 3.2 Mixture:

< 1 % ETHYLHEXYLGLYCERIN

CAS#: 70445-33-9 EINECS#: 408-080-2

Eye Dam. 1 H318 – Aquatic Chronic 3 H412 – Acute Tox. 4 H332

< 1 % GUAR HYDROXYPROPYLTRIMONIUM CHLORIDE

CAS#: 65497-29-2 EINECS#:

Aquatic Acute 1 H400 – Aquatic Chronic 1 H410 – Fattore M: 1

< 1 % LACTIC ACID

CAS#: 50-21-5 EINECS#: 200-018-0

Skin Irrit. 2 H315 – Eye Dam. 1 H318

< 1 % MENTHYL LACTATE

CAS#: 59259-38-0 EINECS#:

Aquatic Chronic 3 H412

< 1 % PHENOXYETHANOL

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

< 1 % POLYQUATERNIUM-7

CAS#: 26590-05-6 EINECS#:

Aquatic Chronic 3 H412

1-3 % SODIUM COCOAMPHOACETATE

CAS#: 90387-76-1 EINECS#:

Eye Irrit. 1 H318

3-5 % COCAMIDOPROPYL BETAINE

CAS#: 61789-40-0 EINECS#: 263-058-8

Eye Dam. 1 H318 – Aquatic Chronic 3 H412

7-10 % SODIUM C14-16 OLEFIN SULFONATE

CAS#: 68439-57-6 EINECS#: 270-407-8

Skin Irrit. 2 H315 – Eye Irrit. 1 H318

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

# BEAUTY & BUSINESS

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/or Section 11. Other effects are possible.

## 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

## SECTION 5: Fire fighting measures

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

Refer to Section 8.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## SECTION 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## SECTION 8: Exposure controls / personal protection

### 8.1 Control parameters

No data available

# BEAUTY & BUSINESS

## 8.2 Exposure control

### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

### Eye protection

Safety glasses with side shields (EN 166).

### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 9: Physical and chemical properties

Aspect:	Opaque Cleanser
Colour:	Color To Light Yellow
Odour:	Characteristic
Density:	1,020 - 1,040
Dry content (110 °C):	18 - 20
pH:	5,8 - 6,3
Viscosity, dynamic:	3300 - 4300
Flash point:	n.d.

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

Strong acids, strong oxidants.

### 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

# BEAUTY & BUSINESS

## SECTION 11: Toxicological informations

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

#### LACTIC ACID

LD 50 Oral rat: 4936 mg/Kg

#### MENTHYL LACTATE

LD 50 Oral rat: 5000 mg/Kg

#### PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

#### SODIUM C14-16 OLEFIN SULFONATE

LD 50 Oral rat: 2079 mg/Kg

#### SODIUM COCOAMPHOACETATE

LD 50 Oral rat: 2000 mg/Kg

## SECTION 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

#### LACTIC ACID

LC 50: 130 mg/l/96h

#### MENTHYL LACTATE

LC 50: 22 mg/l/96h

#### PHENOXYETHANOL

LC 50: 500 mg/l/96h

#### SODIUM C14-16 OLEFIN SULFONATE

LC 50: 4,2 mg/l/96h

#### SODIUM COCOAMPHOACETATE

LC 50: 100 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

# BEAUTY & BUSINESS

## SECTION 13: Disposal consideration

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## SECTION 14: Transport informations

UN#:	Non-hazardous
Proper shipping name:	Non-hazardous
Class:	Non-hazardous
Packaging group:	Non-hazardous

## SECTION 15: Regulatory informations

### 15.1 Regulations

Regulation (EC) 1907/2006 (REACH) and following amendments

Regulation (EC) 1272/2008 (CLP) and following amendments

Regulation (EC) 1223/2009 (Cosmetic Regulation) and following amendments

In the EU, finished cosmetic products are exempted from any obligation of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)].

### 15.2 Evaluation of chemical security

No data available

## SECTION 16: Other informations

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

According to Regulation (EC) N° 1907/2006 (REACH) with its amendment Regulation (EC) N° 2015/830

## SAFETY DATA SHEET

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 2015/830

### SDL SCALP RENEW ENERG.LOTION 12X10ml USA

Date: 11/25/2019

Vers: 0

#### SECTION 1: Identification of the substance/ mixture and of the company/undertaking

##### 1.1 Product identifier

Product description: SDL SCALP RENEW ENERG.LOTION 12X10ml USA

Product code: PF020155 - CI019232

##### 1.2 Relevant identified uses

cosmetic product

##### 1.3 Details of the supplier of the safety data sheet

BEAUTY & BUSINESS S.P.A.

Via Ciserano, snc. - 24046

Osio Sotto (BG) - ITALY

Tel.: 035 4197798

Fax: 035 4197734

e-mail: schede.sicurezza@alfaparfgroup.it

##### 1.4 Emergency telephone number

BEAUTY & BUSINESS S.P.A.

Tel.: +39 035 4197798 (office hours)

#### SECTION 2: Hazard identification

##### 2.1 Classification of the substance/mixture according to (EC) 1272/2008

Eye Irrit. 2

Flam. Liq. 3

##### 2.2 Label according to (EC) 1272/2008

Pictogram:

GHS02

GHS07

Warning

Hazard statement:

H226 Flammable liquid and vapour

H319 Causes serious eye irritation

Precautionary statement (Disposal)

P501 Dispose of contents/container in accordance with local/ regional/national/international regulation

Precautionary statement (Prevention)

P210 Keep away from heat/sparks/open flames/hot surfaces. — No smoking.

P233 Keep container tightly closed.

# BEAUTY & BUSINESS

P240 Ground/bond container and receiving equipment.

P241 Use explosion-proof electrical/ventilating/lighting/ equipment.

P242 Use only non-sparking tools.

P243 Take precautionary measures against static discharge.

P264 Wash hands and other skin areas exposed to material thoroughly after handling.

P280 Wear protective gloves/protective clothing/eye protection/face protection

## Precautionary statement (Response)

P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/ shower

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P337 + P313 If eye irritation persists: Get medical advice/attention.

P370 + P378 In case of fire: Use appropriate media for extinction (see Section 5 on this label)

## 2.3 Additional hazards

None known

## SECTION 3: Composition / informations on ingredients

### 3.1 Substances:

Not applicable

### 3.2 Mixture:

< 1 % BENZOPHENONE-4

CAS#: 4065-45-6 EINECS#:

Eye Irrit. 2 H319 – Skin Irrit. 2 H315

< 1 % MENTHYL LACTATE

CAS#: 59259-38-0 EINECS#:

Aquatic Chronic 3 H412

< 1 % POLYQUATERNIUM-55

CAS#: 306769-73-3 EINECS#:

Eye Irrit. 2 H319 – Aquatic Acute 1 H400 – Aquatic Chronic 1 H410 – Fattore M: 1

30-50 % ALCOHOL DENAT.

CAS#: 64-17-5 EINECS#: 200-578-6

Flam. Liq. 2 H225 – Eye Irrit. 2 H319

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

# BEAUTY & BUSINESS

Symptoms and effects known are reported in Section 2 and/or Section 11. Other effects are possible.

## 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

## SECTION 5: Fire fighting measures

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

Refer to Section 8.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## SECTION 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## SECTION 8: Exposure controls / personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

# BEAUTY & BUSINESS

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

## Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 9: Physical and chemical properties

Aspect:	Clear Liquid
Colour:	Colorless
Odour:	Characteristic
Density:	0.890 - 0.910
Dry content (110 °C):	n.a.
pH:	4,3 - 5,0
Viscosity, dynamic:	n.a.
Flash point:	25
Flammability:	Flammable

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

Strong acids, strong oxidants.

### 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

# BEAUTY & BUSINESS

## SECTION 11: Toxicological informations

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

ALCOHOL DENAT.

LD 50 Oral rat: 50 mg/Kg

BENZOPHENONE-4

LD 50 Oral rat: 5000 mg/Kg

MENTHYL LACTATE

LD 50 Oral rat: 5000 mg/Kg

POLYQUATERNIUM-55

LD 50 Oral rat: 2000 mg/Kg

## SECTION 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

ALCOHOL DENAT.

LC 50: 13000 mg/l/96h

BENZOPHENONE-4

LC 50: 460 mg/l/96h

MENTHYL LACTATE

LC 50: 22 mg/l/96h

POLYQUATERNIUM-55

LC 50: 0,71 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## SECTION 13: Disposal consideration

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

# BEAUTY & BUSINESS

## SECTION 14: Transport informations

UN#:	1266
Proper shipping name:	PERFUMERY PRODUCTS
Class:	3
Packaging group:	III

## SECTION 15: Regulatory informations

### 15.1 Regulations

Regulation (EC) 1907/2006 (REACH) and following amendments

Regulation (EC) 1272/2008 (CLP) and following amendments

Regulation (EC) 1223/2009 (Cosmetic Regulation) and following amendments

In the EU, finished cosmetic products are exempted from any obligation of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)].

### 15.2 Evaluation of chemical security

No data available

## SECTION 16: Other informations

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

According to Regulation (EC) N° 1907/2006 (REACH) with its amendment Regulation (EC) N° 2015/830

## 2.3 Additional hazards

None known

## SECTION 3: Composition / informations on ingredients

### 3.1 Substances:

Not applicable

### 3.2 Mixture:

< 1 % BENZOPHENONE-4

CAS#: 4065-45-6 EINECS#:

Eye Irrit. 2 H319 – Skin Irrit. 2 H315

< 1 % ETHYLHEXYLGLYCERIN

CAS#: 70445-33-9 EINECS#: 408-080-2

Eye Dam. 1 H318 – Aquatic Chronic 3 H412 – Acute Tox. 4 H332

< 1 % PHENOXYETHANOL

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

< 1 % SODIUM HYDROXIDE

CAS#: 1310-73-2 EINECS#: 215-185-5

Skin Corr. 1A H314 – Met. Corr. 1 H290

1-3 % ACRYLATES/C10-30 ALKYL ACRYLATE CROSSPOLYMER

CAS#: EINECS#:

Aquatic Chronic 3 H412 – Fattore M: 1

1-3 % COCAMIDOPROPYL BETAINE

CAS#: 61789-40-0 EINECS#: 263-058-8

Eye Dam. 1 H318 – Aquatic Chronic 3 H412

1-3 % DISODIUM LAURETH SULFOSUCCINATE

CAS#: 39354-45-5 ; 40754-59-4 ; 68815-56-5 EINECS#:

Eye Irrit. 2 H319

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/or Section 11. Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

# BEAUTY & BUSINESS

## SECTION 5: Fire fighting measures

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

Refer to Section 8.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## SECTION 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

## SECTION 8: Exposure controls / personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

# BEAUTY & BUSINESS

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

## Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

## Eye protection

Safety glasses with side shields (EN 166).

## Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 9: Physical and chemical properties

Aspect:	Clear Gel With White And Red Beads
Colour:	Colorless
Odour:	Characteristic
Density:	1,000 - 1,020
Dry content (110 °C):	10,50 - 12,50
pH:	4,7 - 5,1
Viscosity, dynamic:	26000 - 34000
Flash point:	n.d.

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

Strong acids, strong oxidants.

### 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## SECTION 11: Toxicological informations

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

ACRYLATES/C10-30 ALKYL ACRYLATE CROSSPOLYMER

# BEAUTY & BUSINESS

LD 50 Oral rat: 2000 mg/Kg

BENZOPHENONE-4

LD 50 Oral rat: 5000 mg/Kg

DISODIUM LAURETH SULFOSUCCINATE

LD 50 Oral rat: 2000 mg/Kg

ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

SODIUM HYDROXIDE

LD 50 Oral rat: 1350 mg/Kg

## SECTION 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

ACRYLATES/C10-30 ALKYL ACRYLATE CROSSPOLYMER

LC 50: 100 mg/l/96h

BENZOPHENONE-4

LC 50: 460 mg/l/96h

DISODIUM LAURETH SULFOSUCCINATE

LC 50: 35 mg/l/96h

ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

PHENOXYETHANOL

LC 50: 500 mg/l/96h

SODIUM HYDROXIDE

LC 50: 45 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## SECTION 13: Disposal consideration

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/or Section 11. Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

## SECTION 5: Fire fighting measures

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

Refer to Section 8.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## SECTION 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

# BEAUTY & BUSINESS

Handle in accordance with good industrial hygiene and safety practice.  
Avoid contact and inhalation of vapours. See also paragraph 8.  
When using do not eat or drink.

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## SECTION 8: Exposure controls / personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

### 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/or Section 11. Other effects are possible.

### 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

## SECTION 5: Fire fighting measures

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

Refer to Section 8.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## SECTION 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

# BEAUTY & BUSINESS

Handle in accordance with good industrial hygiene and safety practice.  
Avoid contact and inhalation of vapours. See also paragraph 8.  
When using do not eat or drink.

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

## 7.3 Specific final uses

No data available

## SECTION 8: Exposure controls / personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 9: Physical and chemical properties

Aspect:	Pearly Cleanser
Colour:	White To Ivory
Odour:	Characteristic
Density:	1,030 - 1,050
Dry content (110 °C):	22,50 - 24,50
pH:	6,2 - 6,8
Viscosity, dynamic:	3300 - 4400
Flash point:	n.d.

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

# BEAUTY & BUSINESS

The product is stable in normal conditions of use and storage (refer to paragraph 7).

## 10.3 Possibility of hazard reactions

None relevant.

## 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

## 10.5 Incompatible materials

Strong acids, strong oxidants.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## SECTION 11: Toxicological informations

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### DISODIUM LAURETH SULFOSUCCINATE

LD 50 Oral rat: 2000 mg/Kg

#### ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

#### LACTIC ACID

LD 50 Oral rat: 4936 mg/Kg

#### PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

#### POLYQUATERNIUM-22

LD 50 Oral rat: 5000 mg/Kg

#### SODIUM HYDROXIDE

LD 50 Oral rat: 1350 mg/Kg

## SECTION 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### DISODIUM LAURETH SULFOSUCCINATE

LC 50: 35 mg/l/96h

#### ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

#### LACTIC ACID

LC 50: 130 mg/l/96h

#### PHENOXYETHANOL

LC 50: 500 mg/l/96h

#### POLYQUATERNIUM-22

LC 50: 100 mg/l/96h

#### SODIUM HYDROXIDE

LC 50: 45 mg/l/96h

# BEAUTY & BUSINESS

## 12.2 Persistence

No data available.

## 12.3 Bioaccumulative potential

No data available.

## 12.4 Motility in soil

No data available.

## 12.5 Results of PBT e vPvB assessment

No data available.

## 12.6 Other adverse effects

No data available.

## SECTION 13: Disposal consideration

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## SECTION 14: Transport informations

UN#:	Non-hazardous
Proper shipping name:	Non-hazardous
Class:	Non-hazardous
Packaging group:	Non-hazardous

## SECTION 15: Regulatory informations

### 15.1 Regulations

Regulation (EC) 1907/2006 (REACH) and following amendments

Regulation (EC) 1272/2008 (CLP) and following amendments

Regulation (EC) 1223/2009 (Cosmetic Regulation) and following amendments

In the EU, finished cosmetic products are exempted from any obligation of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)].

### 15.2 Evaluation of chemical security

No data available

## SECTION 16: Other informations

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

According to Regulation (EC) N° 1907/2006 (REACH) with its amendment Regulation (EC) N° 2015/830

## Precautionary statement (Response)

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician.

P321 Specific treatment (see Section 4 on this label).

P363 Wash contaminated clothing before reuse.

## 2.3 Additional hazards

None known

## SECTION 3: Composition / informations on ingredients

### 3.1 Substances:

Not applicable

### 3.2 Mixture:

< 1 % ETHYLHEXYLGLYCERIN

CAS#: 70445-33-9 EINECS#: 408-080-2

Eye Dam. 1 H318 – Aquatic Chronic 3 H412 – Acute Tox. 4 H332

< 1 % LACTIC ACID

CAS#: 50-21-5 EINECS#: 200-018-0

Skin Irrit. 2 H315 – Eye Dam. 1 H318

< 1 % PHENOXYETHANOL

CAS#: 122-99-6 EINECS#: 204-589-7

Acute Tox. 4 H302 – Eye Irrit. 2 H319

< 1 % POLYQUATERNIUM-10

CAS#: 68610-92-4 ; 53568-66-4 ; 81859-24-7 EINECS#:

Aquatic Chronic 2 H411

1-3 % COCAMIDOPROPYL BETAINE

CAS#: 61789-40-0 EINECS#: 263-058-8

Eye Dam. 1 H318 – Aquatic Chronic 3 H412

1-3 % PARFUM / FRAGRANCE

CAS#: EINECS#:

Eye Irrit. 2 H319 – Skin Irrit. 2 H315 – Skin Sens. 1 H317 – Aquatic Chronic 2 H411

7-10 % SODIUM C14-16 OLEFIN SULFONATE

CAS#: 68439-57-6 EINECS#: 270-407-8

Skin Irrit. 2 H315 – Eye Irrit. 1 H318

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

# BEAUTY & BUSINESS S.p.A.

## Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

## Ingestion

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## **4.2 Main symptoms**

Symptoms and effects known are reported in Section 2 and/or Section 11. Other effects are possible.

## **4.3 Indications for medical intervention and / or specific treatments**

Treatments: symptomatic treatment.

## **SECTION 5: Fire fighting measures**

### **5.1 Extinguishing media**

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### **5.2 Special hazards by the product/itself**

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### **5.3 Advice for fire-fighters**

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## **SECTION 6: Accidental release measures**

### **6.1 Personal precautions, protection equipment and emergency procedures:**

Wear self-contained breathing apparatus, gloves and protective clothes.

Refer to Section 8.

### **6.2 Environmental precautions**

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### **6.3 Methods e materials for containment**

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### **6.4 Reference to other sections**

Where appropriate, reference is made to sections 8 and 13.

## **SECTION 7: Handling and storage**

For transport, storage and handling only use suitable materials.

### **7.1 Precautions for safe handling**

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### **7.2 Conditions for safe storage, including any incompatibilities**

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### **7.3 Specific final uses**

No data available

# BEAUTY & BUSINESS S.p.A.

## SECTION 8: Exposure controls / personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 9: Physical and chemical properties

Aspect:	Clear Shampoo
Colour:	Light Yellow
Odour:	Characteristic
Density:	1.010 - 1.030 g/cm <sup>3</sup>
Dry content (110 °C):	15,00 - 17,00 %
pH:	4.9 - 5.4
Viscosity, dynamic:	3800 - 5800 cPs
Flash point:	n.d.

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

Strong acids, strong oxidants.

### 10.6 Hazardous decomposition products

# BEAUTY & BUSINESS S.p.A.

The combustion can release carbon oxides.

## SECTION 11: Toxicological informations

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

#### ETHYLHEXYLGLYCERIN

LD 50 Oral rat: 2000 mg/Kg

#### LACTIC ACID

LD 50 Oral rat: 4936 mg/Kg

#### PHENOXYETHANOL

LD 50 Oral rat: 1260 mg/Kg

#### SODIUM C14-16 OLEFIN SULFONATE

LD 50 Oral rat: 2079 mg/Kg

## SECTION 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

#### ETHYLHEXYLGLYCERIN

LC 50: 60,2 mg/l/96h

#### LACTIC ACID

LC 50: 130 mg/l/96h

#### PHENOXYETHANOL

LC 50: 500 mg/l/96h

#### SODIUM C14-16 OLEFIN SULFONATE

LC 50: 4,2 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## SECTION 13: Disposal consideration

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

# BEAUTY & BUSINESS S.p.A.

## SECTION 14: Transport informations

UN#:	Non hazardous
Proper shipping name:	Non hazardous
Class:	Non hazardous
Packaging group:	Non hazardous

## SECTION 15: Regulatory informations

### 15.1 Regulations

Regulation (EC) 1907/2006 (REACH) and following amendments

Regulation (EC) 1272/2008 (CLP) and following amendments

Regulation (EC) 1223/2009 (Cosmetic Regulation) and following amendments

In the EU, finished cosmetic products are exempted from any obligation of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)].

### 15.2 Evaluation of chemical security

No data available

## SECTION 16: Other informations

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

According to Regulation (EC) N° 1907/2006 (REACH) with its amendment Regulation (EC) N° 2015/830

## **SECTION 4: First aid measures**

### **4.1 Description of first aid measures**

#### Inhalation

Move victim to a well-ventilated place or into fresh air; in case of malaise get medical advice.

#### Skin contact

Wash off with plenty of water. Change clothing if necessary. If irritation persists, or tissue damage shows, seek for medical advice.

#### Eye contact

Flush eyes under running water for a few minutes, keeping eyelids well opened. If pain persists, seek for medical advice.

#### Ingestion

# BEAUTY & BUSINESS S.p.A.

Do not induce vomiting, unless after obtaining medical authorization to do so. Never give anything by mouth to an unconscious person. Consult a physician, showing the safety data sheet.

## 4.2 Main symptoms

Symptoms and effects known are reported in Section 2 and/or Section 11. Other effects are possible.

## 4.3 Indications for medical intervention and / or specific treatments

Treatments: symptomatic treatment.

## SECTION 5: Fire fighting measures

### 5.1 Extinguishing media

Water, CO<sub>2</sub>, foam, dry powder, depending on the materials affected by the fire.

### 5.2 Special hazards by the product/itself

In case of fire, carbon oxides can be released. In some case, if fire occurs, some dangerous combustion products can be released.

### 5.3 Advice for fire-fighters

Avoid breathing fumes.

Wear self-contained breathing apparatus if necessary.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protection equipment and emergency procedures:

Wear self-contained breathing apparatus, gloves and protective clothes.

Refer to Section 8.

### 6.2 Environmental precautions

Limit leakages and spillage with sand or soil.

If product has drained into streams or drainage system, or has contaminated soil or plants, warn authorities.

### 6.3 Methods e materials for containment

Quickly collect the product wearing protective mask and clothing.

If the product is in a liquid form, prevent it goes into the sewer system. Collect the product for re-use if possible, or for the disposal. Eventually absorb with inert material. After collecting residues, wash interested zone and materials with water.

### 6.4 Reference to other sections

Where appropriate, reference is made to sections 8 and 13.

## SECTION 7: Handling and storage

For transport, storage and handling only use suitable materials.

### 7.1 Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Avoid contact and inhalation of vapours. See also paragraph 8.

When using do not eat or drink.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool and dry place. Avoid direct exposure to the sun. Keep away from open flames, sparks and other sources of ignition. No smoking. Make sure there is adequate ventilation.

### 7.3 Specific final uses

No data available

# BEAUTY & BUSINESS S.p.A.

## SECTION 8: Exposure controls / personal protection

### 8.1 Control parameters

No data available

### 8.2 Exposure control

#### Personal protective equipment

General protective and hygienic measures.

At work do not eat, drink or smoke. Use of appropriate protection measures for hands, eyes, skin and respiratory system. The manufacturer of the protective equipment should ensure that the means are appropriate to the concerned product.

#### Respiratory protection

If threshold value for daily exposure in the workplace is exceeded, wear a half-mask type FFP3 (ref. STANDARD EN 141). In the case the substance is odorless or its olfactory threshold is higher than the relative exposure limit, or in case of emergency, i.e. when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear a compressed air breathing apparatus (EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (EN 138).

#### Hand protection

Protect your hands with gloves category II (ref. Dir. 89/686 / EEC and standard EN 374) such as PVC, nitrile, neoprene or equivalent.

#### Eye protection

Safety glasses with side shields (EN 166).

#### Additional information about design of technical facilities

Workplace must be adequately ventilated. Where possible, install localized air intake system and effective system for general air exchange. If these measures are not sufficient to maintain concentrations of particulates and solvent vapors below the exposure limit, you will need to make use of appropriate respiratory protection.

## SECTION 9: Physical and chemical properties

Aspect:	Clear Liquid
Colour:	Colorless
Odour:	Characteristic
Density:	0.925 - 0.945 g/cm <sup>3</sup>
Dry content (110 °C):	n.a.
pH:	6.2 - 6.8
Viscosity, dynamic:	n.a.
Flash point:	28,5
Flammability:	Flammable

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

There are no data available on the product itself.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage (refer to paragraph 7).

### 10.3 Possibility of hazard reactions

None relevant.

### 10.4 Conditions to avoid

Avoid high temperatures. Keep the product away from open flames. Avoid to expose the container to the direct sunlight.

### 10.5 Incompatible materials

Strong acids, strong oxidants.

# BEAUTY & BUSINESS S.p.A.

## 10.6 Hazardous decomposition products

The combustion can release carbon oxides.

## SECTION 11: Toxicological informations

No toxicological data available on the product itself. Consider then, the concentration of each substance in assessing the toxicological effects deriving from the preparation.

### 11.1 Information on toxicological effects

Set out below is the toxicological information relating to the main substances in the preparation:

ALCOHOL DENAT.

LD 50 Oral rat: 50 mg/Kg

POLYIMIDE-1

LD 50 Oral rat: 2000 mg/Kg

## SECTION 12: Ecological informations

Adopt good working practices, avoiding littering.

### 12.1 Toxicity

ALCOHOL DENAT.

LC 50: 13000 mg/l/96h

POLYIMIDE-1

LC 50: 3,8 mg/l/96h

### 12.2 Persistence

No data available.

### 12.3 Bioaccumulative potential

No data available.

### 12.4 Motility in soil

No data available.

### 12.5 Results of PBT e vPvB assessment

No data available.

### 12.6 Other adverse effects

No data available.

## SECTION 13: Disposal consideration

### 13.1 Methods of treatment of the waste

Operate in compliance with local and national regulations.

#### Contaminated packaging

Collect all residues and contaminated packaging. After an appropriate cleaning, packaging can be recycled. Uncleaned packaging must be disposed of under the same requirements of the product.

## SECTION 14: Transport informations

UN#:	1266
Proper shipping name:	Perfumery products with flammable solvents
Class:	3
Packaging group:	III

# BEAUTY & BUSINESS S.p.A.

## SECTION 15: Regulatory informations

### 15.1 Regulations

Regulation (EC) 1907/2006 (REACH) and following amendments

Regulation (EC) 1272/2008 (CLP) and following amendments

Regulation (EC) 1223/2009 (Cosmetic Regulation) and following amendments

In the EU, finished cosmetic products are exempted from any obligation of classification and hazard labeling, as well as from provisions concerning safety data sheets [(Reg. (EC) 1907/2006, art. 2, comma 6, letter b) and Reg. (EC) 1272/2008 art. 1, comma 5, letter c)].

### 15.2 Evaluation of chemical security

No data available

## SECTION 16: Other informations

The data contained in this safety data sheet are based on our current knowledge and experience at the date indicated above. The user must verify the suitability and completeness of such information, in relation to the particular use intended. This safety data sheet cancels and replaces any previous releases of the same.

According to Regulation (EC) N° 1907/2006 (REACH) with its amendment Regulation (EC) N° 2015/830

Sources of Key Data:

Regulation (EC) N° 1272/2008 and Regulation (EC) N° 1907/2006, with following amendments

Full text of hazard categories and H and EUH statements

Aquatic Chronic 2	Hazardous to the aquatic environment - chronic toxicity Cat. 2
Eye Dam. 1	Serious eye Damage Cat. 1
Eye Irrit. 2	Eye irritation Cat. 2
Flam. Liq. 2	Flammable liquid Cat. 2
Skin Irr. 2	Skin irritation Cat. 2
Skin Sens. 1	Skin Sensitization Cat. 1
H225	Highly flammable liquid and vapour
H315	Causes skin irritation
H317	May cause an allergic skin reaction
H318	Causes serious eye damage
H319	Causes serious eye irritation
H411	Toxic to aquatic life with long-lasting effects

Classification and procedure used to derive the classification for mixtures according to Regulation (EC) 1272/2008 [CLP]:

Eye Irrit. 2	H319	Calculation method
Flam. Liq. 3	H226	Calculation method
Aquatic Chronic 3	H412	Calculation method
